We work with ourselves and draw on our direct experiences, on our perceptions.

For us, the sensorial quality of the illuminated space is the basic element contributing to the daily health of those who live and work there. This is why we use our headquarters as a perpetual and never finished laboratory, in continuous revolution and continuous experiment.

From this experience, since 2010 Exenia designs and manufactures LED luminaires for professional and architectural lighting, absolutely Italian, in terms of concept, design and build.

The quality mark that we pursue in the study of our products, is to achieve first-class optical systems with combined characteristics of minimum energy consumption, contained forms and very high standards of visual and perceptive comfort.

RESEARCH_

To understand the direction and the **founding principle** of our evolution, it is necessary to understand the priority given to the **research** and **innovation** phase of the particular product.

The performance and qualitative value of the **new optical systems** is the centrepiece of the entire design system.

These new values have the important task of adding **'very high quality performance'** to the typical characteristics of **'stylistic nature'** that has made Exenia a **recognizable** and worthy brand. Imitated by many.

DESIGN_

A style that is never flawed nor anonymous has always distinguished **Italian design** and craftsmanship.

We believe we are among those who manage to retain this attention to detail, while offering a **wide and differentiated product** range dedicated to quality with an **artisanal edge in a highly mechanised world.**

DEVELOPMENT_

The concept of development may seem generic and ambiguous if it is not approached with the overall vision to **consistently improve methods and processes** that are in place and planned, in the entire 'factory system'.

The product and its quality strictly depend on the **development and updating of the instruments** and the phased progress of **quality control methods**. **New software and new equipment allow us to analyse and substantially improve the overall quality of the product.**

PRODUCTION_

We have always pursued a **short chain production method**, even in times when it was a singular and uneconomical choice.

Now our **almost entirely Italian suppliers, many of which are local Tuscan companies, allow us to drive quality standards** and maintain **production flexibility** that would otherwise be impossible. **Thus helping us to improve our ethical and sustainable production policy, an important and necessary factor for us in defining ourselves in the modern world.**

LMPG GROUP_

Canadian company based in Montreal founded in 2006, stands out and affirms itself for the unique optical quality and the reliability of highly efficient indoor and outdoor products.

Leader in sustainable lighting in North America, it acquired Exenia in 2015 as a resourceful lead into the technical, decorative, and commercial lighting sector in Europe.

Membership of the LMPG Group defines for Exenia a new evolutionary chapter, aimed at entering the world of international lighting design.

The accumulation of knowledge, skills and diversification of products is an added value that leads to new and important goals in the world of design and professional architectural lighting.

**OUR
VALUES_**

INNOVATION

RESILIENCE

PASSION

TEAMWORK

exenia
LMP3

OUR MISSION_

Exenia aspires to become a partner for all interior and exterior architectural lighting professionals.

Exenia collaborates with Architects, Lighting Designers, and Lighting Engineers, offering them a wide and coordinated range of products characterised by high technological value and a simple minimal design, typical of Italian Style.

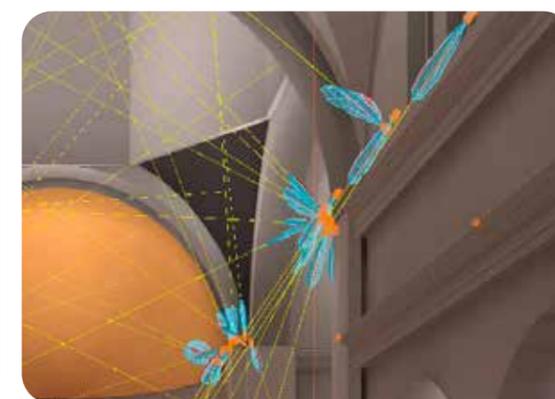

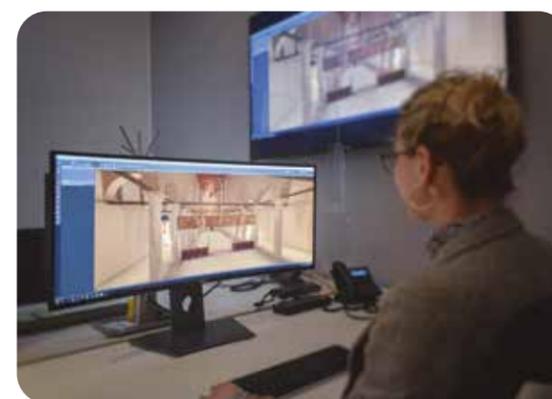

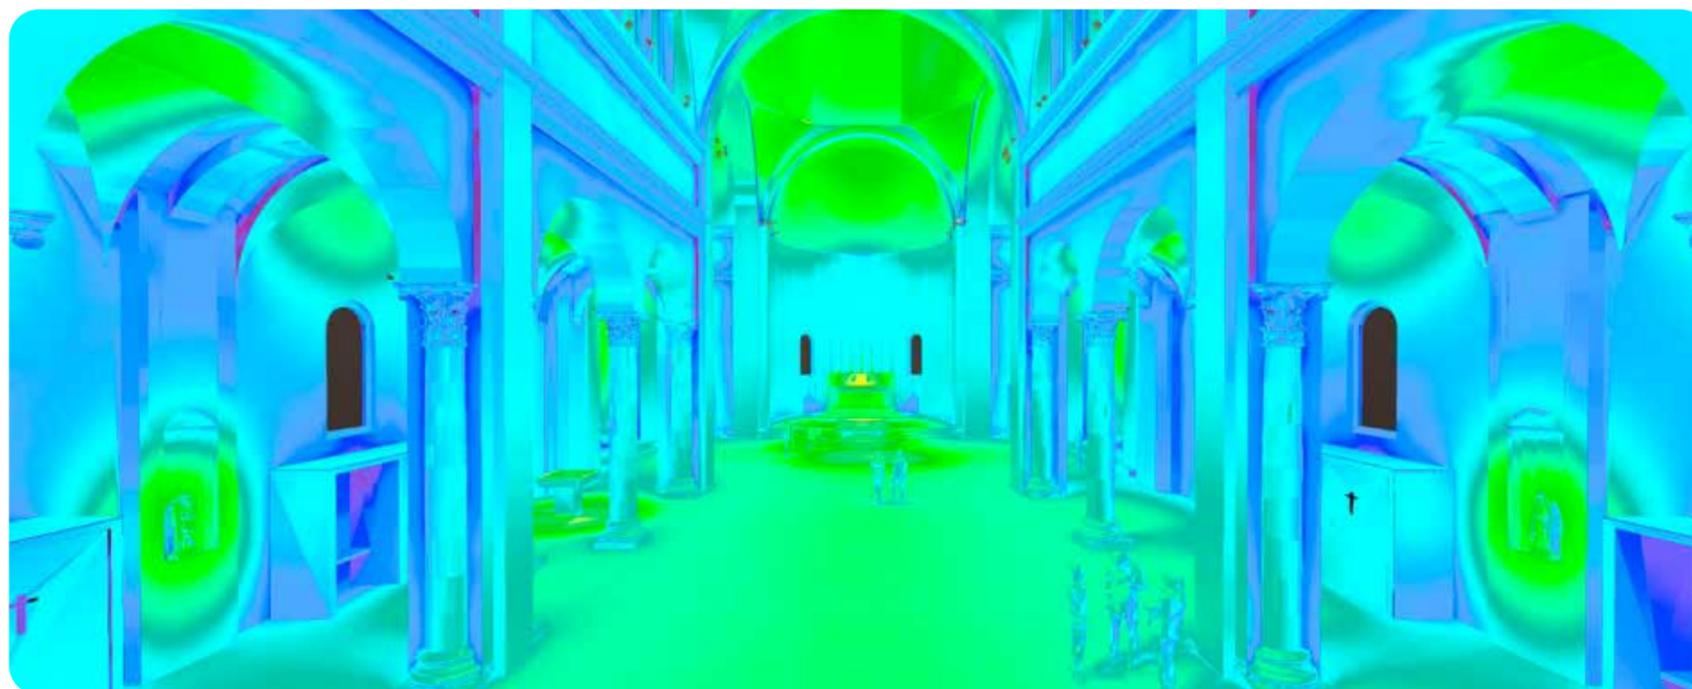

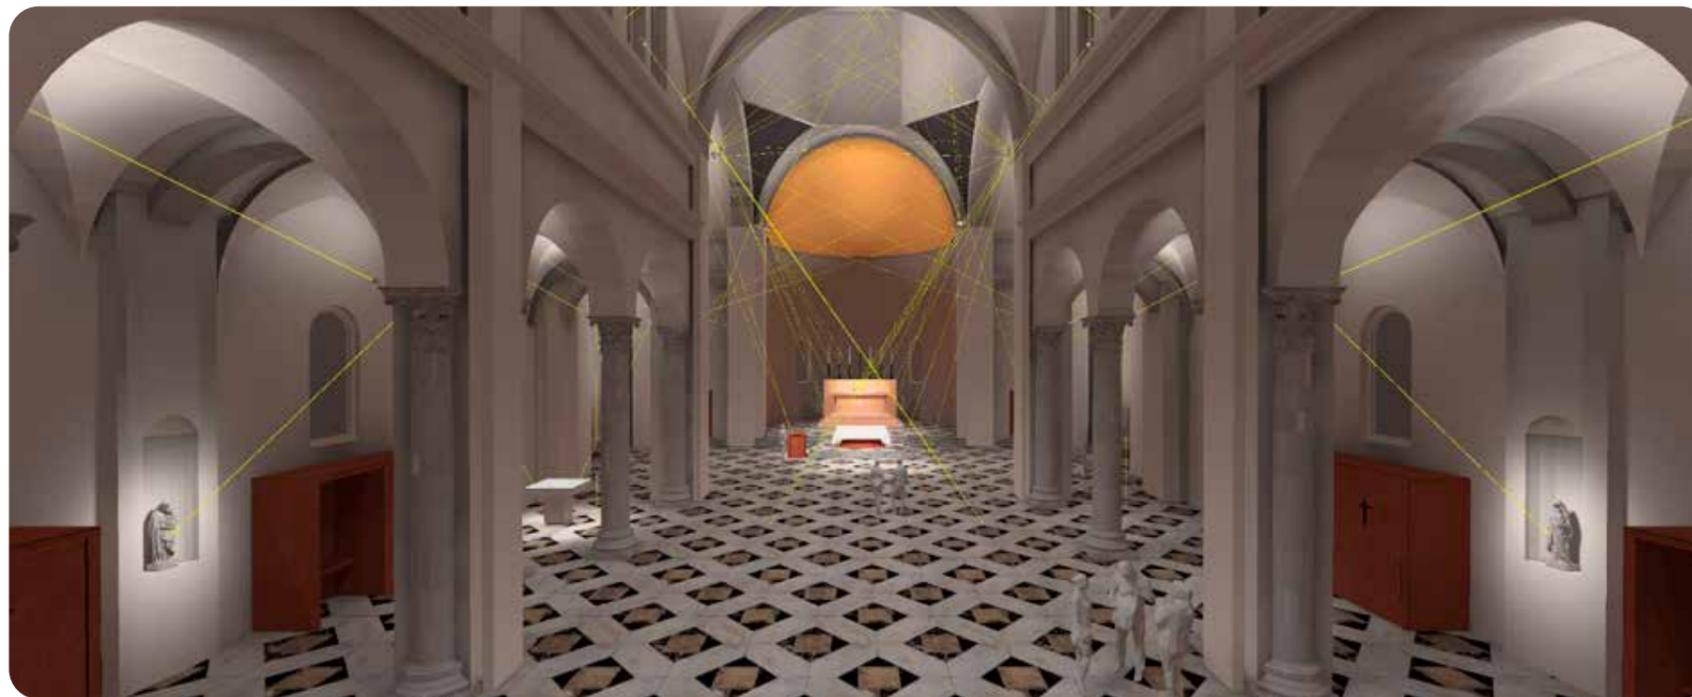

The range of EXENIA products allows us to offer cutting-edge and sustainable “lighting solutions” capable of satisfying the most sophisticated needs of even the most challenging project.

COHERENT AND RESPECTFUL LIGHT DESIGN_

The aim is to develop smart design fixtures, with sophisticated performance. Fixtures that can illuminate the space without modifying it, to enhance the different expressions of use for a correct reading while preserving the integrity of the place when in function. Tailored approach to enhance uniqueness. Every place or setting has its own characteristics.

Exenia supports the lighting designer with tailor-made lighting tools, calibrated to the objectives of the project, the specificity of the place and its intended use. As a group, we have often experienced the magic of this synergy.

UNVEILING THE SPACE. LIGHTING ARCHITECTURE_

Respectful lighting must enhance the architecture of a place without modifying it. Respectful lighting must recognize the hierarchy of places and emphasize it in a balanced manner by helping people to live the environment in the most appropriate way. In other words, light must be perceived by the viewer as a smooth and natural element of a space. Where possible, light should be diffused with no direct evidence of its point of origin.

This suggests the use of minimally invasive, essential shaped fixtures with colour finishes as close as possible to the surfaces or elements on which they will be installed and high-performance precision optics. Standard procedures are very helpful, and they should adapt to the needs of each environment.

A PATH INNOVATION BASED ON OPTICAL SCIENCE_

Research has become our obsession and is the driving force that generates the difference in Exenia products.

We have studied specific and innovative optical systems, designed to respond and provide effective solutions to the countless problems of lighting design.

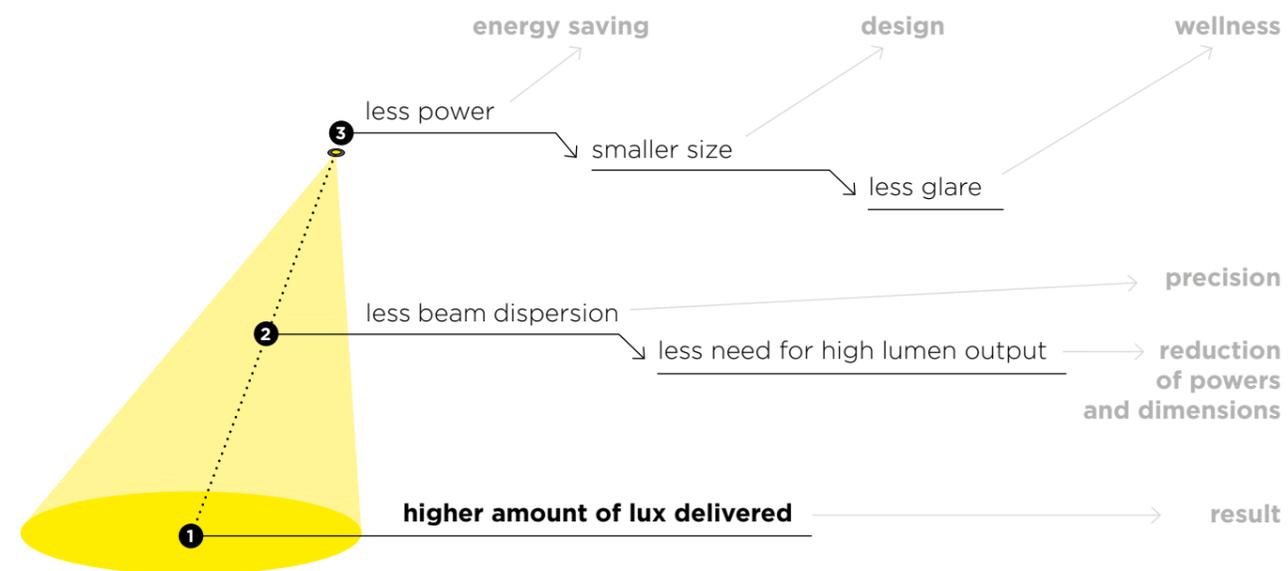

Projection quality, glare control, specific beams and beam deviations, optimised for performance and for extremely low consumption.

Why are the actual lux returned on the subject more important to us than the lumens emitted by the product?

The lux on the illuminated plane in the area defined by the beam is the exact measure of the efficiency of an optical system. Lumens are a datum that refers to what is generated by the optical system, regardless of the beam.

We measure ourselves on the actual part of light that reaches the mark, therefore what we will perceive nett of dispersions. For this we carefully consider the performance in Lux / watt. Resulting in less energy to get the same amount of light on the subject.

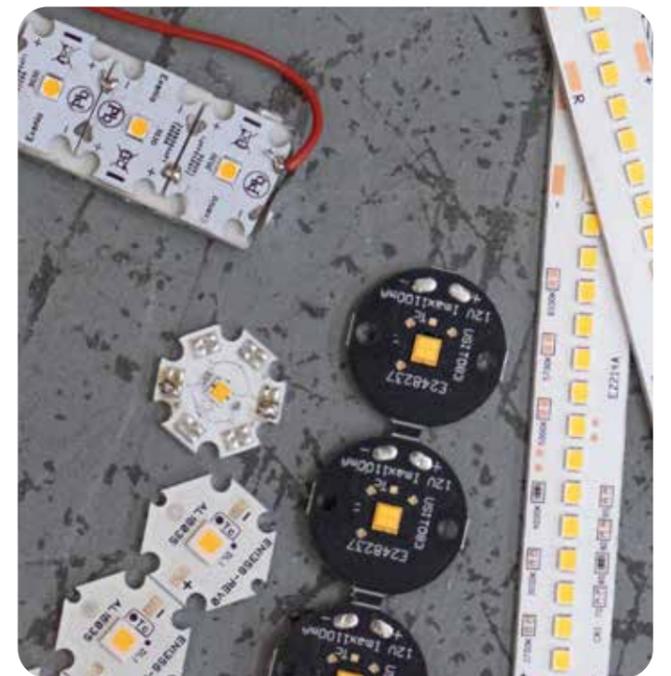

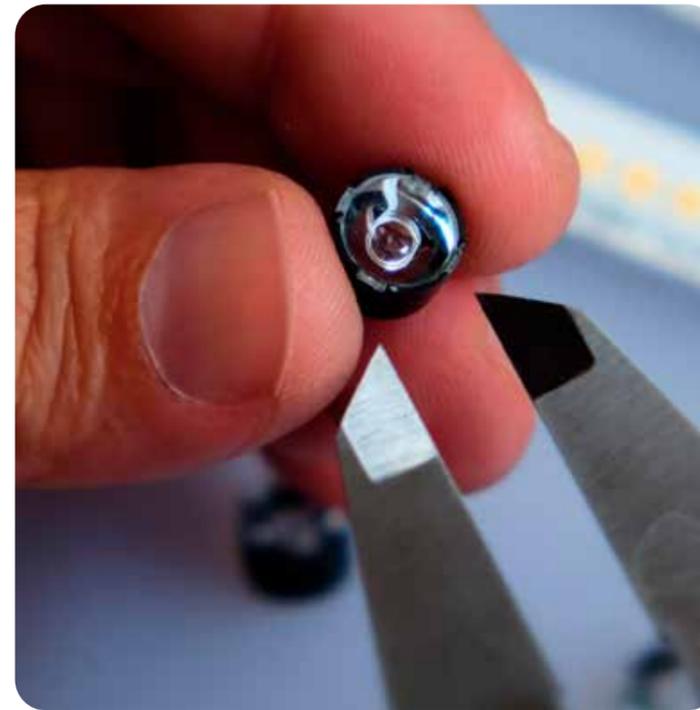

THE EFFECTIVE CIRCLE OF OPTICAL EVOLUTION

RESEARCH AS INNOVATION AND DESIGN TOOL_

Small to be discreet, to create the illusion of light without a footprint. Small because we can afford it, it is a unique luxury granted by the results of the new Revo optical systems.

Reducing dimensions without compromising the illuminated effects is one of the technical-aesthetic purposes that we carry out with the fundamental support of lighting designers, historians and restorers who guide us in their specific and defining recommendations.

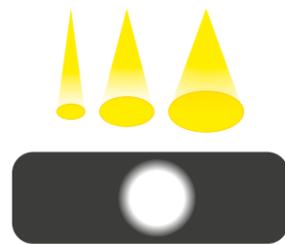

OPTICS OVERVIEW_

We have defined a range of optical options capable of providing defined and complementary lighting solutions. The Exenia collection of recessed, semi-recessed and projectors thus becomes a "toolbox" of specific fixtures available to lighting designers and technicians.

OPTICS OVERVIEW_

ACCENT LIGHTING:

Revo optics

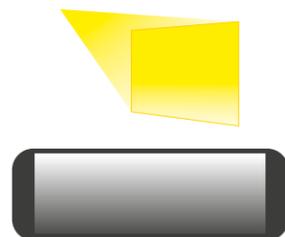

Roto symmetrical optics combine high homogeneity with a refined clean projection and minimum glare values, ideal for a defined, precise focus of light intensity. Designed for museum and heritage applications, they bring the high level of visual comfort and offer fantastic energy savings.

LIGHTING DISTRIBUTION:

Low Contrast Optics

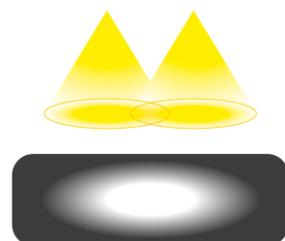

Roto symmetrical optics designed to optimise luminaire efficiency; they deliver an unprecedented level of uniform light distribution over a wide area. By utilising the suggested layout tables, they promote maximum coverage with the minimal number of required luminaires to deliver highly professional results.

WALL WASHERS:

Vertical Low Contrast Optics.

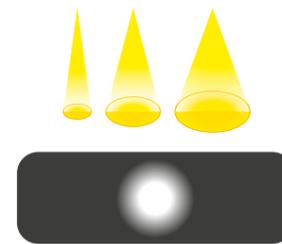

High performance asymmetrical lenses designed to optimise the distances between the products, while delivering the highest levels of uniform light on the walls and keeping ceilings and floors in the shade.

ELLIPTICAL LIGHTING.

Low Contrast optics with Elliptical Beam.

Designed to obtain longitudinal lighting distributions typically used in corridors or for highlighting horizontal features. This new optical geometry can reduce the number of products and thus lower the energy requirements while maintaining perfect homogeneity and distribution.

SOFT CONTOUR ACCENT LIGHTING.

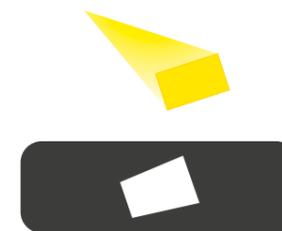

Parabolic reflector with soft beam optics.

Rotosymmetrical optics dedicated to unmarked accent lighting, where you need fluidity and continuity between subject and environment. The highlighted position slowly reduces, leaving a defined illuminated area that is much wider and more nuanced than the central area of incidence.

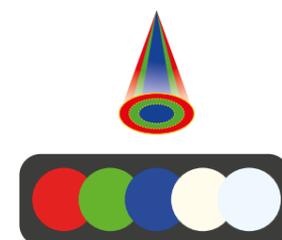

ZOOM OPTICS

Available in two projector models, R2 and M3, they are characterised by a single lens zoom with mechanical adjustment which allows extremely easy and immediate beam variations from 9° to 26°. Thanks to the geometric movement of the lens, glare values are always very low.

SHAPER

Two models of beam shaper in two sizes and powers, available to suit many applications. The M4 series and Museo Compact with shaper allows precise beam definition at long distances with higher power. The Revo Medium series with shaper combines compact dimensions and excellent performance in an effective luminaire, designed to be flexible and stable with special magnetic sliding lamelles.

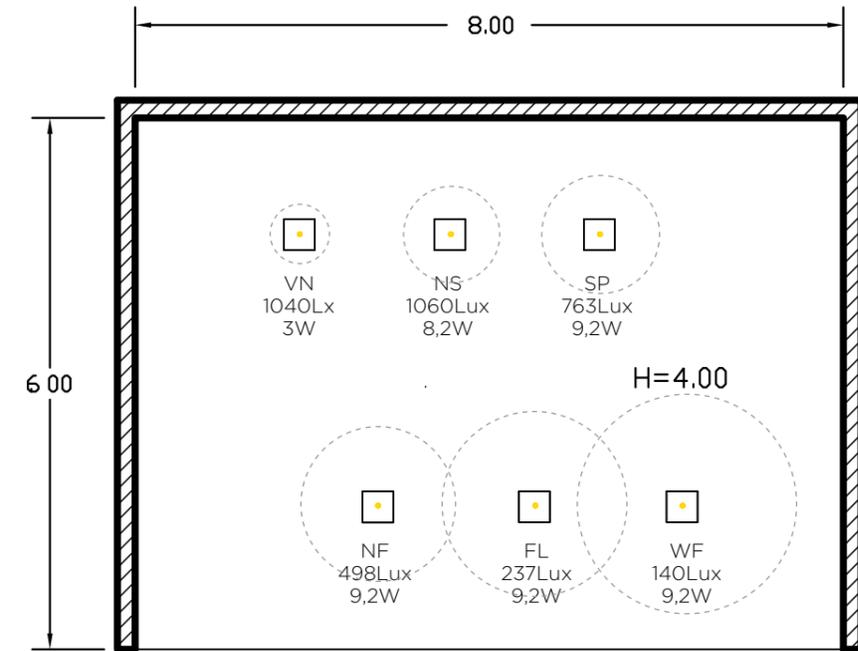

MULTICHIP OPTICS

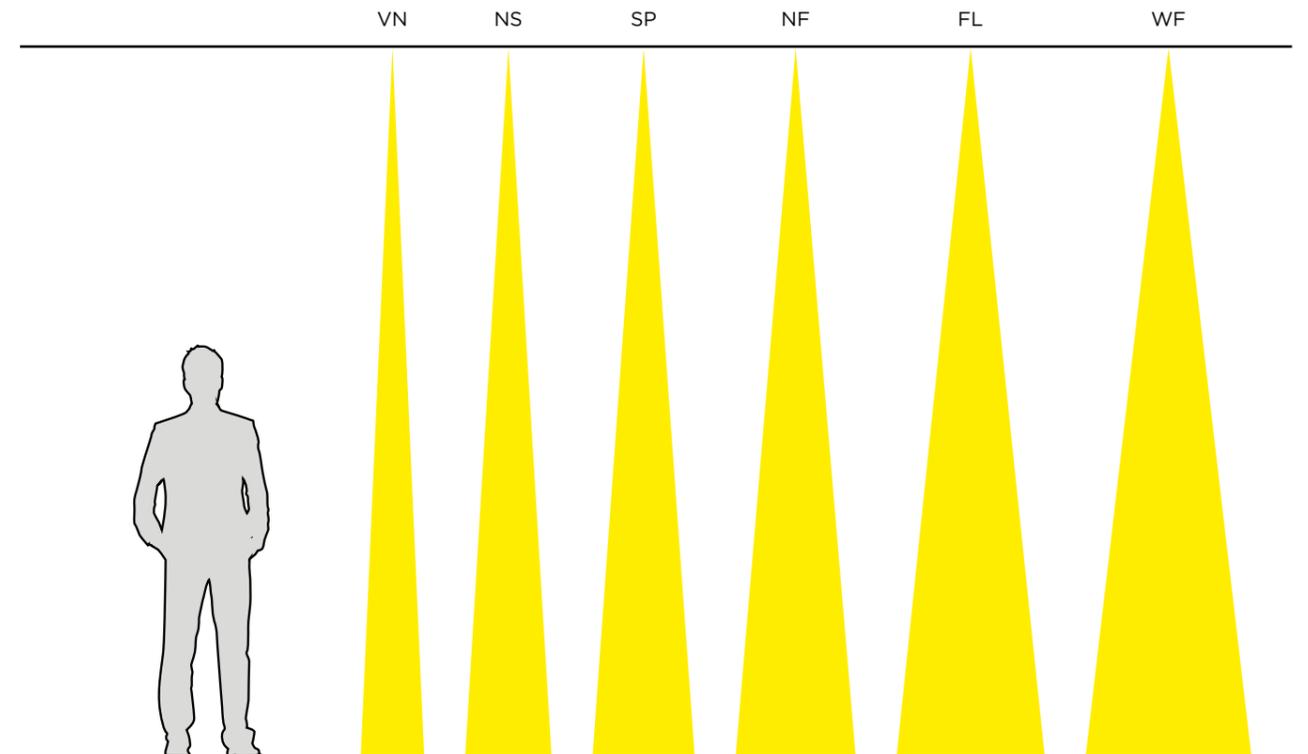

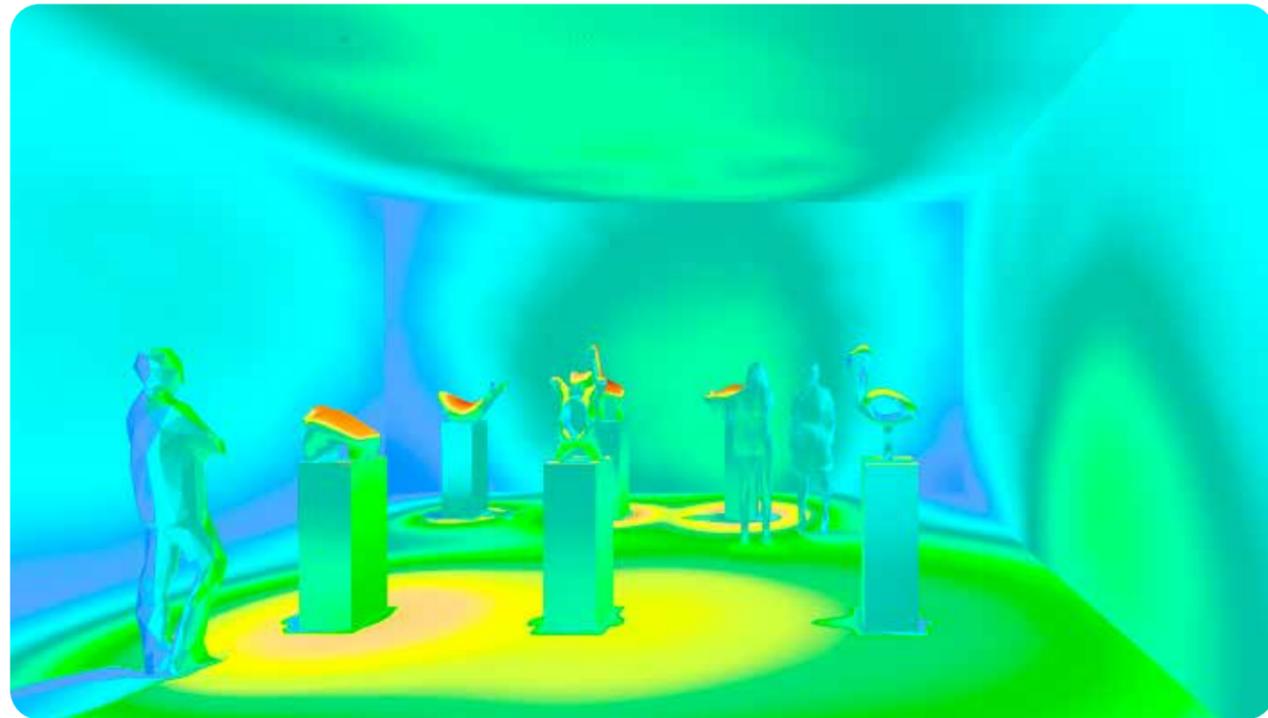

Derived from Lumenpulse technology, the multiple source LEDs are available on the Radius series and offer the possibility of combining a variety of very high precision beams with the dynamic management of white LEDs and colour RGB, further complementing the width and depth of the optical instruments available to Exenia.

Accent Light Revo optics

An example of the use of **Revo** lenses in which the relationship between lux on the subject, power of the product, beam precision and last but not least the size of the product itself is highlighted.

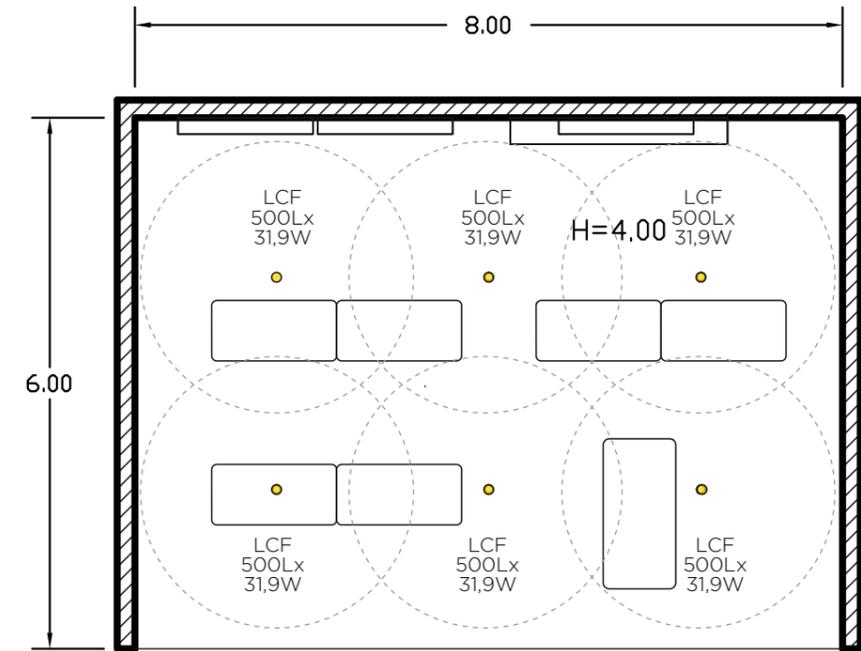

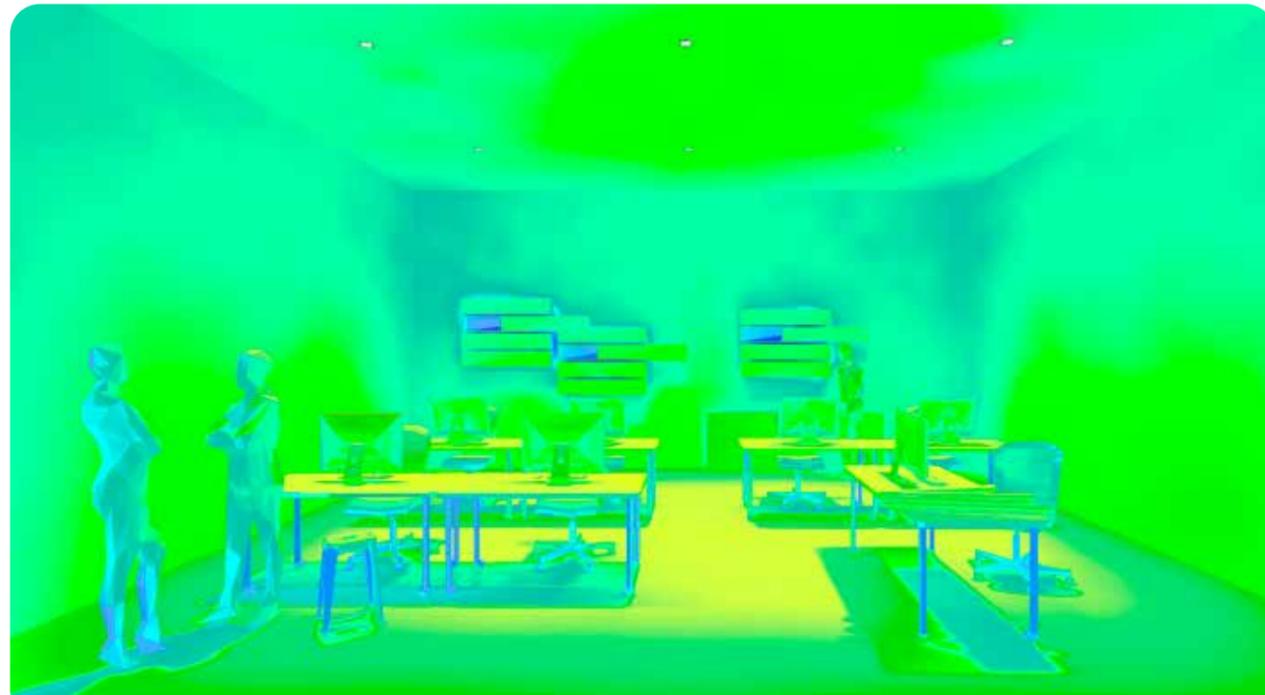

N°6 DARK Small Tilt
optics: VN - NS - SP - NF - FL - WF

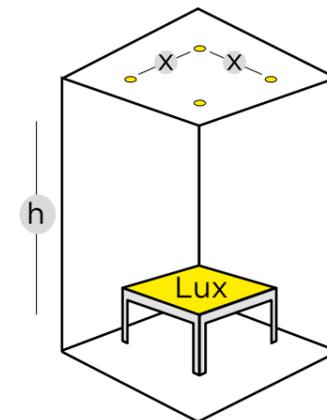

General Light Low Contrast optics

An example of the use of **rotosymmetrical Low Contrast optics**, determined using a basic matrix in which the relationships between the obtained uniformity, number of products, and power used is in perfect harmony with each other.

SMART FUTURE. NEW TRENDS & NEW DEVICES_

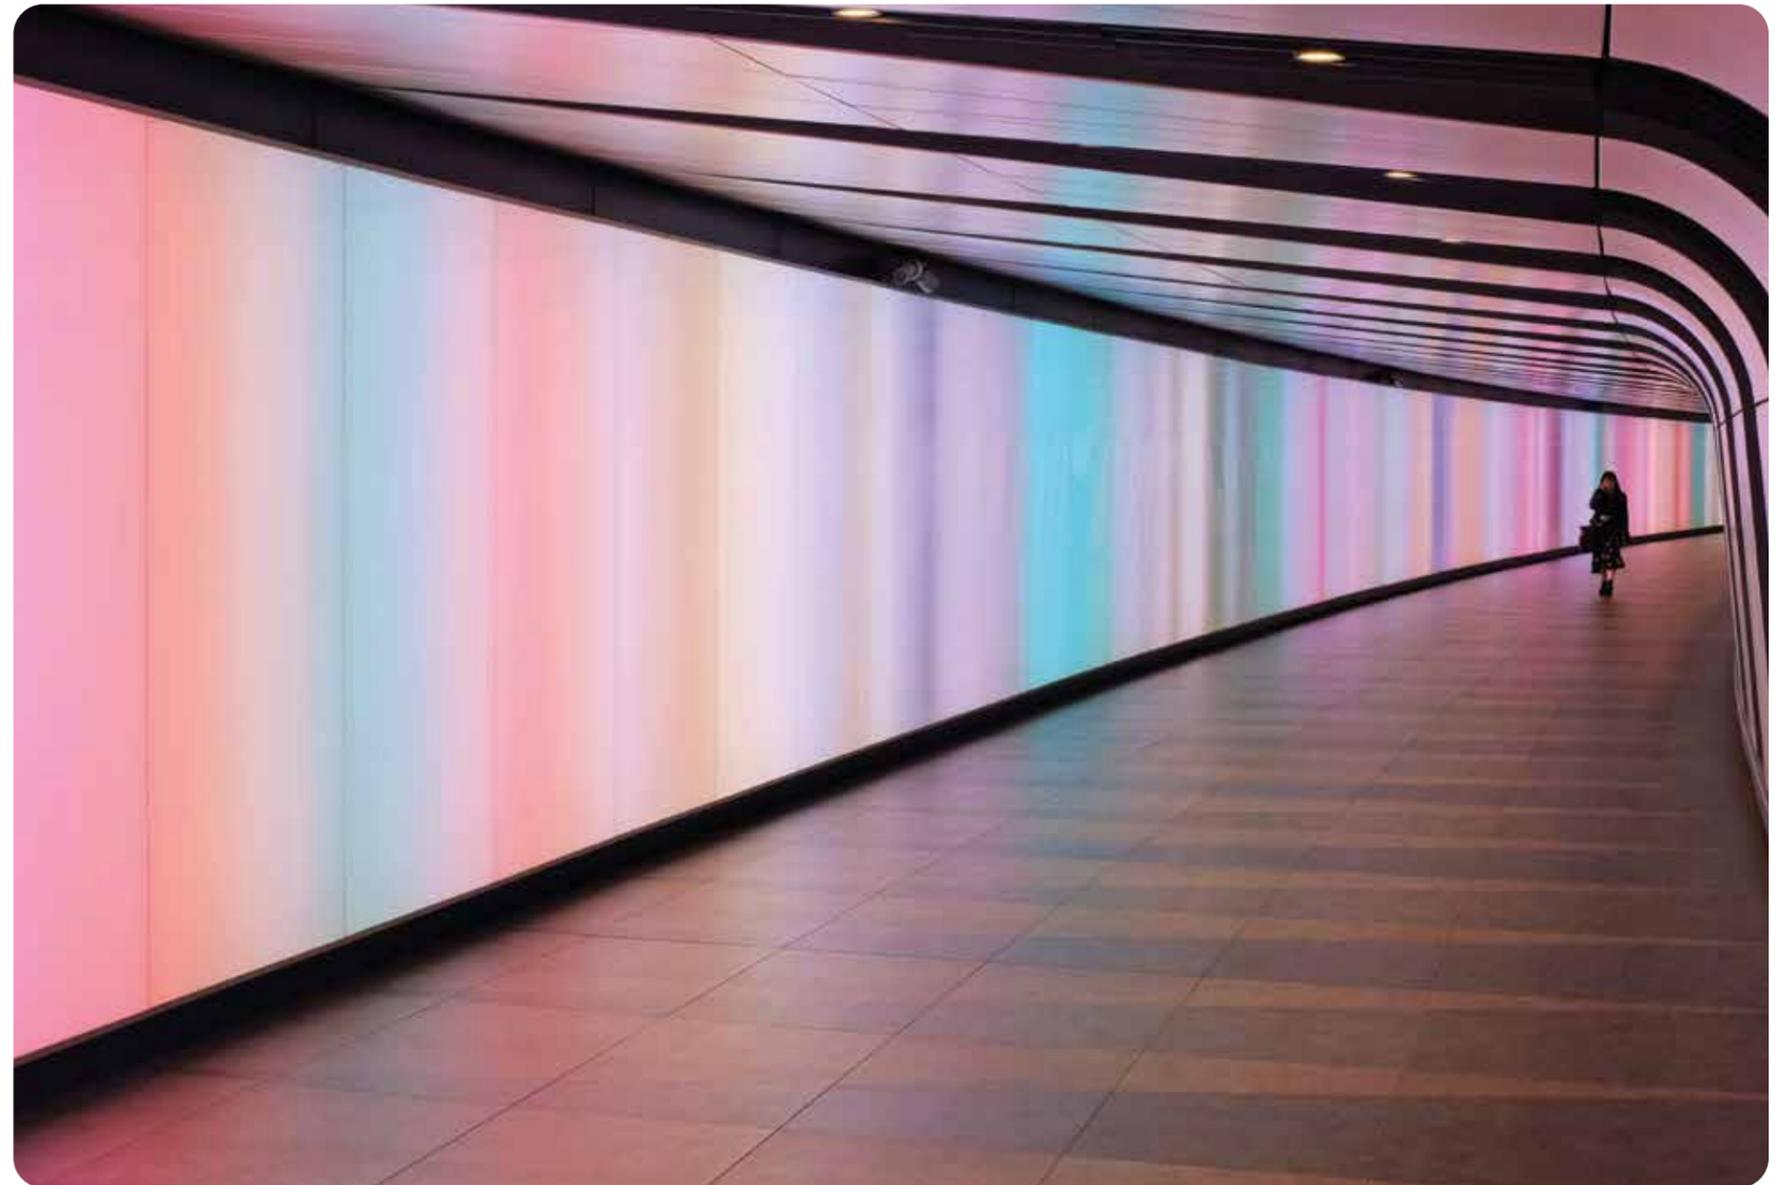

In recent years, LED light control systems have made great strides and are now an excellent solution for saving energy, creating atmosphere or simply controlling and adjusting light according to circumstances. However, it is not easy to find the right product among the many proposals that are available on the market. On the contrary, there is a risk of adding an extra complicating factor to the projects.

It is our real objective to equip our fixtures with LED technology control systems with the following feature:

- **easy to use for a lean and smooth balance of direct light;**
- **innovative, developed according to the most advanced technologies;**
- **flexible, to adapt to the requirements of complex projects.**

In addition to the traditional Phase Cut and Push control solutions for fixtures operating at 230V and 1-10V dimming, Exenia offers innovative digital and wireless control systems:

- **DALI, digital control to control up to 64 fixtures simultaneously;**
- **Bluetooth[®], a state-of-the-art wireless control Smart phone App;**
- **Lumentalk[™], an exclusive Lumen pulse's patent to control lighting systems through the power supply line with DALI, 1-10V or DMX input signal;**

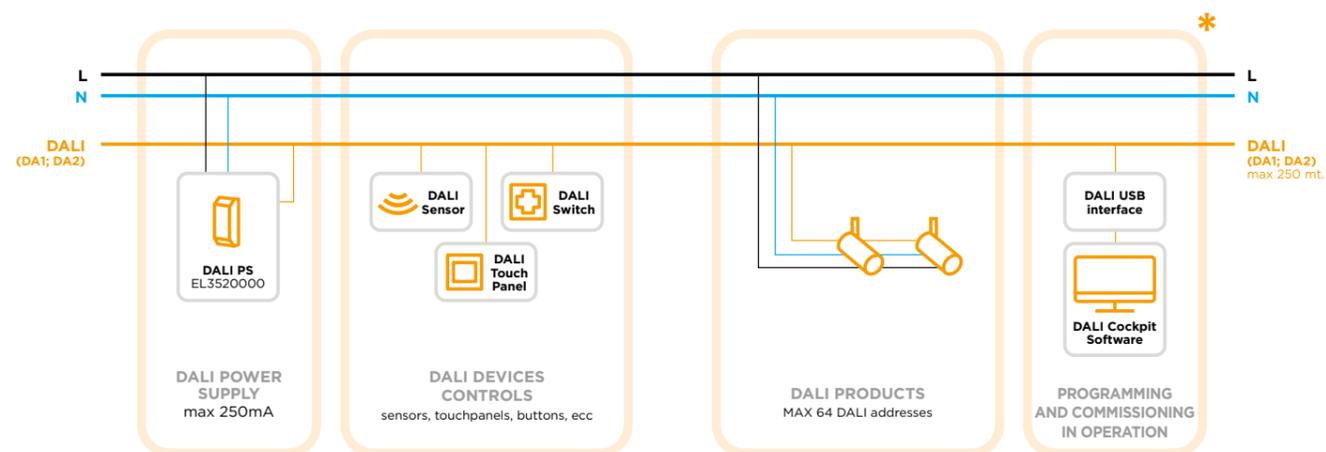

DIGITAL CONTROL DALI _

The Digital Addressable Lighting Interface (DALI) is a control protocol with which luminaires equipped with DALI control gear can be controlled individually.

The two-wire command line has a transmission speed of 1.2 Kbit/sec. It is laid together with the mains connection cables using a 5-pole cable.

The bidirectional system allows feedback from the luminaires to be sent, for example to signal a lamp failure. The DALI protocol has a maximum limit of 64 fixtures.

In the standard version, it is possible to control up to 16 luminaire groups and as many as 16 light scenes can be saved on the control unit.

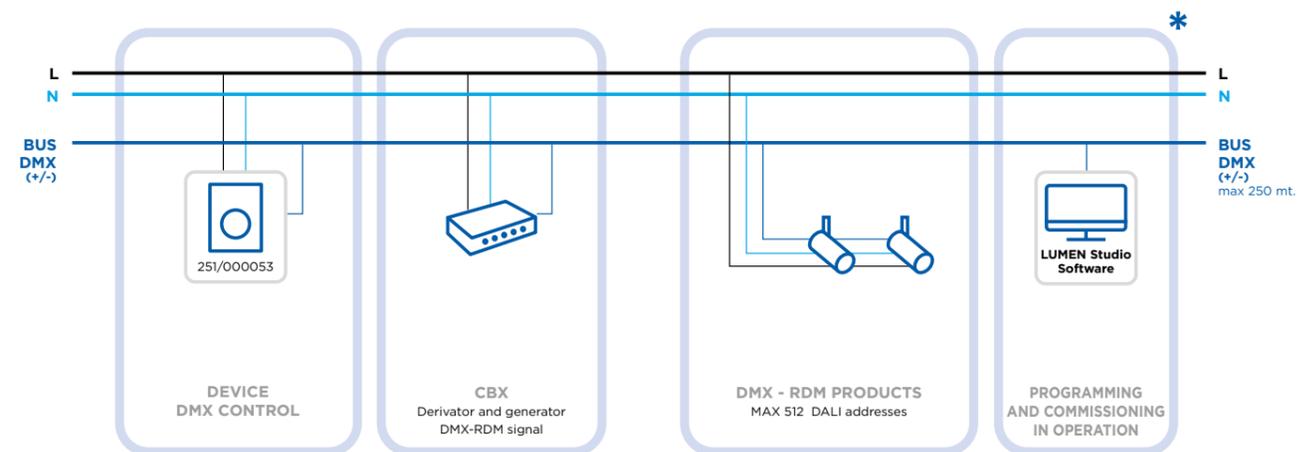

DMX-RDM _

The digital control protocol DMX (Digital Multiplexed) is mainly used for stage lighting. In architectural lighting, the protocol is primarily used for facades or for the creation of scenography effects in rooms.

Data transmission takes place with a separate 5-pole cable with a transmission speed of 250 Kbit/sec; with which up to 512 channels can be controlled.

For multi-channel luminaires with colour control and adjustable mobility, the different functions must be managed with separate addresses.

The DMX - RDM version allows bidirectional communication.

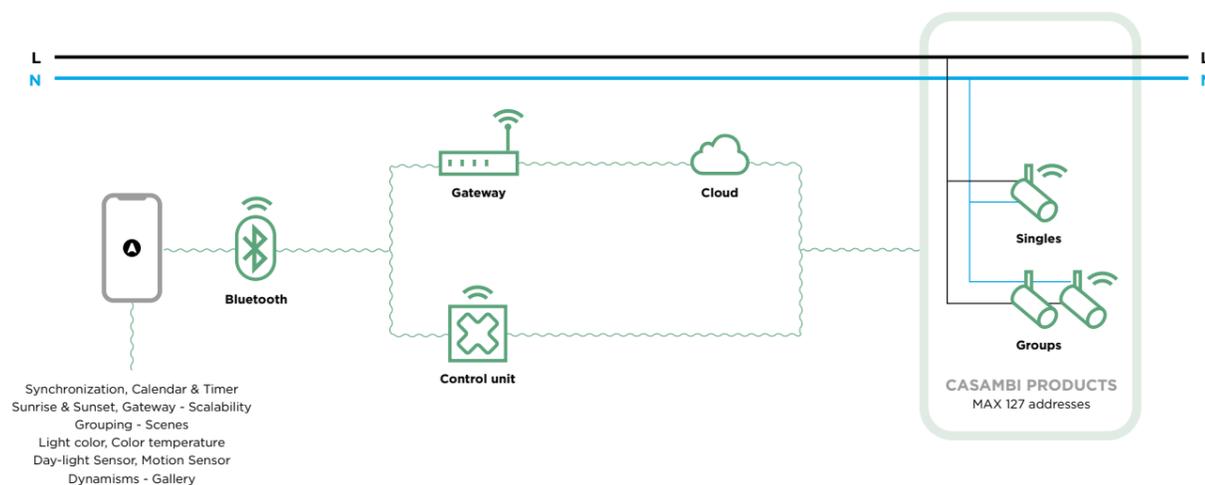

CASAMBI _

The luminaires are controlled via wireless or Bluetooth, from a smartphone or tablet, without the need for other hardware.

For Casambi on board appliances. The Exenia home automation system allows you to manage a lighting system wirelessly. Designed for both the consumer and professional markets.

Born from the union between Casambi Technology, a leading company in wireless light control solutions, and Exenia lighting fixtures.

The system is completed with specially designed components that allow wireless control of several devices.

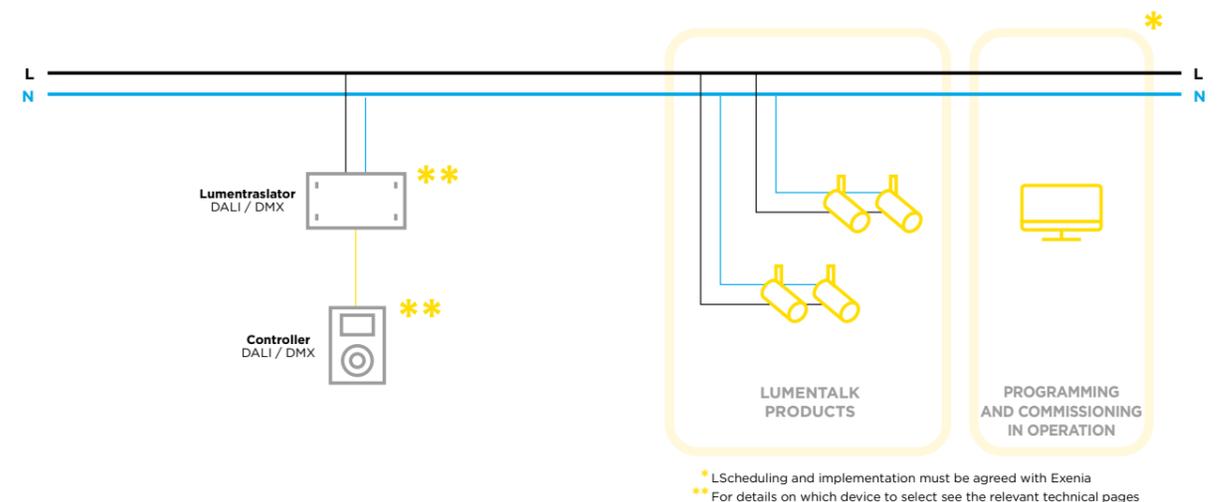

lumentalk™

Having a digital light management system has never been easier. Lumentalk leverages existing electrical connections to create innovative DMX, DALI, 1-10V control networks without the need for expensive re-wiring costs. There are no constraints or application boundaries other than those defined by the designer's creativity alone.

No additional wiring is necessary for this system which is a truly precious alternative for projects where due to building constraints it is not possible to realise new electrical systems. This is particularly important on cultural and heritage sites such as ecclesiastical buildings, museums, and galleries etc.

With the electrical network already present and the new LUMENTALK system installed, the entire line of luminaires thus becomes a precious vehicle of digital information capable of communicating light and its behaviour via control devices of your choice.

* Scheduling and implementation must be agreed with Exenia
** For details on which device to select see the relevant technical pages

ACCESSORIES: THE SHAPERS AND THE ADJUSTABLE ZOOMS_

Shaper:

Thanks to the Exenia Roll-off device, it is possible to enhance and highlight the details of every lighting project. The sharp and clear contours create a real frame of light.

The light is shaped with the screw adjustment system of the fixture itself. Its long stroke allows you to find the right focus in every condition.

The special adjustment fins also allow controlled effects to be obtained even when the light source is not aligned with the object to be framed. Versatility and professionalism make this tool an ideal accessory for high level applications.

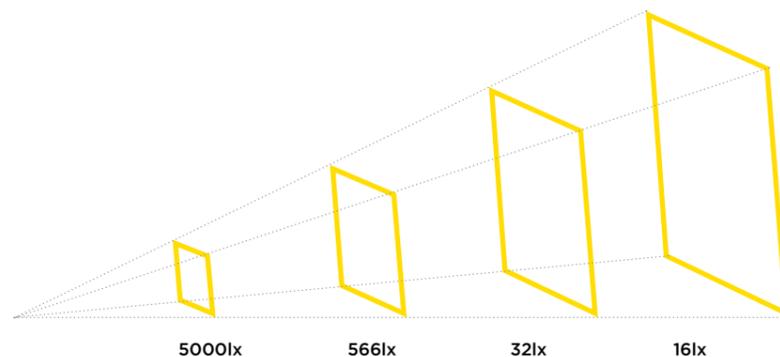

The following values refer to a nominal device starting flow 5000 lm approx.

Distance fixture-wall: 1m Illuminated square side 45 cm - Medium illumination 5000lx.

Distance fixture-wall: 3m Illuminated square side 135 cm - Medium illumination 566lx.

Distance fixture-wall: 6m Illuminated square side 200 cm - Medium illumination 32lx.

Distance fixture-wall: 8.5m Illuminated square side 3m - Medium illumination 16lx.

Optical Zoom:

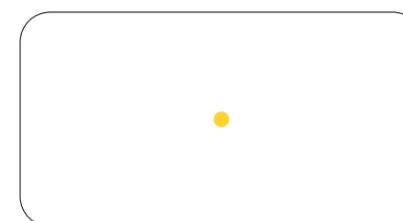

With our new Exenia optical zoom you can adapt any type of installation to your needs.

Thanks to the adjustable beam, it is possible to obtain infinite diameters between 9° to 26° and ensure maximum versatility for any type of use.

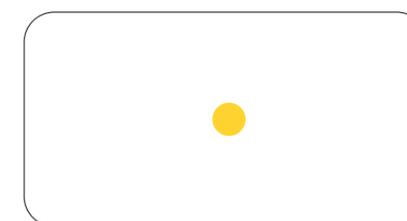

The operation is simple, just rotate the lens by acting directly on the accessory, thus adapting the lighting to new needs that can be created in the illuminated place, where the arrangement of the objects to be illuminated changes cyclically.

Moreover, thanks to its simple construction, this accessory can also be used in non-professional contexts, such as domestic ones.

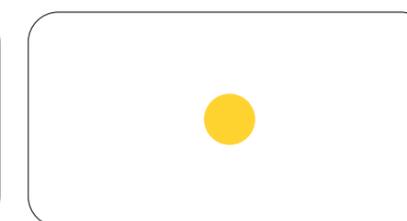

The following values refer to a nominal device starting flow of 5000 lm approx.

Distance fixture-wall: 2m
Narrow adjustment (approx. 9°)
Illuminated diameter 30 cm max
illumination in the centre 2500lx.

Distance fixture-wall: 2m
Medium adjustment (approx. 17°)
Illuminated diameter 60 cm max
illumination in the centre 1900lx.

Distance fixture-wall: 2m
Narrow adjustment (approx. 26°)
Illuminated diameter 90 cm max
illumination in the centre 1000lx.

TAILORED COLOURS AND FINISH:

A distinctive feature of the Exenia collections is the colour that is totally natural, with almost thirty finishes available in our catalogue and many opportunities for customization.

Our advanced in-house painting system produces extra-glossy, matte and texturized finishes with many innovative colours and finishes.

A deep knowledge of production processes, the use of eco-sustainable materials, pressurized paint booths and our artisan know-how allow us to make any tailored finish.

It is possible to reproduce any shade through the measurement of colour with a spectrophotometer starting from any material - liquids, paper, metals, plastics - guaranteeing maximum uniformity, obtaining a spectral reflectance curve that represents the "fingerprint" of colour.

The Mini version offers beams from 8° to 34° with numerous compendium accessories.

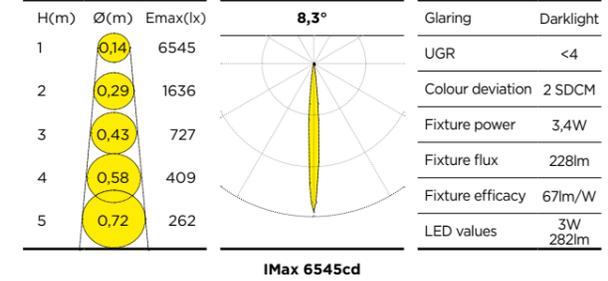

High color rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The full compatibility with the most common control systems make Museo Revo Mini the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

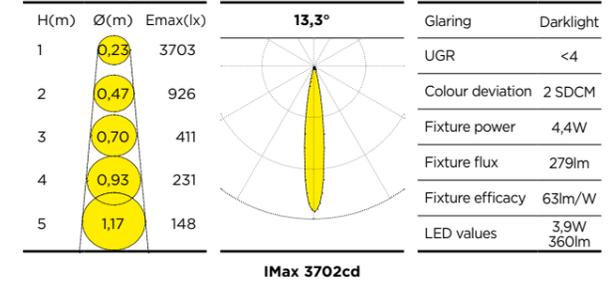

The multi-optic version allows the use of differentiated beams on the same luminaire in the operating variants Spot, Narrow Flood, Flood.

The multi-optic versions configured with unified beams are available in all variants of optics.

MUSEO REVO MINI accessories

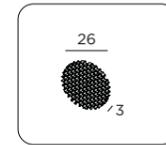

Snap-on accessory for the partial and directional reduction of the eventual glare. Can rotate of 360°. Replaces the ring supplied as standard.

Elliptical secondary lens. This holographic film must be put onto the primary optic to transform the beam in a elliptical beam. Various ellipses can be obtained depending on the chosen combinations. The lens can be rotated. Replaces the ring supplied as standard.

Cylindrical accessory for the omnidirectional reduction of the eventual glare. Snap-on mounting. Replaces the ring supplied as standard.

Antiglare honeycomb element. It can be snapped on the rear side of the projector standard ring.

MUSEO REVO MEDIUM

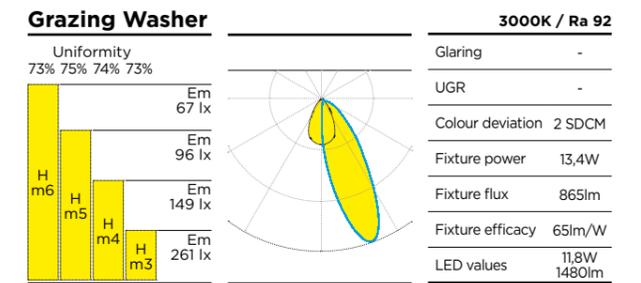

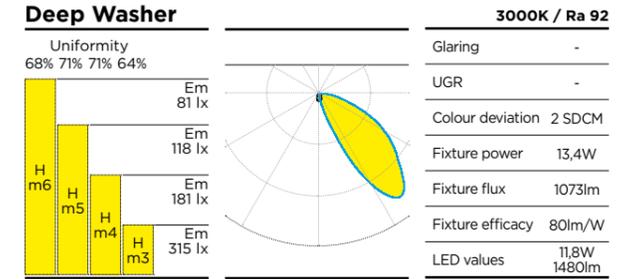

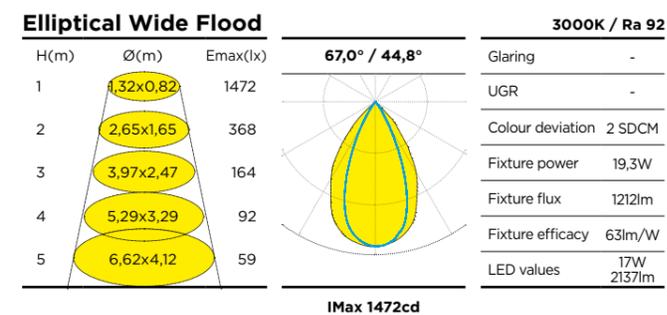

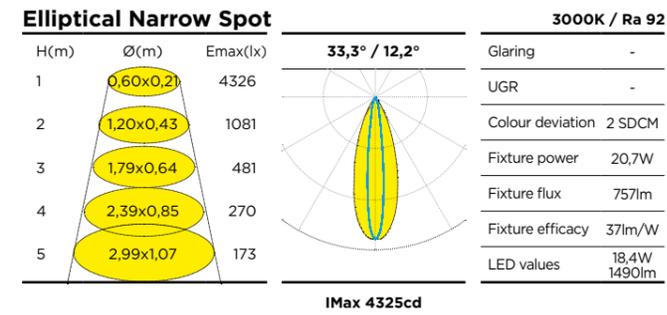

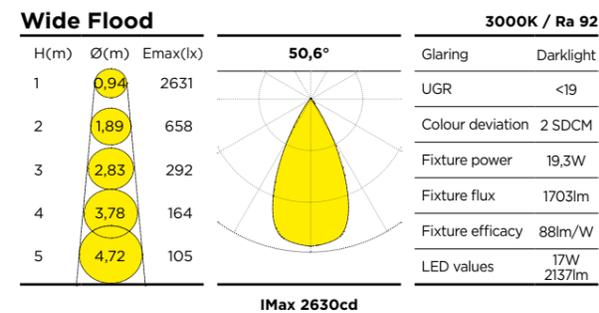

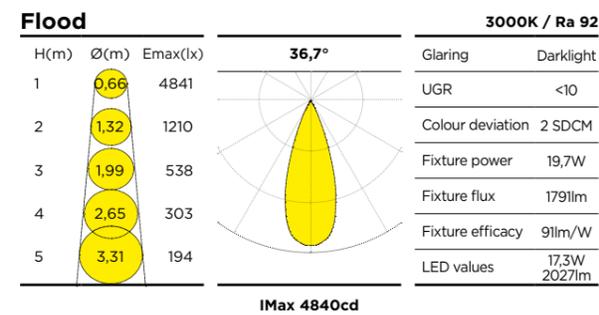

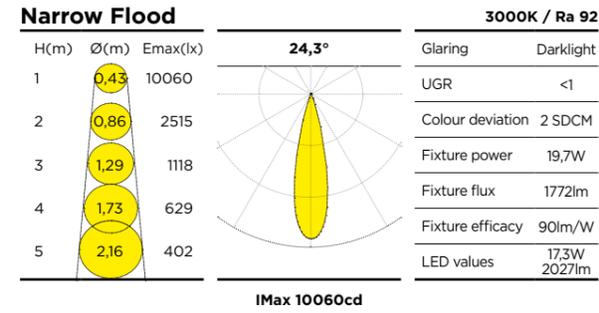

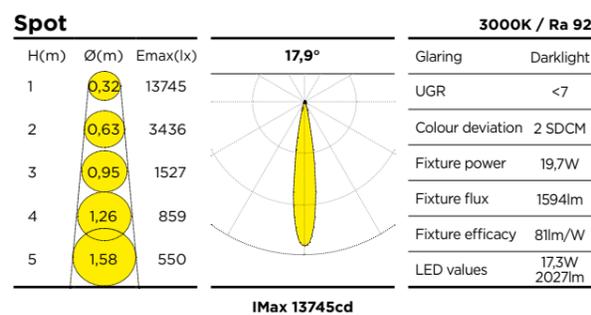

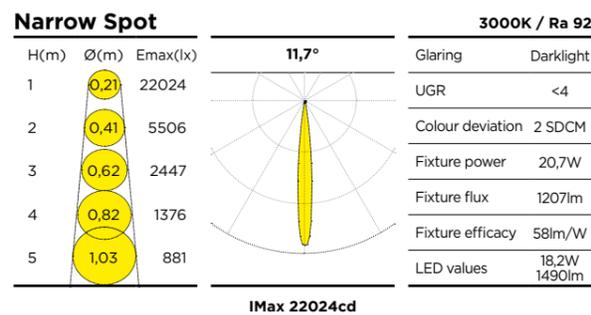

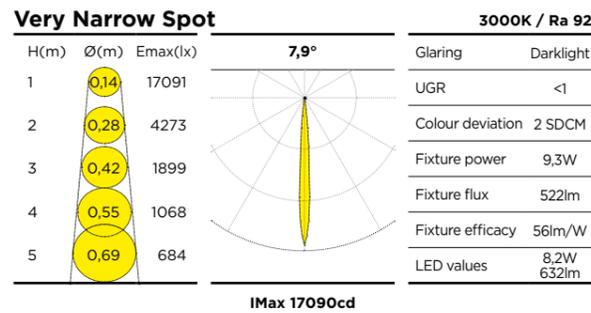

The Medium version offers beam widths from 8° to 50° two elliptical beams Elliptical Narrow and Elliptical Wide a shaper and the refined asymmetrical wall-washer DWW with high homogeneity.

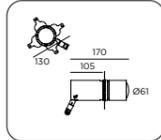

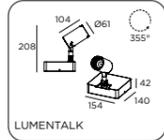

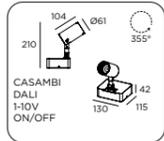

The numerous accessories in the range are designed with a fastening system with overlapping elements allowing a differentiated and specific optical configuration. High color rendering, UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The overall aluminum body uses new frictioned brass arms, equipped with micrometric locking for easy and definitive aiming.

Full compatibility with the most common control systems make Museo Revo Medium the perfect tool in contexts where the value of the source is determined by a very high performance quality and by minimal physical and visual intrusiveness.

Each accessory or accessory group requires only one primary ferrule for installation on the optical compartment. Always necessary for mounting one or more accessories on top of each othe.

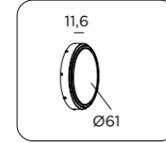

MUSEO REVO MEDIUM accessories

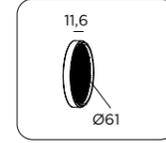

Partial rotatable glare control, necessary to shield any directional glare. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

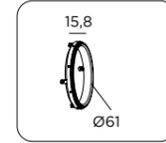

Omnidirectional glare reducer, to assist in shielding any radial glare disturbances. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

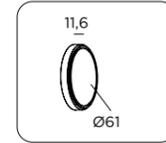

Rotatable lens to obtain the elliptical deformation of the beam, amplitude and variable characteristics depending on the chosen optical combination. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

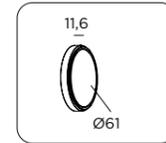

Honeycomb lens, necessary to shield any radial disturbances. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Primary ring that allows the housing of any accessory, to be fixed on the front of the standard ring. A primary ring is always necessary for fixing one or more overlapping accessories.

Specific lens to obtain a more diffused projection. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Additional shielding useful to prevent the accumulation of dust and residues in the optical compartment when the luminaire is used for indirect applications.

MUSEO RADIUS BASE

MUSEO RADIUS BASE

The new Base Mount option is designed to be mounted in nooks and crannies so prevalent on historic structures. It calls small cornices and shallow alcoves home. The mounting arm has two points of adjustment to light precisely what you need lit.

The Museo Radius is an adept accomplice in the art of accenting. Excellent for emboldening decor and architectural features from a great height, the Museo Radius has the performance, quality of light, and optic options needed to bring out the details of epic spaces.

The Museo Radius family can be recessed into a ceiling, mounted on a track, or base-mounted on shallow lintels and cornices. This gives lighting designers the flexibility needed to respect the architecture of essential structures while providing the general lighting essential to keeping a space safe and attractive to visitors.

MUSEO RADIUS BASE Accessories

Visor

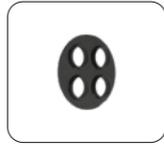

Secondary Louvre tool. Partial shielding shape, with external rapid-click system.

Secondary Louvre - Small

Twist and lock module, internal positioning for incrementable anti-glare.

Snoot

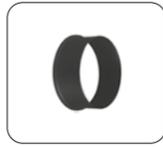

Omnidirectional fractional collar, anti-glare system. External insertion with quick-click system.

Linear spread lens Spot

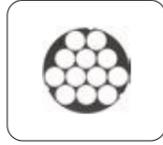

Elliptical beam rotatable lens, with quick snap insertion.

Snoot

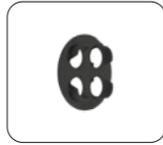

Secondary Louvre tool. Circular shielding shape, with external rapid-click system.

Secondary Louvre - Medium

Twist and lock module, internal positioning for incrementable anti-glare.

Multivisor

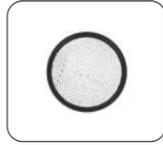

Directional fractional collar anti-glare system. External insertion with quick-click system.

Linear spread lens Flood

Elliptical beam rotatable lens, with quick snap insertion.

Honeycomb louvre

Honeycomb anti-glare module. Quick-snap external insertion.

MUSEO MINI

Jointed mobile head_
high efficiency COB LED source_

Mini LED Projector with a single, adjustable spot.
Manufactured from diecast aluminium and sheet metal base.
Finishes include matt white, matt black and concrete grey.
355° horizontal and +/-100° vertical adjustment.
Each fixture needs to be completed with a mirror-painted polycarbonate reflective optic including decorative ring.
Available beam angles include Medium, Large and Wide.
The decorative ring is available in nine finish options.
Accessories include narrow optics attachment, honeycomb louvre and satin diffuser.
Ingress protection of IP20.

MUSEO MINI Accessories

With the Narrow optic it is possible to obtain a 10° narrow beam. Optic assembly and its coloured ring should not be ordered with this accessory.

Optic Narrow

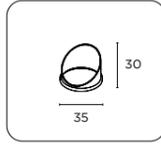

9Q 317 52

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a greater contrast between the illuminated and non illuminated area.

Cut-Off

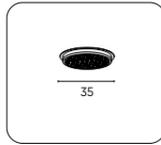

9G 049

Thanks to this accessory it is possible to obtain an asymmetrically narrower and sharper beam with a greater contrast between the illuminated and non-illuminated area.

Visor

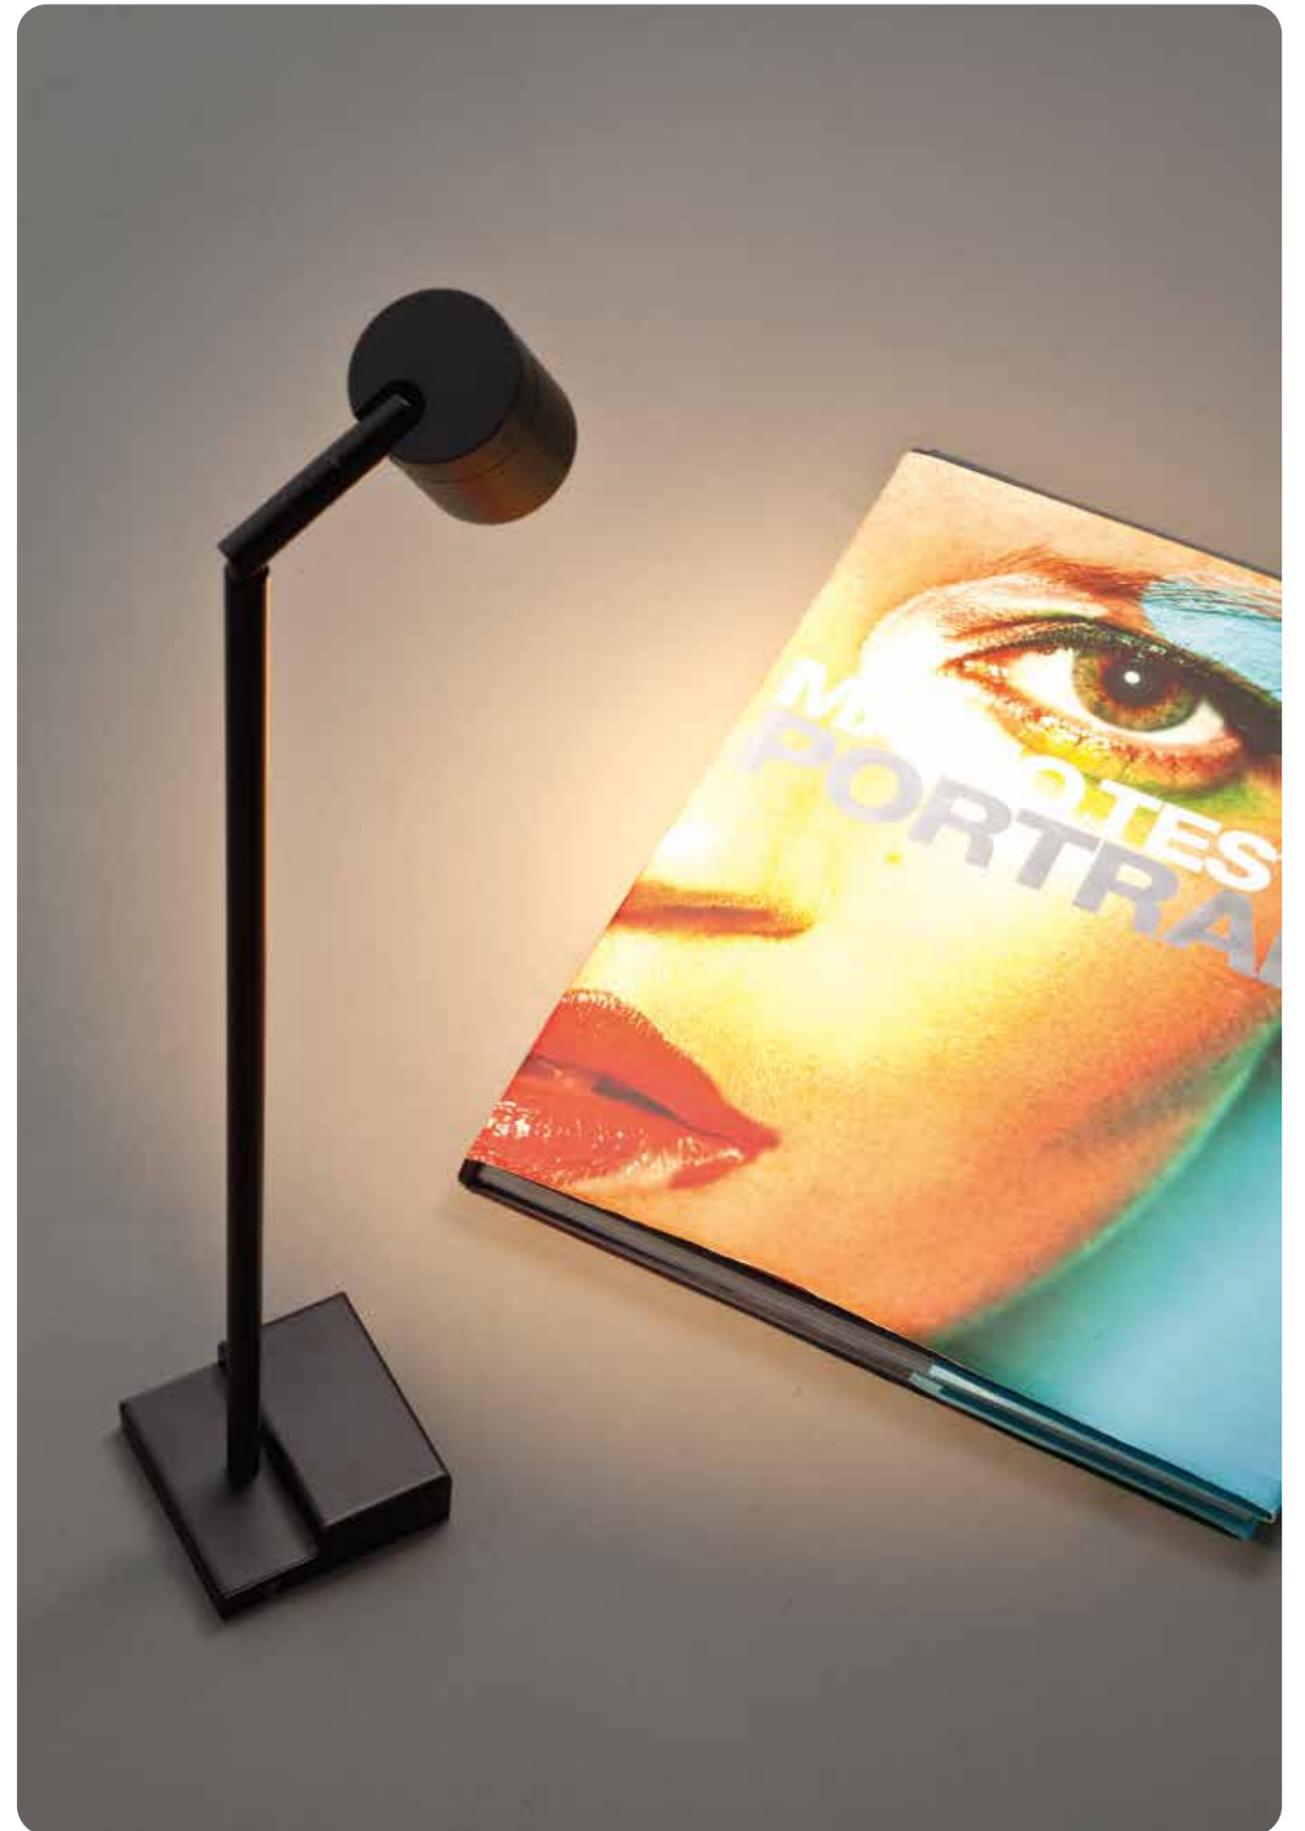

9G 048

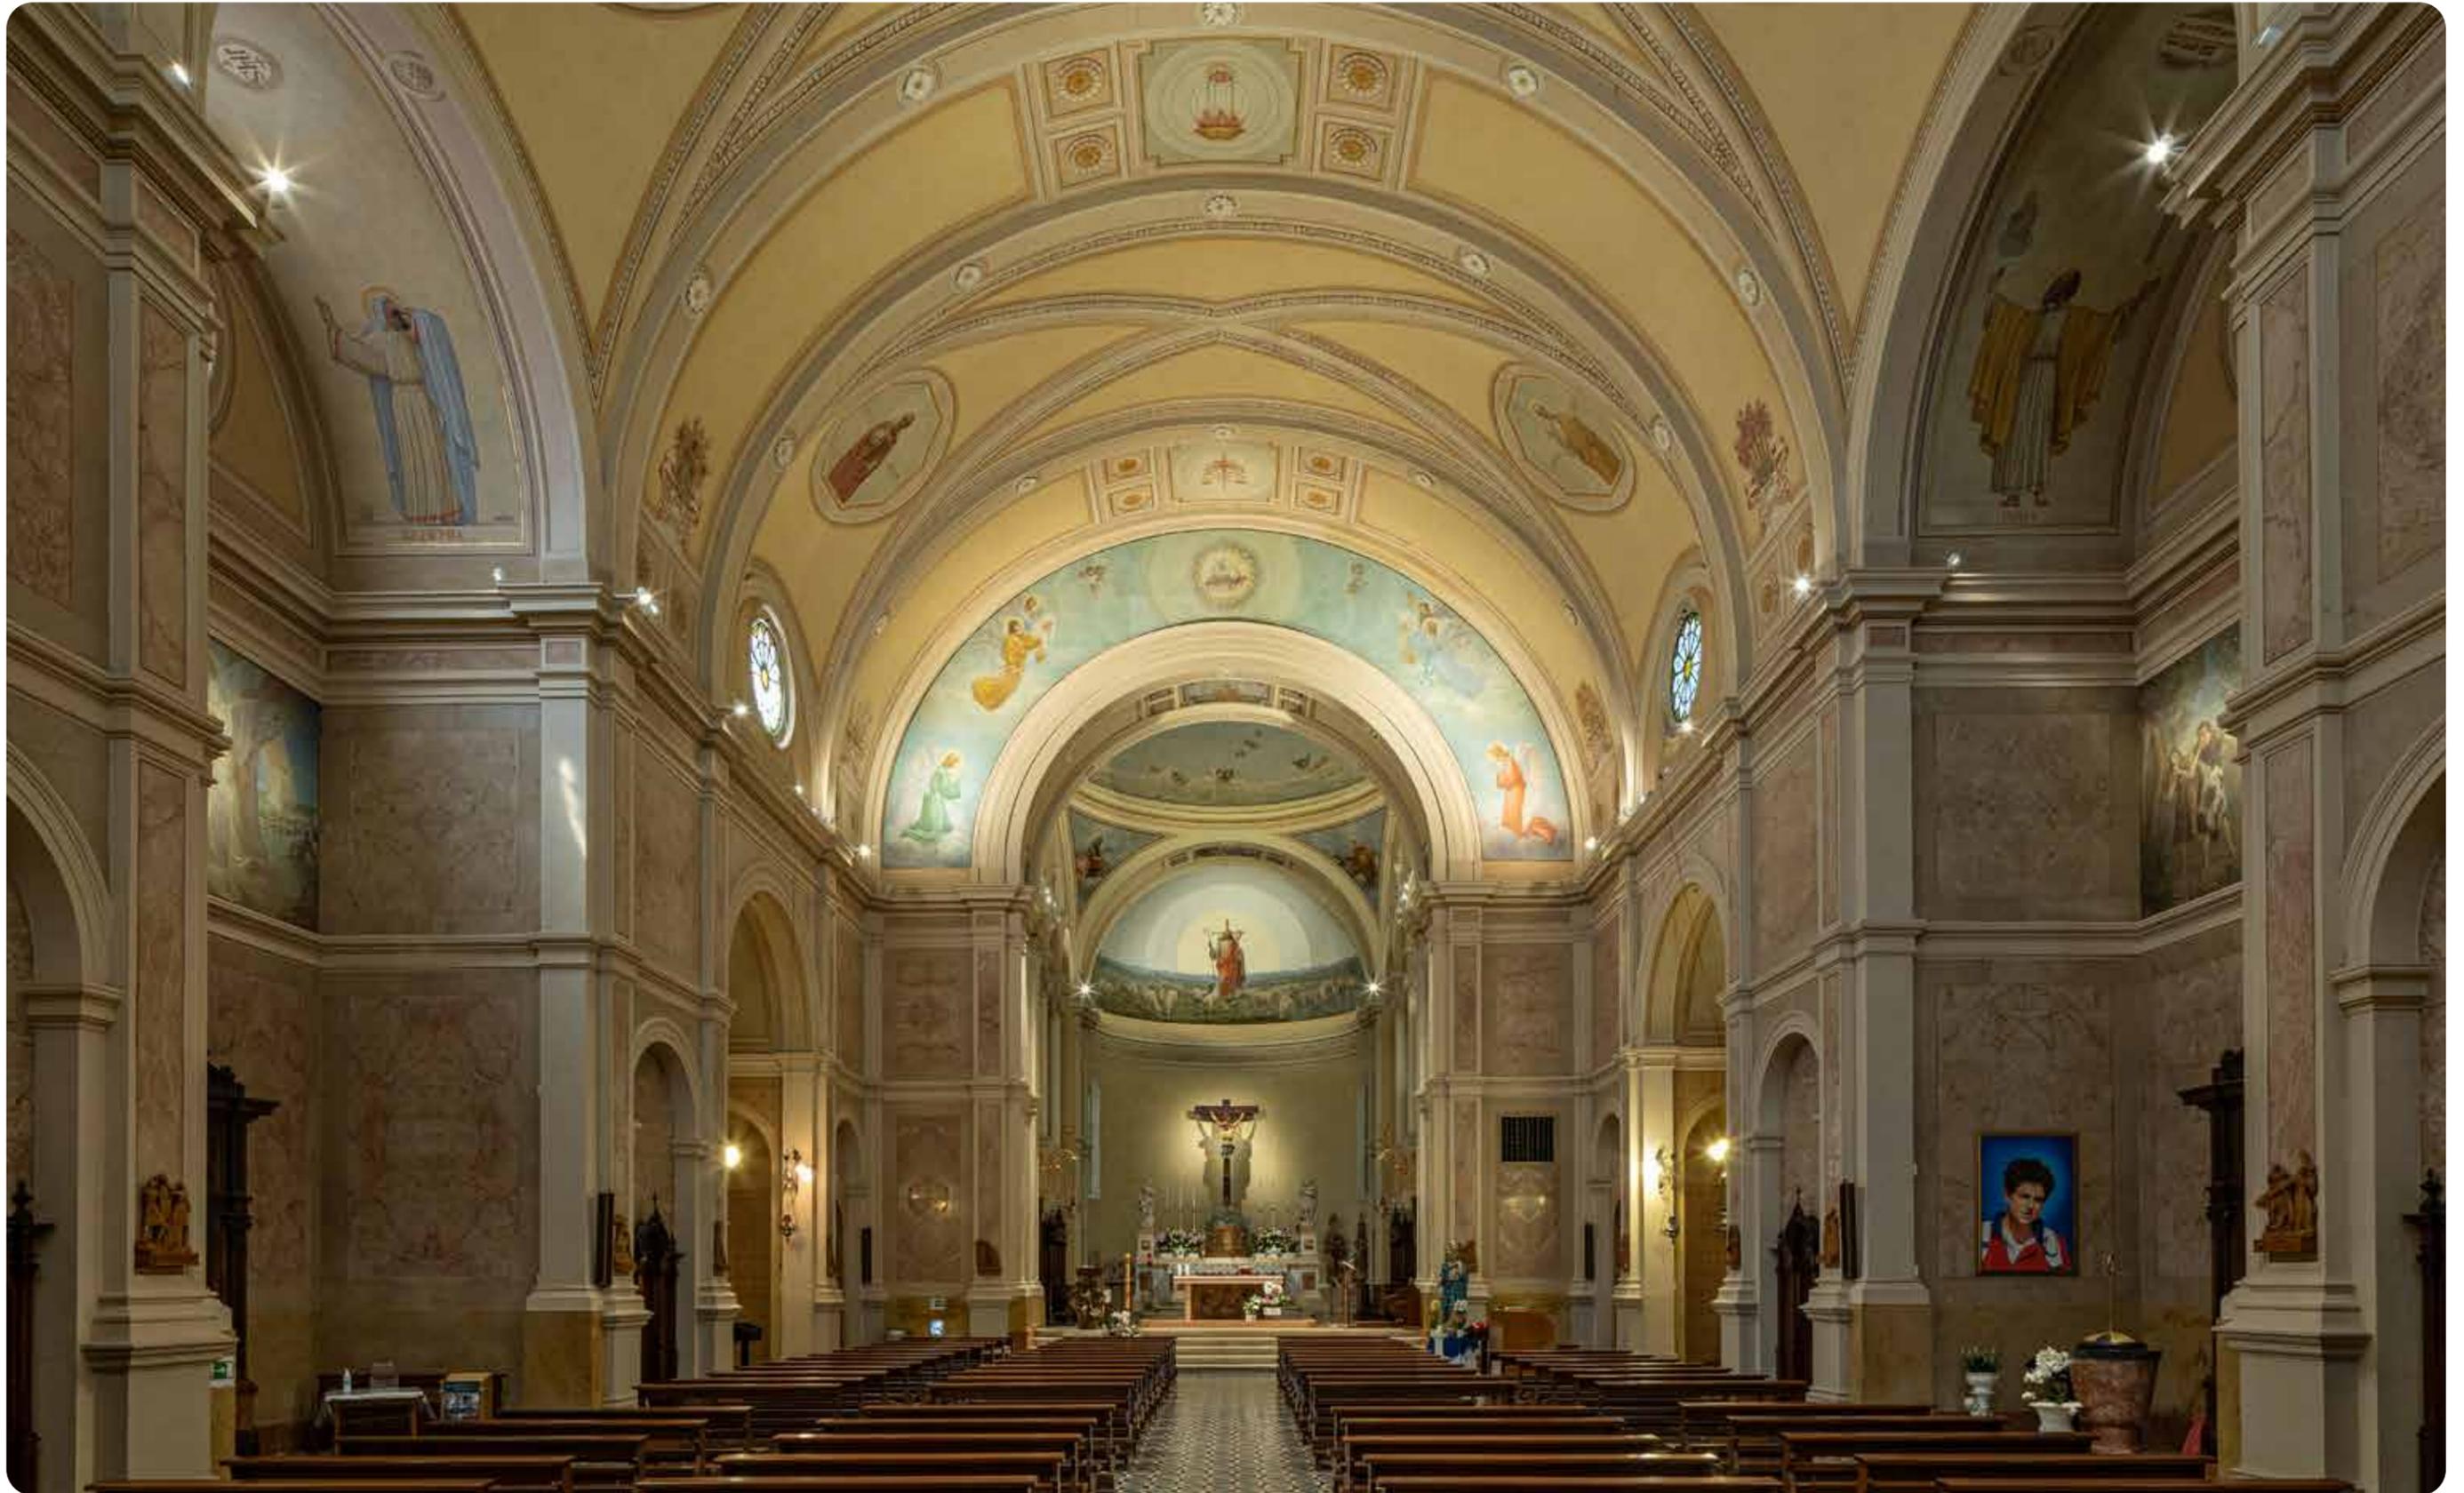

The honeycomb grid is an accessory used for the Secondary Louvre effect. It reduces the luminous flux by 20%.

Honeycomb louvre

9G 023

MUSEO SMALL

MUSEO SMALL

IP₂₀

Adjustable spotlight_
high efficiency COB LED source_

Adjustable twin-head LED Projector manufactured from die-cast aluminium and sheet metal base.

Fitted with galvanised fixing bracket for easy installation. Finishes include matt white, matt black and concrete grey. 355° horizontal and +/-100° vertical adjustment. Each fixture needs to be completed with a mirror-painted polycarbonate reflective optic including decorative ring. Available beam angles include Spot, Medium, and Large. The decorative ring is available in seven finish options.

Accessories include narrow optics attachment, honeycomb louvre and satin diffuser.

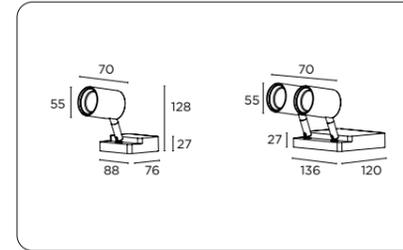

Ingress protection of IP20.

Adjustable spotlight - new look_
high efficiency COB LED source_

LED Projector manufactured from diecast aluminium. Fitted with galvanised fixing bracket. Finishes include matt white, matt black and concrete grey. 359° horizontal and +/-180° vertical adjustment with aiming lock system. Each fixture needs to be completed with a mirror-painted polycarbonate reflective optic including decorative ring. Available beam angles include Spot, Medium, and Large. The decorative ring is available in seven finish options. Accessories include narrow optics attachment, cut-off, honeycomb louvre and satin diffuser. IP20.

Direct/indirect and double switch_
high efficiency LED source_

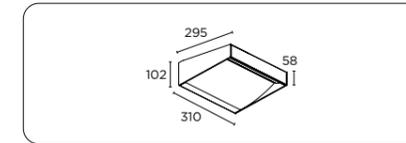

Direct/Indirect wall mounted LED luminaire manufactured from die-cast aluminium alloy 6060.

Fitted with opal polycarbonate diffuser for even light distribution.

Available in three textured, powder coating finish as matt white, matt black and concrete grey.

Three-piece anti-glare kit consisting of an adjustable deflector and two fixed deflectors that reduce the beam cut-off angles of the luminaire and microprismatic diffuser for the direct light source are also available as accessories.

To be completed with optic and ring_ high efficiency COB LED source_

Wall or ceiling mounted LED luminaire with COB and constant current electronic power supply integral to the fitting.

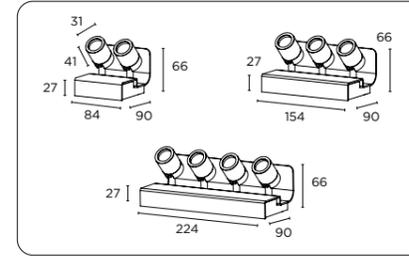

Proprietary joint allowing for 350° horizontal and +/-90° vertical adjustment.

The luminaire is manufactured from die-cast aluminium and fitted with a wall mounted metal support and wall fixing nylon plugs.

The luminaire is available in matt white, matt black and concrete grey. Optics in Medium and Large beam to be ordered separately. Optics come complete with a decorative ring that is available in nine liquid-coated finish options. Ingress protection of IP20.

PLURIEL MICRO accessories

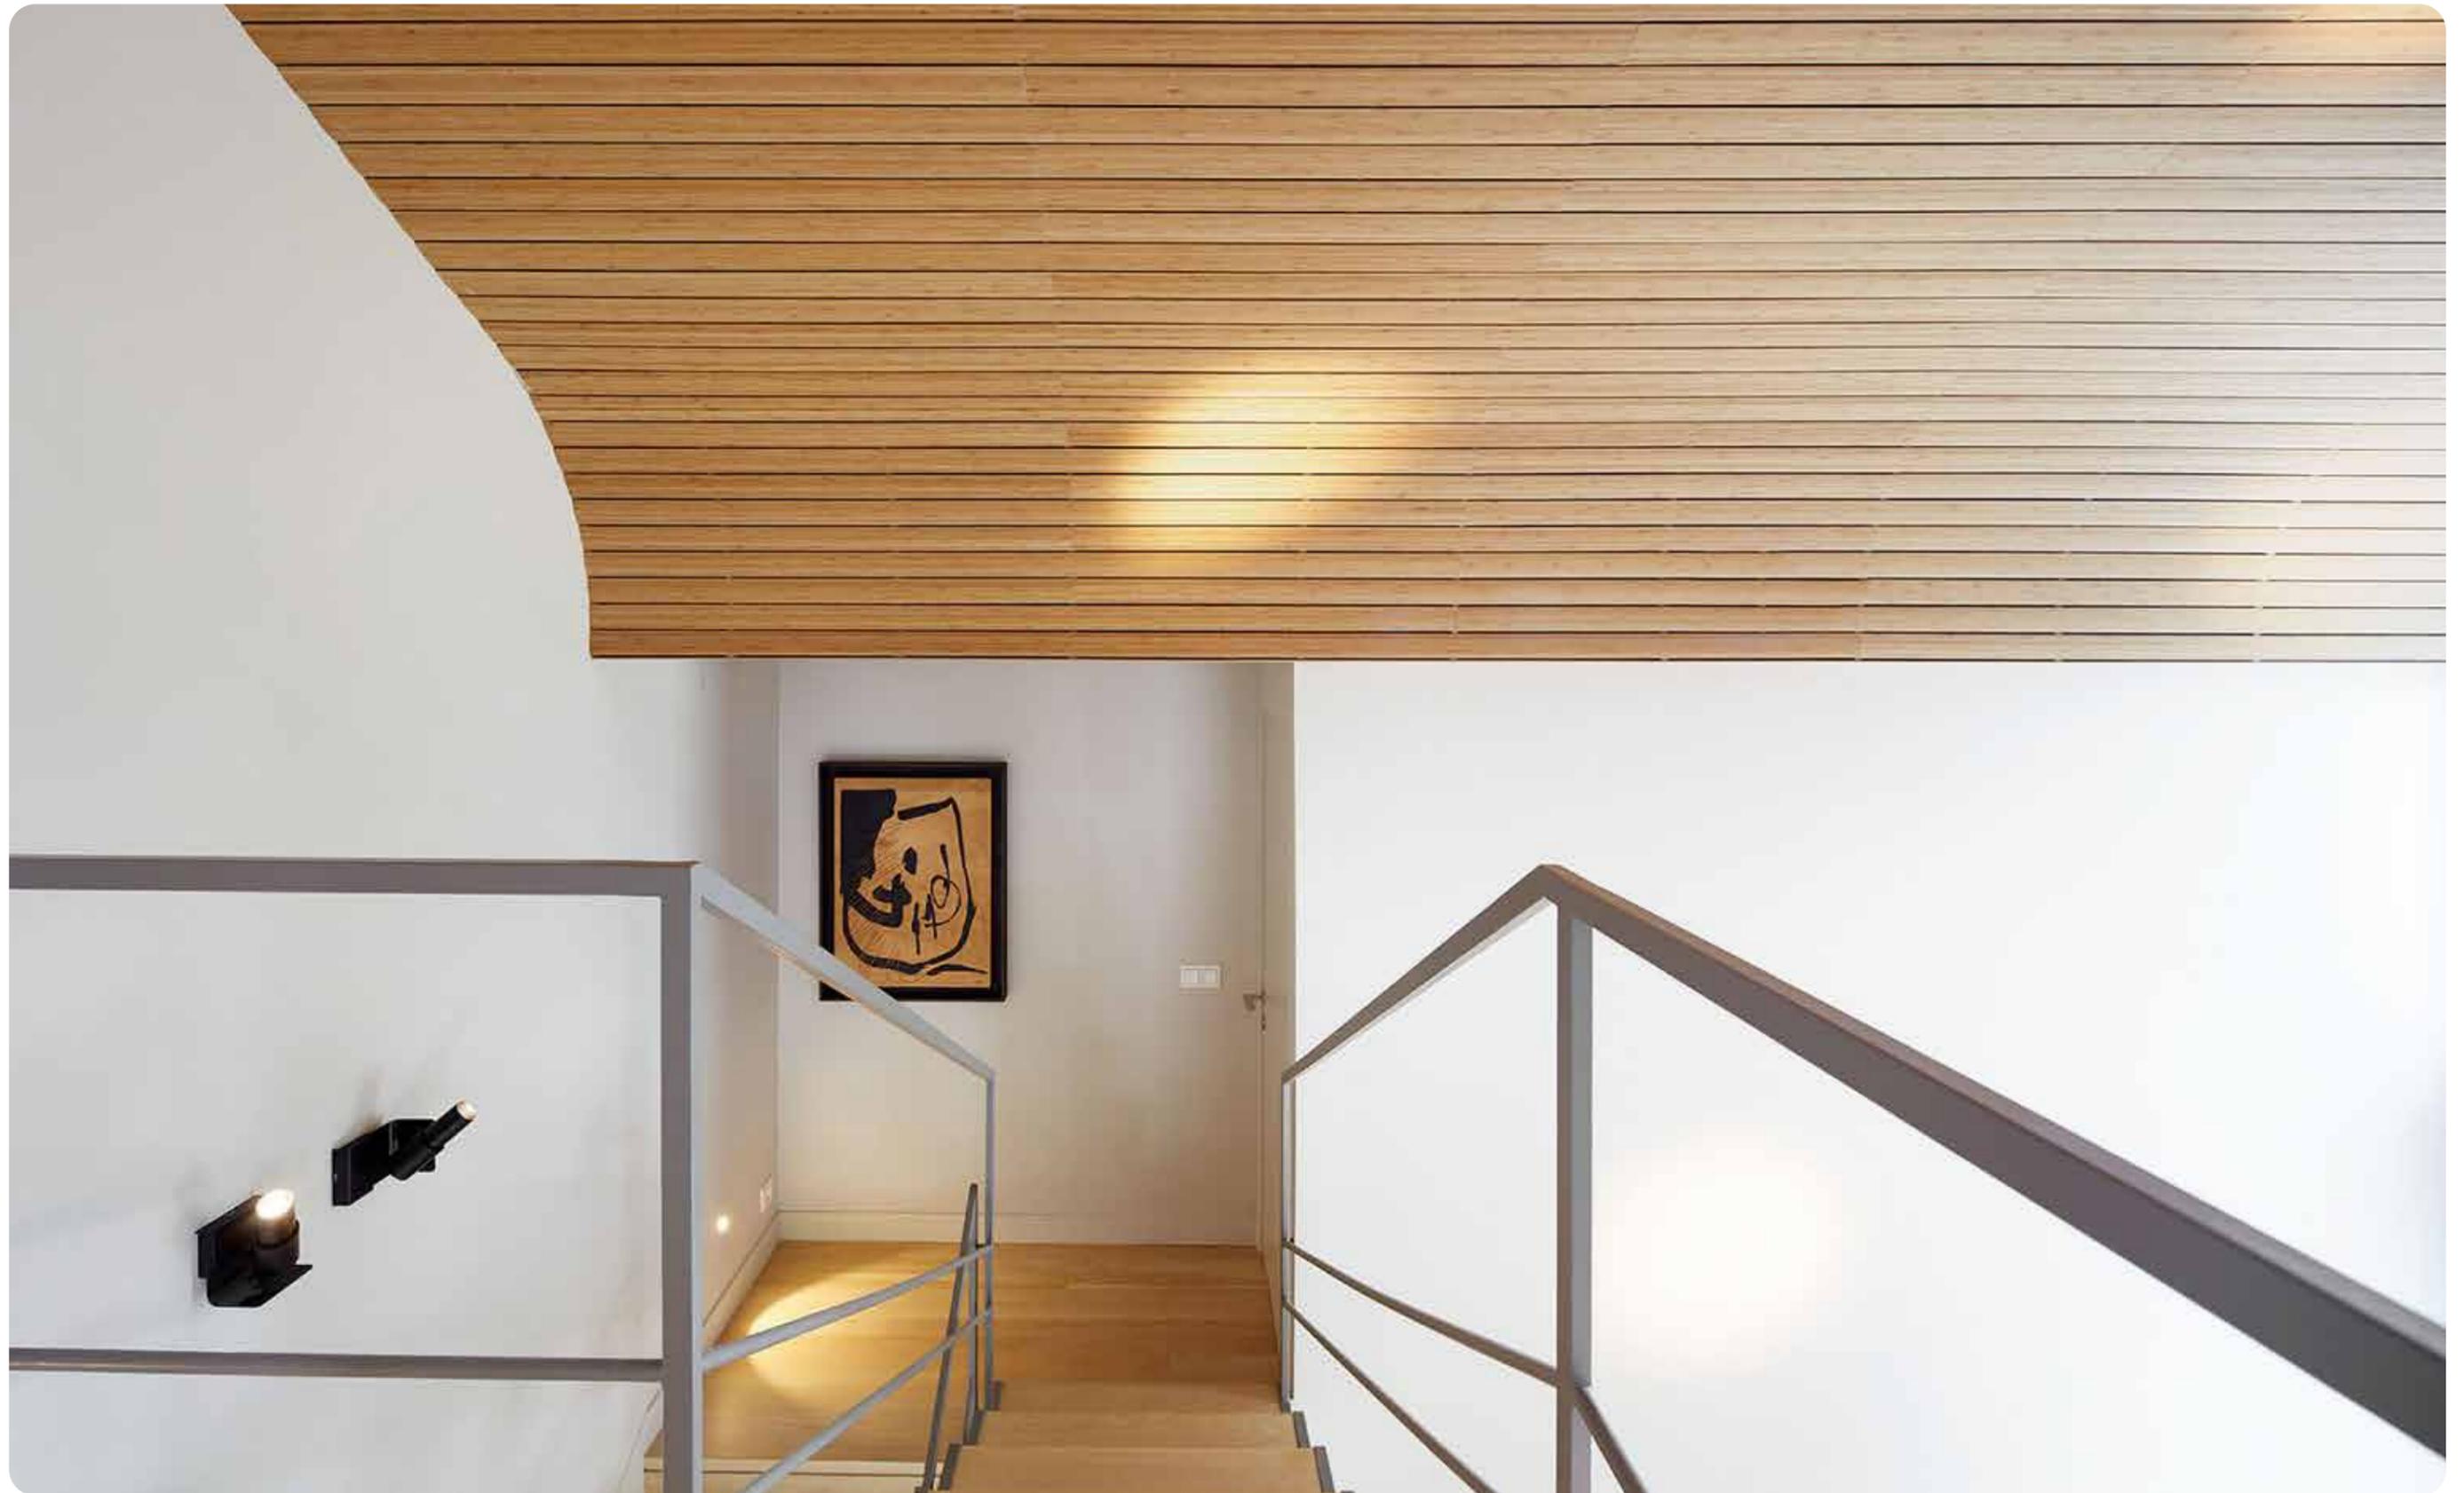

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a strong contrast between the illuminated and unlit area.

Cut-Off	
9G 031	

Thanks to this accessory it is possible to obtain an asymmetrically narrower and sharper beam with a greater contrast between the illuminated and non-illuminated area.

Visor	
9G 047	

To be completed with optic and ring_
high efficiency COB LED source_

LED wall or ceiling luminaire with three adjustable spotlights with proprietary joint allowing for 350° horizontal and +90°/-90° vertical adjustment.

The body is manufactured from die-cast aluminium alloy 6060 with heat dissipating function.
Wall fixings with nylon plugs. Optics available in Medium, Large and Wide.

Optics come complete with a decorative ring that is available in nine liquid-coated finish options. The luminaire is available in matt white, matt black and concrete grey.

Accessories include narrow optics, honeycomb louvre and satin diffuser. Ingress protection of IP20.

PLURIEL PLUS BAR

PLURIEL PLUS BAR

To be completed with optic and ring_
high efficiency COB LED source_

Four-head LED wall or ceiling mounted luminaire with an integrated constant-current driver.

LED sources are located in two completely independent luminaire heads using a proprietary joint that allows 360° horizontal and +90°/-90° vertical adjustment.

The body is manufactured from diecast aluminium alloy 6060 with heat dissipating function. Fitted with a wall mounted metal holder, liquid painted, and fixings with nylon plugs. Optics available in Spot, Medium and Large.

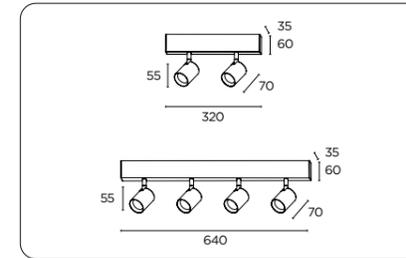

Decorative ring is available in seven liquid-coated finish options. The luminaire is available in matt white, matt black and concrete grey. Ingress protection of IP20.

Diffused 120° light distribution_
 dimmable via PHASE CUT_high efficiency LED source_

Wall mounted LED luminaire with diffused 120° light distribution manufactured from die-cast aluminium. Available in 4.5W (nominal emission 450lm) light source available in 2700K, 3000K or 4000K in CRI95.

Lumen maintenance of 50.000 hrs at L80B10. Ingress protection of IP65. Class I luminaire with integral ON-OFF power supply, dimmable via PHASE CUT dimmer (Trailing Edge). Body finishes include concrete grey, baby blue, brick red, matt black textured, matt white textured and corten effect.

Aluminum and tempered glass_
high efficiency SMD LED source_

Ceiling or wall mounted LED luminaire with omni-directional, diffused light distribution and a diameter of 130mm. The luminaire consists of a die-cast base, combined with tempered glass.

Available with nominal 6W (550lm) or 9W (1020lm) light source in 2700K, 3000K or 4000K in CRI95. Lumen maintenance of 50,000 hrs at L80B10. Mix and match finishes for the base and the coloured ring accessory, choosing from six colour choices: concrete grey, baby blue, brick red, matt black textured, matt white textured and corten effect.

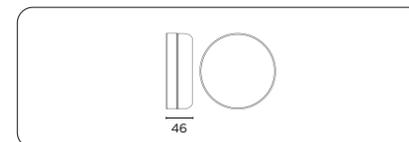

Ingress protection of IP66. Class I luminaire with integral ON-OFF power supply, dimmable via PHASE CUT dimmer (Trailing Edge).

Direct/indirect emission_
high efficiency COB LED source_

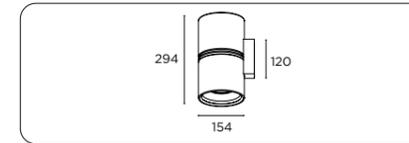

Direct/Indirect LED wall projector available with Medium, Wide, and Extra-large optic.

The body of these projector consists of a liquid-painted aluminium plate and decorative ring.

The reflection optic comes in a mirror-painted polycarbonate finish designed to direct luminous fluxes.

Available for use with DALI, PUSH, and 1-10V dimming controls. Ingress protection of IP20.

DARK

DARK MINI FIX

Minimal and effective recessed spotlight for professional lighting, designed to achieve maximum performance in the smallest size, equipped with the new Revo optical system, with 'Cross-Beam' technology, it allows extraordinary performances and precise beam projection in just 35mm diameter size.

The Dark family in all its versions stands out for its very high visual comfort and for the Lux / Watt ratio that it manages to deliver while maintaining retrospective illumination factors between wattage/power and dimensions.

The new quick-installation trimless system speeds up and facilitates the integration of the product into the plasterboard thanks to a special 3mm-thick cross-linked ring nut that guarantees precision and cleanliness of the result.

Available in single and multiple square and round, linear or angular versions, it offers a very wide range of optical options, accessories, and multiple configurations.

DARK MINI FIX accessories

Elliptical filter

Lens which produces an elliptical beam dispersion. Direct effect is dependent on the primary beam selected.

Honeycomb

Honeycomb lens for roto-symmetrical optics, useful for avoiding any visual disturbances or radial luminance.

DARK SMALL FIX

Very small and effective recessed spotlight for professional lighting, designed to achieve maximum performance in the smallest size, equipped with the new Revo optical system, with 'Cross-Beam' technology, it allows extraordinary performances and precise beam projection in just 45mm diameter size.

The Dark family in all its versions stands out for its very high visual comfort and for the Lux / Watt ratio that it manages to deliver while maintaining retrospective illumination factors between wattage/power and dimensions.

The new quick-installation trimless system speeds up and facilitates the integration of the product into the plasterboard thanks to a special 3mm-thick cross-linked ring nut that guarantees precision and cleanliness of the result.

Available in single and multiple square and round, linear or angular versions, it offers a very wide range of optical options, accessories, and multiple configurations.

DARK SMALL FIX accessories

Elliptical filter

Lens which produces an elliptical beam dispersion. Direct effect is dependent on the primary beam selected.

Honeycomb

Honeycomb lens for roto-symmetrical optics, useful for avoiding any visual disturbances or radial luminance.

DARK MEDIUM FIX

Extremely compact and effective recessed spotlight for professional lighting, designed to achieve maximum performance in the smallest size, equipped with the new Revo optical system, with 'Cross-Beam' technology, it allows extraordinary efficiency and precise beam projection in just 62mm diameter size.

The Dark family in all its versions stands out for its very high visual comfort and for the Lux / Watt ratio that it manages to deliver while maintaining retrospective illumination factors between wattage/power and dimensions.

The new quick-installation trimless system speeds up and facilitates the integration of the product into the plasterboard thanks to a special 3mm-thick cross-linked ring nut that guarantees precision and cleanliness of the result.

Available in single square and round, linear or angular versions, it offers a very wide range of optical options, accessories, and multiple configurations.

For 1h or 3h emergency version, please contact the factory.

DARK MEDIUM FIX accessories

Elliptical filter

Lens which produces an elliptical beam dispersion. Direct effect is dependent on the primary beam selected.

Diffusing filter

Filter designed to attenuate and soften contrasts and cast shadows. To use where blurred rather than sharp edges are required.

Honeycomb

Honeycomb lens for roto-symmetrical optics, useful for avoiding any visual disturbances or radial luminance.

DARK COMPACT FIX

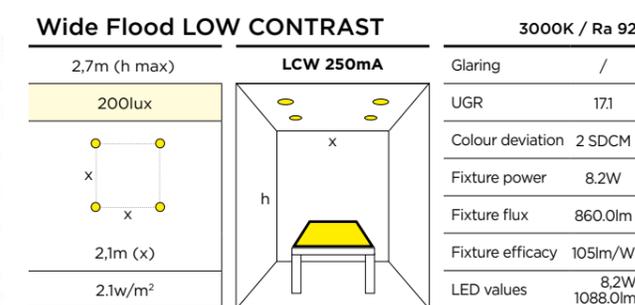

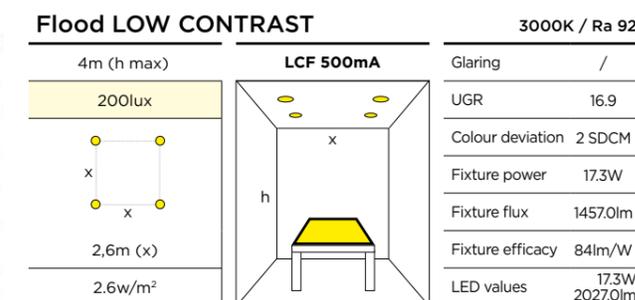

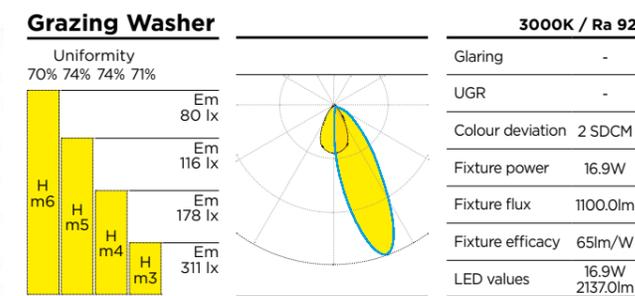

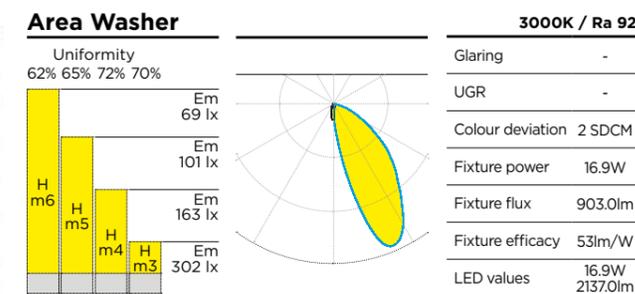

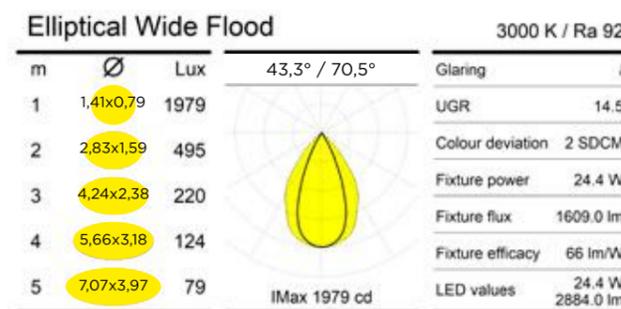

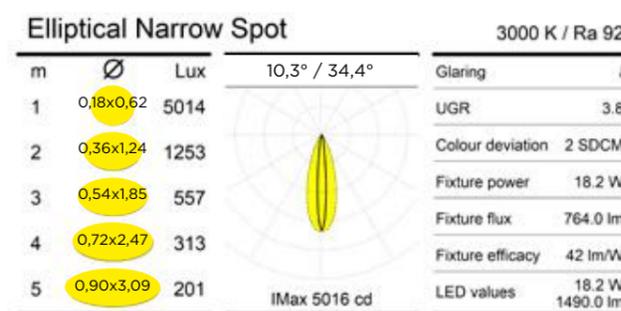

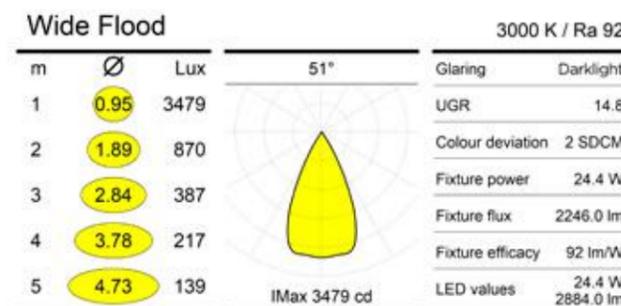

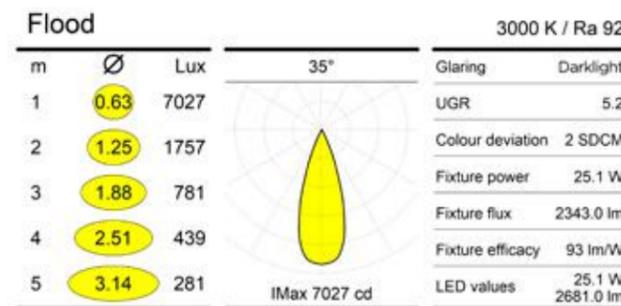

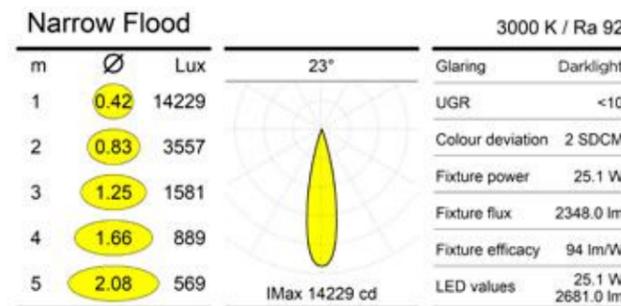

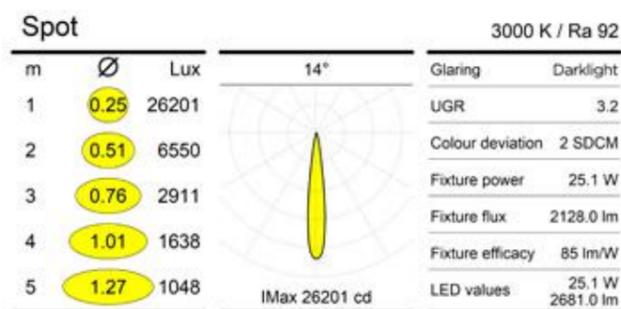

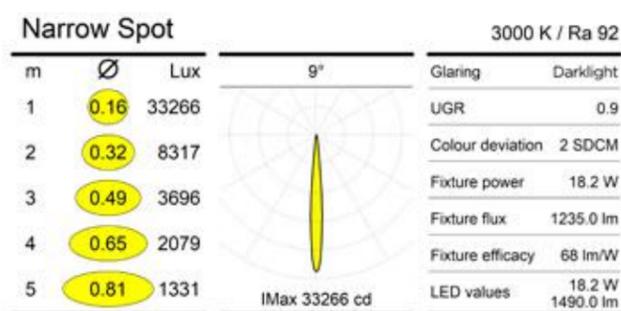

Extremely compact and effective recessed spotlight for professional lighting, designed to achieve maximum performance in the smallest size, equipped with the new Revo optical system, with 'Cross-Beam' technology, it allows extraordinary efficiency and precise beam projection in just 76mm diameter size.

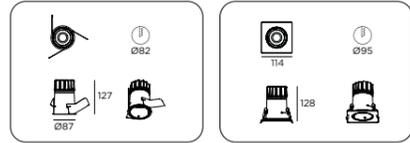

The Dark family in all its versions stands out for its very high visual comfort and for the Lux / Watt ratio that it manages to deliver while maintaining retrospective illumination factors between wattage/power and dimensions.

The new quick-installation trimless system speeds up and facilitates the integration of the product into the plasterboard thanks to a special 3mm-thick cross-linked ring nut that guarantees precision and cleanliness of the result.

Available in single and multiple square and round, linear or angular versions, it offers a very wide range of optical options, accessories, and multiple configurations.

DARK MAX FIX accessories

Elliptical filter

Lens which produces an elliptical beam dispersion. Direct effect is dependent on the primary beam selected.

Diffusing filter

Filter designed to attenuate and soften contrasts and cast shadows. To use where blurred rather than sharp edges are required.

Honeycomb

Honeycomb lens for roto-symmetrical optics, useful for avoiding any visual disturbances or radial luminance.

DARK MINI TILT

Minimal and effective recessed adjustable projector for professional lighting, designed to achieve maximum performance in the smallest size, equipped with the new Revo optical system with 'Cross-Beam' technology, it allows extraordinary performances and precise beam projection.

The adjustable versions guarantee inclinations up to 35° without any deformation of the beam or decrease in lumen output.

Equipped with a unique 'anti-slot' system designed to avoid the visibility of the void space, allows us to achieve great aesthetic cleanliness and rigorous design in all directions.

The Dark family in all its versions stands out for its very high visual comfort and for the Lux / Watt ratio that it manages to deliver while maintaining retrospective illumination factors between wattage/power and dimensions.

The new quick-installation trimless system speeds up and facilitates the integration of the product into the plasterboard thanks to a special 3mm-thick cross-linked ring nut that guarantees precision and cleanliness of the result.

Available in single and multiple square and round, linear or angular versions, it offers a very wide range of optical options, accessories, and multiple configurations.

Very Narrow Spot

3000 K / Ra 92			8°		Glaring	Darklight
m	∅	Lux			UGR

DARK SMALL TILT accessories

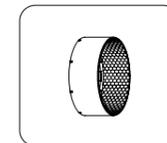

Visor

Partial rotatable glare control, necessary to shield any directional glare.

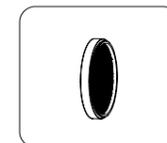

Elliptical lens

Rotatable lens to obtain the elliptical deformation of the beam, amplitude and variable characteristics depending on the chosen optical combination.

Snoot

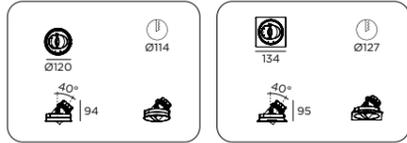

Omnidirectional glare reducer, necessary to shield any radial disturbances

Honeycomb

Honeycomb lens, necessary to shield any radial disturbances.

DARK MEDIUM TILT accessories

Visor

Partial rotatable glare control, necessary to shield any directional glare.
Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Elliptical lens

Rotatable lens to obtain the elliptical deformation of the beam, amplitude and variable characteristics depending on the chosen optical combination.
Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

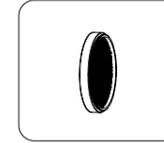

Primary ring

Primary ring that allows the housing of any accessory, to be fixed on the front of the standard ring.
A primary ring is always necessary for fixing one or more overlapping accessories.

Snoot

Omnidirectional glare reducer, necessary to shield any radial disturbances.
Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

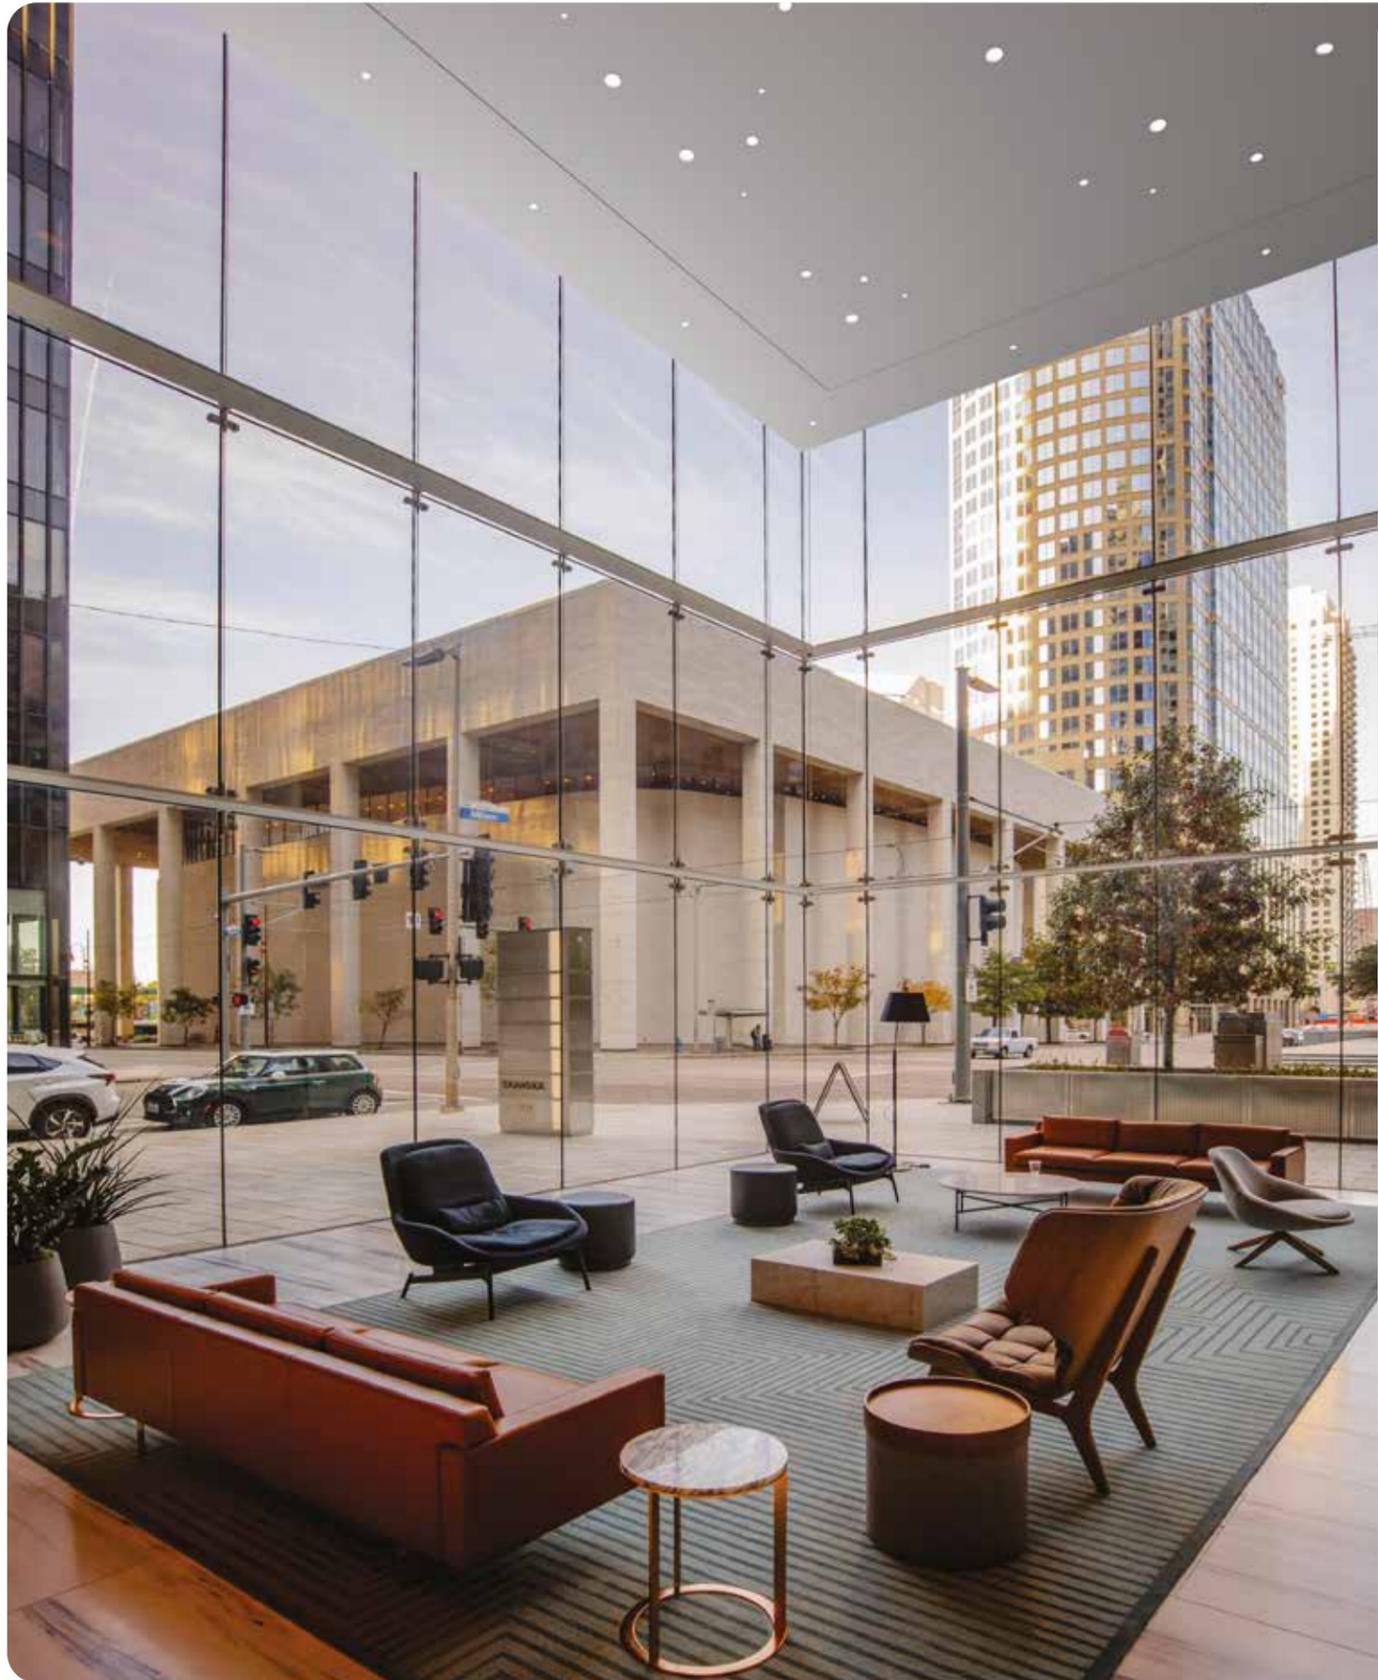

Honeycomb

Honeycomb lens, necessary to shield any radial disturbances.
Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

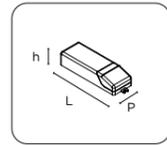

Diffusing glass

Specific lens to obtain further visual diffusion.
Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

PIN REVO Small

The Pin Revo small version with a diameter of 70mm is available in 7°, 24°, 36°, 55° beams with medium UGR <13 coefficients.

Detailing a high colour rendering of CRI 92 & 97, with LED source quality within 2 SDCM.

The cleanliness of the projection and the refined photometric appearance make this family of luminaires the ideal combination between professional performance and graphic minimalism.

Full compatibility with the most popular control systems make Pin Revo Mini the perfect tool in contexts where lighting management and scenography are crucial to the project specification.

All the square versions are configured with 3D frame in white or black.

Versions configured with black finish are defined as 'High Comfort' as they fully respect the Dark lighting parameters and UGR values <10.

Multi-optic versions are configured with an 3D frame in white or black.

The multi-optical versions allow you to use different beams on the same luminaire.

PIN REVO Medium

The Pin Revo medium version with a diameter of 100mm is available in 19°, 25°, 37°, 52° beams with medium UGR <13 coefficient. Detailing a high colour rendering of CRI 92 & 97, with LED source quality within 2 SDCM.

The cleanliness of the projection and the refined photometric appearance make this family of luminaires the ideal combination between professional performance and graphic minimalism.

Full compatibility with the most popular control systems make Pin Revo Mini the perfect tool in contexts where lighting management and scenography are crucial to the project specification.

The versions configured with black finish are defined as **'High Comfort'** as they fully respect the Dark lighting parameters and medium UGR values <10.

SPOT REVO

SPOT REVO Mini semi-recessed

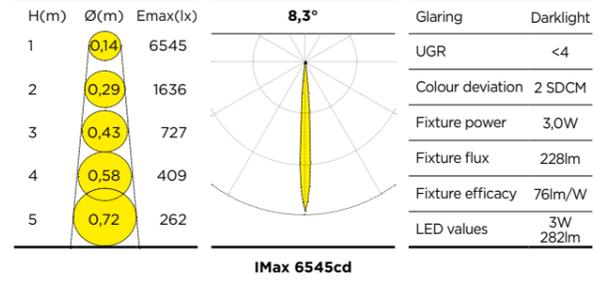

The Mini version offers beams from 8° to 34° an elliptical EN with numerous accessories for the range. High colour rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The full compatibility with the most common control systems make Spot Revo Mini the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

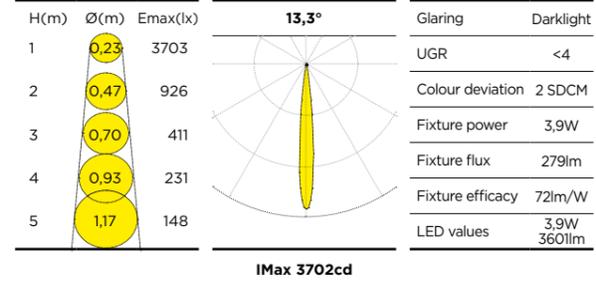

The multi-optic version allows the use of differentiated beams on the same luminaire in the opening variants SP, NF, FL.

The multi-optic versions configured with unified beams are available in all variants apertures.

SPOT REVO Mini semi-recessed accessories

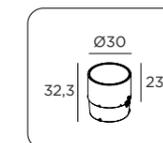

Visor

Snap-on accessory for the partial and directional reduction of the eventual glare. Can rotate of 360°. Replaces the ring supplied as standard.

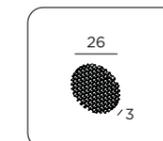

Elliptical lens

Elliptical secondary lens. This holographic film must be put onto the primary optic to transform the beam in a elliptical beam. Various ellipses can be obtained depending on the chosen combinations. The lens can be rotated. Replaces the ring supplied as standard.

Snoot

Cylindrical accessory for the omnidirectional reduction of the eventual glare. Snap-on mounting. Replaces the ring supplied as standard.

Honeycomb

Antiglare honeycomb element. It can be snapped on the rear side of the projector standard ring.

SPOT REVO Small semi-recessed

The Small version offers six symmetrical beam options from 7° to 47°, two elliptical versions EN and EW and numerous compendium accessories.

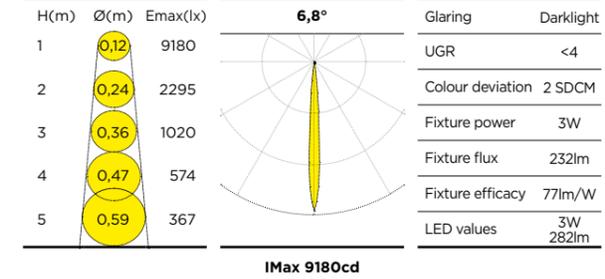

High colour rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The full compatibility with the most common control systems make Spot Revo Small the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

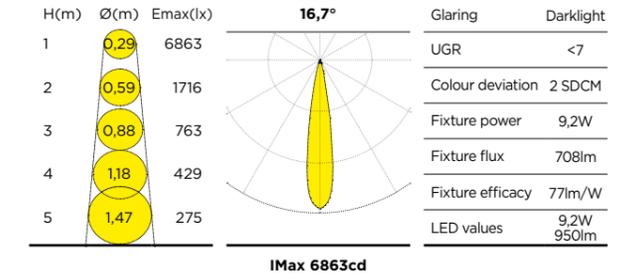

The multi-optic version allows the use of differentiated beams on the same luminaire in the opening variants SP, NF, FL, WF.

The multi-optic versions configured with unified beams are available in all variants of apertures.

SPOT REVO Small semi-recessed accessories

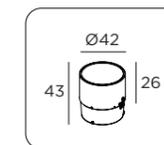

Visor

Snap-on accessory for the partial and directional reduction of the eventual glare. Can rotate of 360°. Replaces the ring supplied as standard.

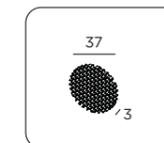

Elliptical lens

Elliptical secondary lens. This holographic film must be put onto the primary optic to transform the beam in a elliptical beam. Various ellipses can be obtained depending on the chosen combinations. The lens can be rotated. Replaces the ring supplied as standard.

Snoot

Cylindrical accessory for the omnidirectional reduction of the eventual glare. Snap-on mounting. Replaces the ring supplied as standard.

Honeycomb

Antiglare honeycomb element. It can be snapped on the rear side of the projector standard ring.

SPOT REVO Medium semi-recessed

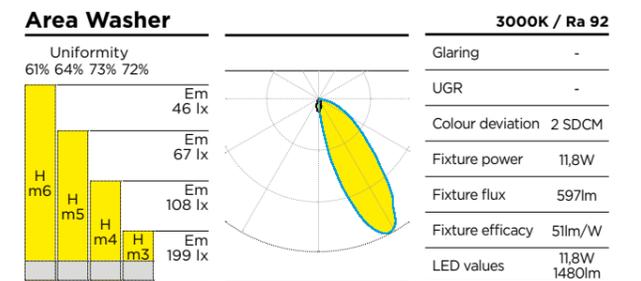

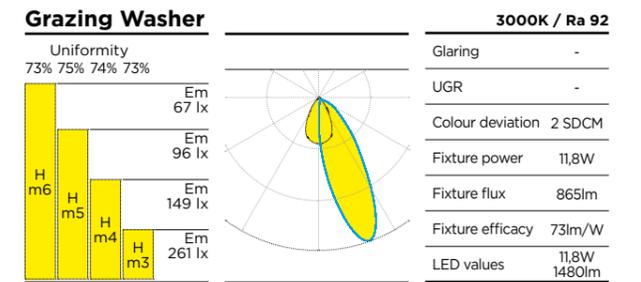

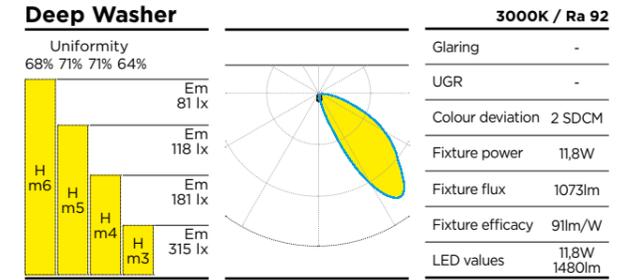

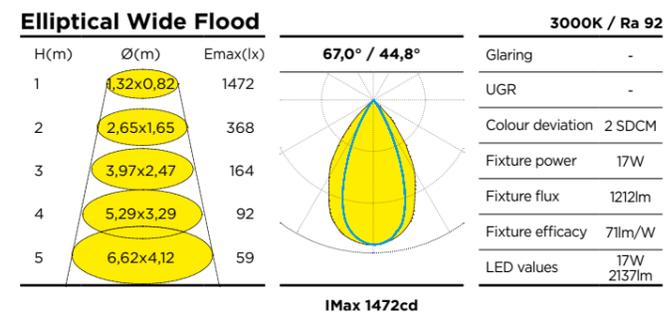

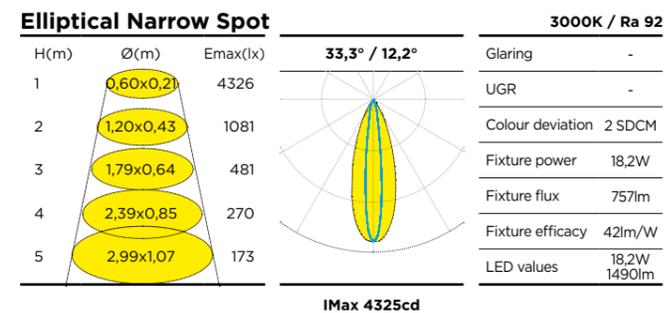

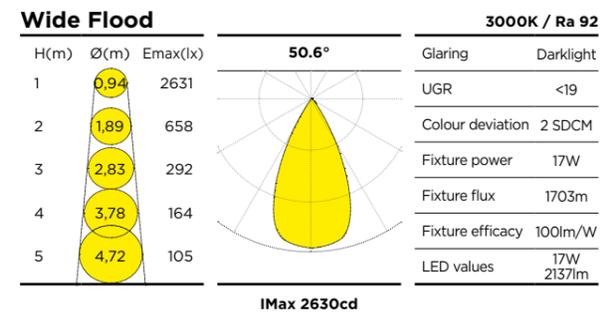

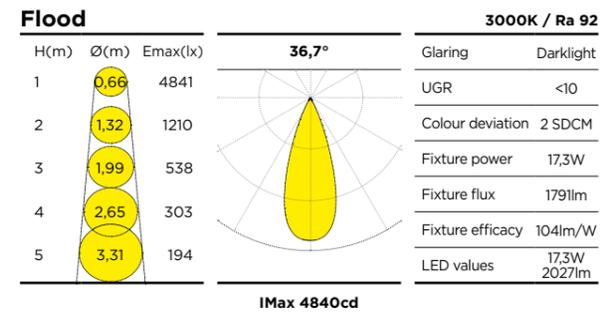

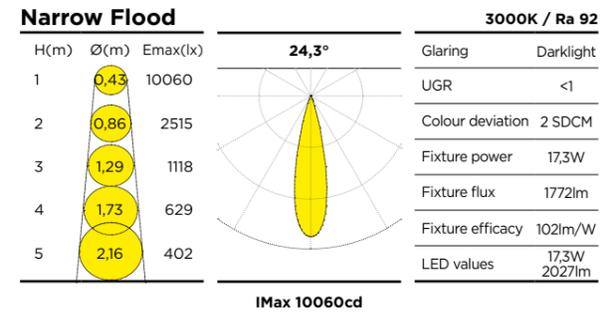

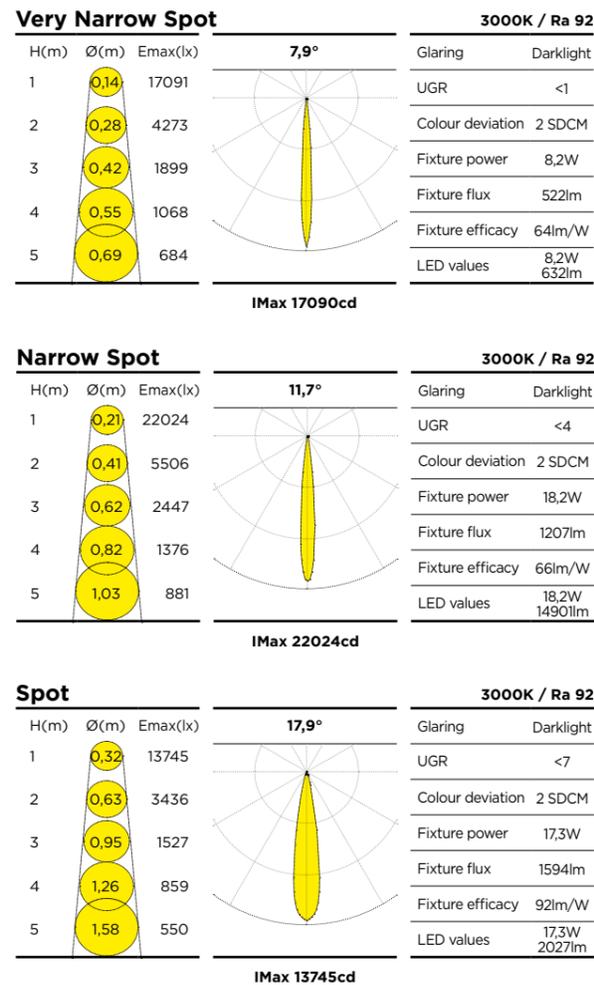

The Medium version offers 6 symmetrical beam options from 8° to 50°, three asymmetrical wall-washer: Grazing, Area, Deep, two elliptical versions EN and EW and a shaper.

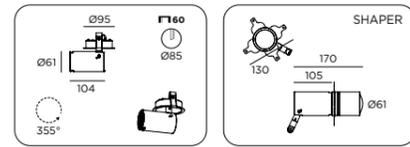

The numerous accessories in the range are designed with a fastening system with overlapping elements allowing a differentiated and specific optical configuration.

High colour rendering, UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The full compatibility with the most common control systems make Museo Revo Medium the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness

SPOT REVO Medium semi-recessed accessories

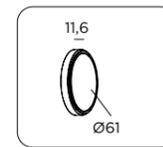

Primary ring

Primary ring that allows the housing of any accessory, to be fixed on the front of the standard ring. A primary ring is always necessary for fixing one or more overlapping accessories.

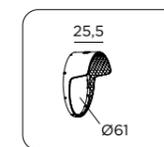

Elliptical lens

Rotatable lens to obtain the elliptical deformation of the beam, amplitude and variable characteristics depending on the chosen optical combination. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

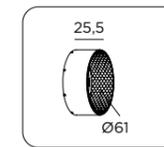

Diffuser lens

Specific lens to obtain further visual diffusion. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

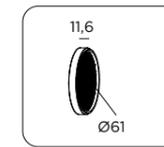

Visor

Partial rotatable glare control, necessary to shield any directional glare. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

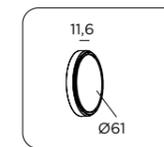

Snoot

Omnidirectional glare reducer, to assist in shielding any radial glare disturbances. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Honeycomb

Honeycomb lens, necessary to shield any radial disturbances. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Protective Glass

Additional shielding useful to prevent the accumulation of dust and residues in the optical compartment when the luminaire is used for indirect applications.

Adjustable or fixed_
high efficiency COB LED source_

Fixed LED downlight made from diecast aluminium available in 2700K, 3000K and 4000K in CRI95 and 3000K in CRI85. Nominal power consumption of 6W (900lm). Lumen maintenance of 100,000 hrs at L80B10. The downlight is complete with an optics assembly including mirror-painted polycarbonate reflective optic in different beam angles.

An optional coloured cover made from PMMA can be added to the optics assembly in translucent, translucent orange, translucent blue and translucent green or matt black.

The coloured cover catches the light and gives the downlight a glowing, coloured cover effect. Ingress protection of IP20 or IP40 in the fixed version, when used with satin diffuser, which is available as an accessory. Class III luminaire to be used with remote driver, available for ON/OFF, DALI, 1-10V, PUSH and PHASE CUT dimming. Also available in emergency version (consult factory).

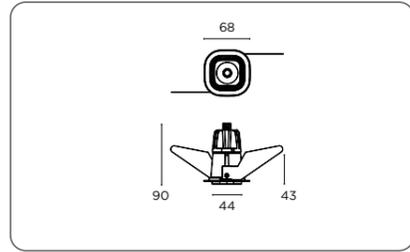

Bluetooth accessory can be used in combination with the DALI driver for control via a smartphone app. To be ordered separately. Housing finishes include matt white textured and matt black textured (powder coated).

Adjustable or fixed_
high efficiency COB LED source_

Fixed LED downlight made from diecast aluminium available in 2700K, 3000K and 4000K in CRI95 and 3000K in CRI85. Nominal power consumption of 6W (900lm). Lumen maintenance of 100,000 hrs at L80B10. The downlight is complete with an optics assembly including mirror-painted polycarbonate reflective optic in different beam angles.

An optional coloured cover made from PMMA can be added to the optics assembly in translucent, translucent orange, translucent blue and translucent green or matt black.

The coloured cover catches the light and gives the downlight a glowing, coloured cover effect. Ingress protection of IP20 or IP40 in the fixed version, when used with satin diffuser, which is available as an accessory. Class III luminaire to be used with remote driver, available for ON/OFF, DALI, 1-10V, PUSH and PHASE CUT dimming. Also available in emergency version (consult factory).

A Bluetooth accessory can be used in combination with the DALI driver for control via a smartphone app. To be ordered separately. Housing finishes include matt white textured and matt black textured (powder coated).

The honeycomb grid is an accessory used for the anti-glare effect. It reduces the luminous flux by 20%.

The satin diffuser increases the diffusion of the luminous flux by widening and softening the beam of light.

Accessory bluetooth.
To be used with DALI driver.

PLURIEL MICRO

High efficiency COB LED source_

Adjustable semi-recessed LED Spotlight with 350° horizontal and 90° outward vertical adjustment. Fitted with COB LED light source and DC constant-current power supply to be ordered separately.

Two retention springs allow for easy fitting of the luminaire. The recessed Adapter of the luminaire is made from printed metal and the optical body is made from aluminium alloy 6060 with heat dissipating function.

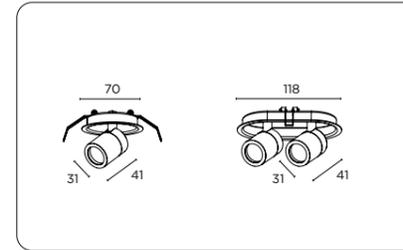

Finish options include matt white, matt black and concrete grey. In all the versions the internal plate of the product is black. Polycarbonate optics, painted in a mirror finish for maximum reflectance, including coloured ring available in nine finish options (to be ordered separately).

Available beam angles include Medium and Large. Supplied in a wide range of dimming options on request. Accessories include a cut-off attachment. Ingress protection of IP20.

With the Narrow optic it is possible to obtain a 10° narrow beam. **Optic assembly and its coloured ring should not be ordered with this accessory.**

Optic Narrow

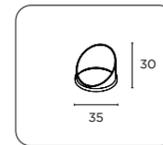

9Q 317 52

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a greater contrast between the illuminated and nonilluminated area.

Cut-Off

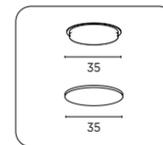

9G 049

Thanks to this accessory it is possible to obtain an asymmetrically narrower and sharper beam with a greater contrast between the illuminated and non-illuminated area.

Visor

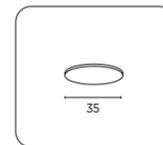

9G 048

The honeycomb grid is an accessory used for the anti-glare effect. It reduces the luminous flux by 20%.

Honeycomb louvre

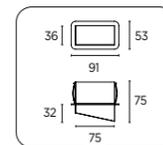

9G 023

The satin diffuser increases the diffusion of the luminous flux by widening and softening the beam of light.

Satin diffuser

9G 024

Accessory bluetooth. **To be used with DALI driver.**

Bluetooth®

9N 004 CON

High efficiency COB LED source_

Recessed LED Downlight with two adjustable spotlights each with an independent joint allowing for 350° horizontal and +/-90° vertical adjustment.

Optics in Spot, Medium and Large and remote power supply to be ordered separately. Optics come complete with a decorative ring that is available in seven liquid-coated finish options.

The luminaire is available in matt white, matt black and concrete grey. In all the versions the internal plate of the product is black. Accessories include narrow optics attachment, honeycomb louvre and satin diffuser.

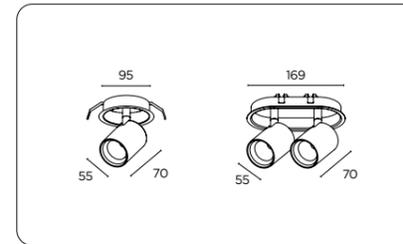

Available as DALI, PUSH, 1-10V, CASAMBI and PHASE CUT dimming options on request. Ingress protection of IP20.

PENDANTS / CEILING LAMPS

NABOO VERTICAL

NABOO VERTICAL

Composed of modules_
high efficiency SMD LED source_

Circular-shaped, vertically suspended LED pendant luminaire. Fitted with SMD linear light source and opal poly carbonate diffuser for omni-directional light distribution.

Available in 2700K, 3000K and 4000K in CRI95 and 3000K in CRI85. Lumen maintenance of 50,000 hrs at L80 B10.

The luminaire is manufactured from extruded aluminium alloy 6060 profile and is made up of sections, that can be joined together with die-cast aluminium joining parts. Supplied with steel suspension cables for height adjustment of the luminaire.

Class III luminaire with power supply included in the cano-py, available for ON-OFF, 1-10V, DALI and PUSH dimming.

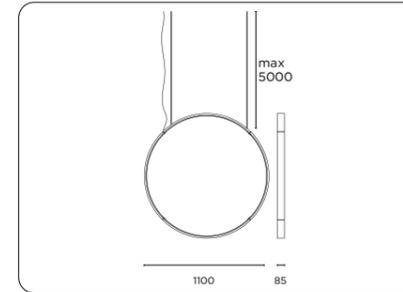

A remote power supply option is available for installations without a canopy. Ingress protection of IP40. Body finishes include brick red, matt white textured, matt black textured, rust effect and concrete grey.

NABOO SPOT

NABOO SPOT

Composed of modules_ high efficiency SMD LED source_ source COB LED for spots_

Circular-shaped LED pendant luminaire fitted with SMD linear light sources and opal poly carbonate diffuser for om-ni-directional light distribution. Fitted with adjustable LED Spots for direct lighting elements. Power supply fitted in the canopy to be ordered separately. Possibility to use remote driver without the canopy as well, only for ON-OFF versions.

The luminaire is manufactured from extruded aluminium alloy 6060 profile and is made up of sections, that can be joined together with diecast al-uminium joining parts.

Steel suspension cables are fitted to the joining parts and allow for height adjustment of the luminaire. 2 x 2 aluminium alloy LED Spots are installed near the two oppo site joints of the sectors.

Epoxy powder coating is used for textured black and textured white finishes.

All other finish options are produced with liquid paint. The product can also be installed in an oblique position. Ingress protection of IP20.

NABOO SPOT_ accessories for Compositions

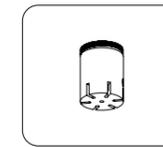

Base for cluster composition
including 3 steel cables
L=3000 e Ø=2,5

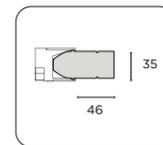

Canopy with an onboard driver
220/240V - 50/60Hz

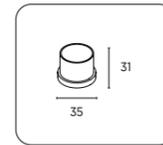

IP₄₀

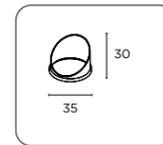

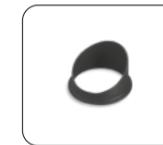

Accessory for a clean and unobtrusive installation, keeping a minimum distance from the ceiling 600/700/850/1000/1500.

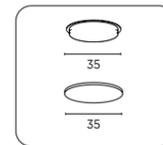

With the Narrow optic it is possible to obtain a 10° narrow beam.
With this accessory it is not necessary to order additional optic and ring.

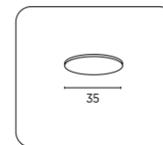

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a greater contrast between the illuminated and non illuminated area.

With this accessory it is possible to obtain an asymmetrically narrow and defined beam, with a strong contrast between the illuminated and the not illuminated area.

The honeycomb grid is an accessory used for the anti-glare effect. It reduces the luminous flux by 20%.

The satin diffuser increases the diffusion of the luminous flux by widening and softening the beam of light.

NABOO MEETING

NABOO MEETING

Composed of modules_
high efficiency SMD LED source_

Organic quadrangular shaped suspended LED pendant luminaire with a length of 2570mm and a width of 1710mm. Fitted with SMD linear light source and opal polycarbonate diffuser for omnidirectional light distribution.

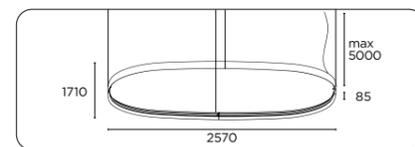

Available in 2700K, 3000K and 4000K in CRI95 and 3000K in CRI85. Nominal power consumption of 145W. Lumen maintenance of 50,000 hrs at L80 B10. The luminaire is manufactured from extruded aluminium alloy 6060 profile and is made up of four sections, that can be joined together with diecast aluminium joining parts. Four steel suspension cables are fitted to the joining parts and allow for height adjustment of the luminaire.

Class III luminaire with power supply included in the canopy, available for ON-OFF, 1-10V, DALI and PUSH dimming.

A remote power supply option is available for installations without a canopy. Ingress protection of IP40. Body finishes include brick red, matt white textured, matt black textured, rust effect and concrete grey.

NABOO MEETING SPOT

NABOO MEETING SPOT

Composed of modules_ high efficiency SMD LED source_ source COB LED for spots_

Organic quadrangular-shaped suspended LED pendant luminaire fitted with four LED spots in pairs of two, located oppo-site each other on the long sides of the fitting. Length of 2570mm and width of 1710mm.

Available in 2700K, 3000K and 4000K in CRI95 and 3000K in CRI85. Lumen maintenance of 50,000 hrs at L80 B10. The luminaire is manufactured from extruded aluminium alloy 6060 profile and is made up of sections, that can be joined together with diecast aluminium joining parts. Fitted with SMD linear light source and opal polycarbonate diffuser for omnidirectional light distribution.

Four steel suspension cables are fitted to the joining parts and allow for height adjustment of the luminaire. Optics assembly for the LED spots including mirror-painted polycarbonate reflective optic including a decorative ring, available in nine liquid coating options. Optics assembly to be ordered separately. Beam angles include Medium 21°, Large 30° and Wide 59°.

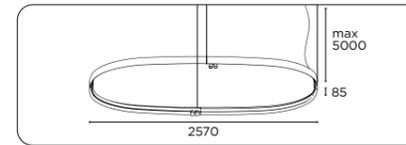

Optical accessories include a 10° narrow optics attachment, honeycomb louvre and satin diffuser. Class III luminaire with power supply included in the cano-py, available for ON-OFF, DALI and PUSH dimming.

A remote power supply option is available for installations without a canopy.

Ingress protection of IP20.

Body finishes include brick red, matt white textured, matt black textured, rust effect and concrete grey.

IP₄₀  

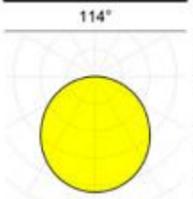

Composed of modules_
high efficiency SMD LED source_

Direct LED pendant luminaire using linear SMD light sources and a DC constant current power supply integrated in the product.

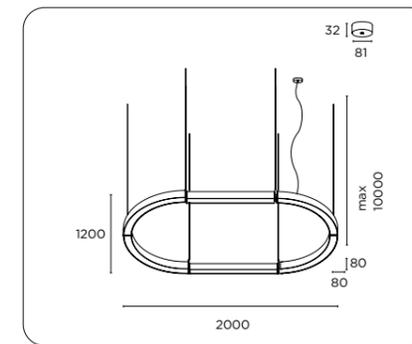

The luminaire body is made from extruded aluminium 6060 alloy and consists of sectors that are joined together with diecast connectors which also act as the mounting points for the suspension wire. The length of the suspension wires is easily regulated with adjustable wire holders.

The luminaire is fitted with a PMMA diffuser and is available in matte white or matte black powder coating finish. Ingress protection of IP40.

LED or Fluo version_
high efficiency SMD LED source_

LED surface luminaire using SMD LED light source and a DC constant current power supply integral to the product.

Fitted with a PMMA diffuser as standard or microprismatic diffuser on request. The luminaire body is made from aluminium and comes in four powder coat finishes as well as Corten finish.

Also available in DALI Emergency option on request for version Ø > 260. The fitting can be converted into a suspended fitting using a suspension kit accessory.

Direct/Indirect distribution can be created through the use of an 8W kit to be installed as an upright in the fitting.

Ingress protection of IP40.

Double ignition_
high efficiency SMD LED source_

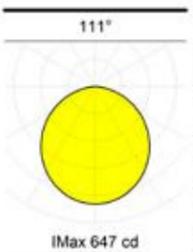

A dual source LED ceiling lamp available in a multitude of liquid painted finishes and custom colours.

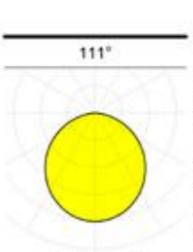

One LED light source is located in the middle of the fitting, creating the main downlight illumination.

The second light source is located behind the structure holding the premier light source, creating a decorative ring of light.

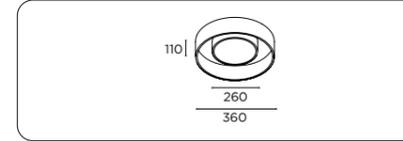

Available for use with DALI, PUSH, and 1-10V dimming controls. Trailing edge and leading edge dimming available on request.

Ingress protection of IP40.

Aluminum and tempered glass_
high efficiency SMD LED source_

Ceiling or wall mounted LED luminaire with omni-directional, diffused light distribution and a diameter of 130mm.

The luminaire consists of a diecast base, combined with tempered glass. Available with nominal 6W (550lm) or 9W (1020lm) light source in 2700K, 3000K or 4000K in CRI95.

Lumen maintenance of 50,000 hrs at L80 B10. Mix and match finishes for the base and the coloured ring accessory, choosing from six colour choices: concrete grey, baby blue, brick red, matt black textured, matt white textured and rust effect. Ingress protection of IP66.

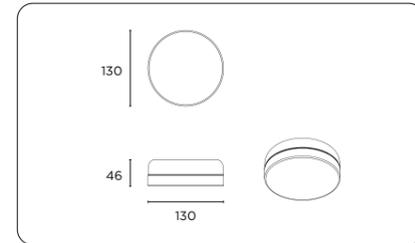

Class I luminaire with integral ON-OFF power supply, dimmable via PHASE CUT dimmer.

Direct issue or dir/ind_
high efficiency COB LED source_

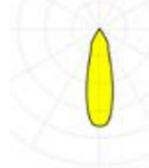

LED pendant projector with driver on board available with Medium, Large, Wide and Extra-large optic.

The body of these projector consists of a liquid painted aluminium plate and decorative ring.

The reflection optic comes in a mirror- painted polycarbonate finish designed to direct luminous fluxes (to be ordered separately).

Ingress protection of IP20.

Version ceiling or suspension_
high efficiency COB LED source_

Cylindrical LED luminaire. Manufactured in aluminium with rounded corners and a recessed LED light source. Diameter of 100mm and a length of 210mm.

Available in 2700K, 3000K and 4000K in CRI95 and 3000K in CRI85. Nominal power consumption of 6.5W (1100lm).

Lumen maintenance of 140,000 hrs at L80B10.

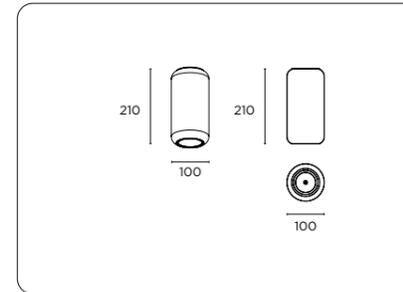

The inner bezel acts as the reflector and is available in nine colour choices including the new copper, dark bronze and gold finishes.

When choosing a matt black inner bezel finish, the bezel acts like a matt dark-light reflector for minimal glare and maximum visual comfort. Ingress protection of IP20 or IP40.

Class I luminaire with integral ON-OFF power supply. Housing finishes include matt white, matt black, baby blue, brick red, concrete grey and corten effect.

The suspend version is equipped with a 2m suspension and supply cable and a canopy painted in the same finishing as the main body of the device.

PLURIEL

The body is manufactured from die-cast aluminium_ high efficiency COB LED source_

LED pendant luminaire with direct light distribution and constant current driver integrated in the canopy.

Canopies are available in single, three or five units. The body is manufactured from die-cast aluminium alloy 6060 and is fitted with a partially milled, sanded methacrylate diffuser.

Liquid-coated finish options include brick red, matt white, matt black, baby blue and concrete grey.

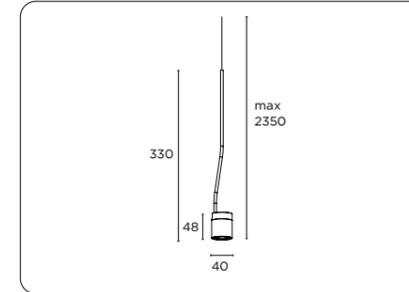

Diffuser in sanded metacrylate (PMMA) partially milled to obtain a perfect light diffusion.

high efficiency COB LED source_

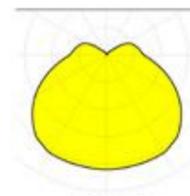

LED pendant with light source in 2700K, 3000K or 4000K in CRI95 or 3000K in CRI85 and nominal power consumption of 6W (870lm).

Lumen maintenance of 100,000 hrs at L80B10. Combined with Jam cylindrical element with omnidirectional light distribution, made from frosted glass. Ingress protection of IP40.

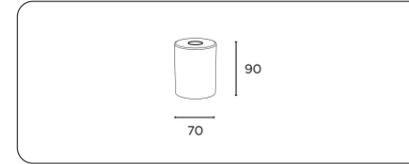

Class III luminaire with ON-OFF driver in canopy, or remote driver for the recessed canopy option. Remote drivers include ON-OFF, 1-10V, DALI, PUSH, CASAMBI and PHASE CUT. Canopies are available in six finish options including brick red, matt white, matt black, baby blue, concrete grey and corten effect and can be used to mount a single unit, three units or five units.

Accessories include a decorative cover available in brick red, matt white, matt black, baby blue, concrete grey and corten effect. The Jam glass element can be mounted in different positions within the decorative cover from completely recessed to completely exposed.

LED RUNNER

LED RUNNER

IP₄₀   

Version monoemission or biemission_
high efficiency COB LED source_

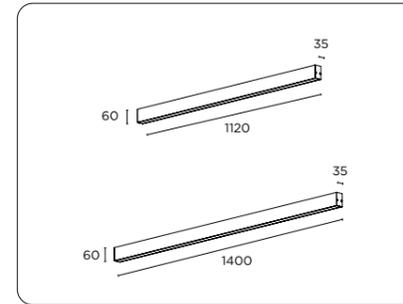

Linear stand-alone direct pendant luminaire using SMD light source and a DC constant current power supply integral to the product. LED modules conveniently snap-in to a wiring plate mounted inside the body.

The luminaire is manufactured from extruded aluminium alloy 6060 and is fitted with a polycarbonate microprismatic diffuser.

Available in anodized grey aluminium, matt white or matt black varnish.

Ingress protection of IP40.

Version monoemission or biemission_
high efficiency COB LED source_

Linear stand-alone direct pendant luminaire using SMD light source and a DC constant current power supply integral to the product.

LED modules conveniently snap-in to a wiring plate mounted inside the body.

The luminaire is manufactured from extruded aluminium alloy 6060 and is fitted with a polycarbonate microprismatic diffuser.

Available in anodized grey aluminium, matt white or matt black varnish.

Ingress protection of IP40.

Electrified track system for mains voltage installations, offered in two different variants in white, black and grey. The four-wire version for on/off setups is joined by the six-wire version, for dimmable installations. Compatible with the majority of track adapters, Unitrack is complete with joints, fixing systems and electrical connections.

UNITRACK power accessories

Track 230V overhead power supply module with integrated SPD protections, with three independent lines. Strongly recommended in large installations where the presence of surges or system instability is considered possible. A single module covers a power load of 3 x 800W, it is equipped with independent lights for notification of correct system operation. Available in white, black, grey.
Degree of protection: IP20
DEKRA approval acc. to EN 61643-11 Ref. no.: 142721
Suitable for luminaires with protection class II
AC system: TT-TN-IT Temporary overvoltage (TOV)-BT: 403 V AC (5 sec.) / 528 V (120 min.) (TOV)-MV/HV: 1200 V AC (200 msec.) Isccr: 300 A With integrated thermal fuse.

UNITRACK weight capacity

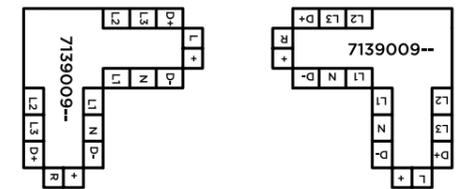

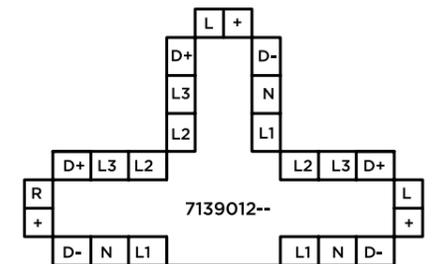

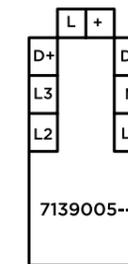

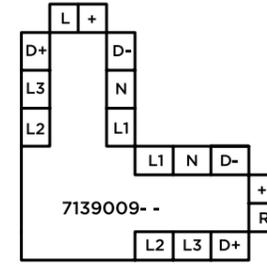

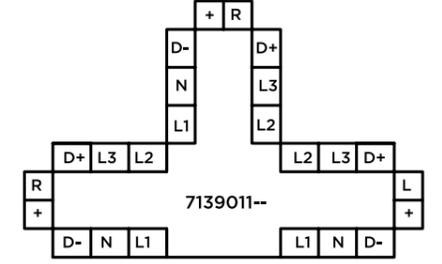

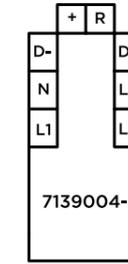

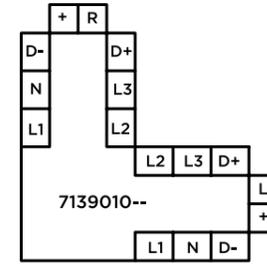

The rails can support a load of 5Kg every 225mm with a maximum distance between the fixing points of 900mm.

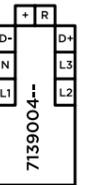

In the case of a load of 10Kg every 225 mm, the fixing distance must be 450 mm.

UNITRACK example of composition

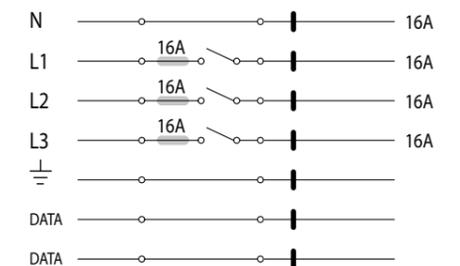

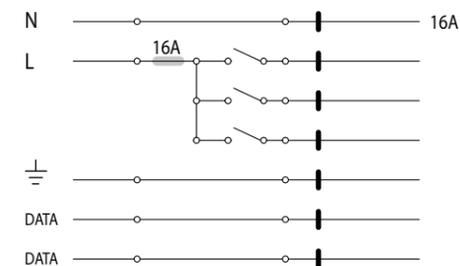

Example of composition; the points with "+" must match between of lgold

UNITRACK network connections

Connection to an AC 230V-50Hz mains allows for a total load of 16A, which corresponds to approximately 3600W which can be divided over three phases.

SPOT REVO

SPOT REVO SMALL 230V

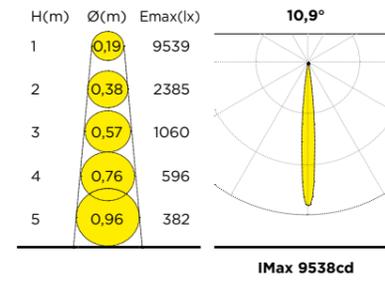

The Small version offers five symmetrical beam options from 11° to 47°, two elliptical versions EN and EW and numerous accessories within the range.

High color rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The full compatibility with the most common control systems make Spot Revo Small the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

SPOT REVO SMALL 230V accessories

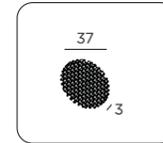

Snap-on accessory for the partial and directional reduction of the eventual glare. Can rotate of 360°. Replaces the ring supplied as standard.

Cylindrical accessory for the omnidirectional reduction of the eventual glare. Snap-on mounting. Replaces the ring supplied as standard.

Elliptical secondary lens. This holographic film must be put onto the primary optic to transform the beam in a elliptical beam. Various ellipses can be obtained depending on the chosen combinations. The lens can be rotated. Replaces the ring supplied as standard.

Antiglare honeycomb element. It can be snapped on the rear side of the projector standard ring.

SPOT REVO MEDIUM 230V

IP₄₀   

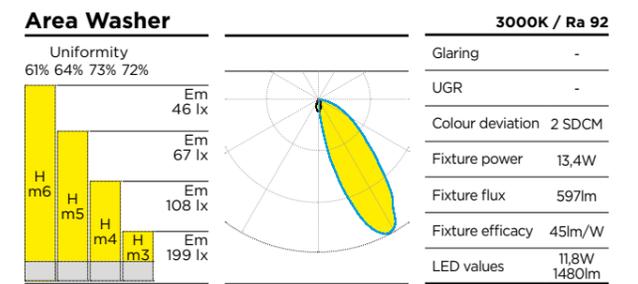

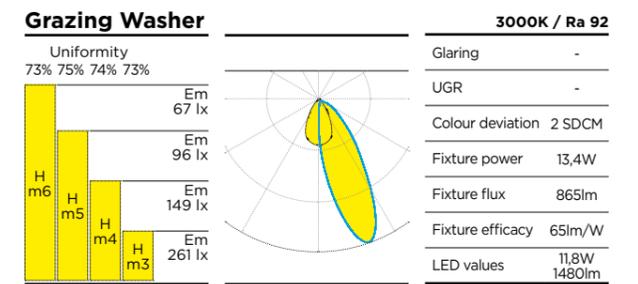

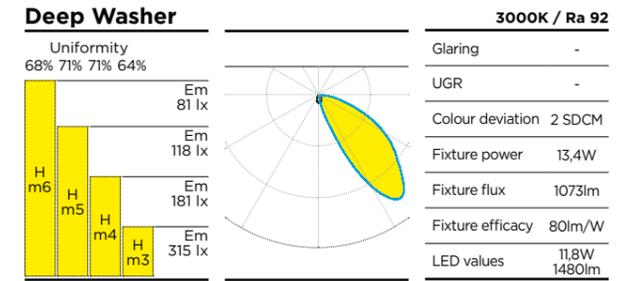

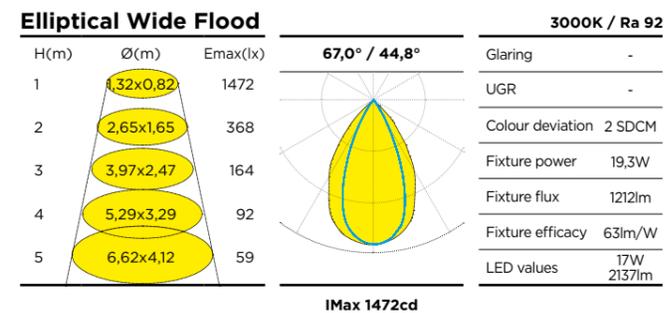

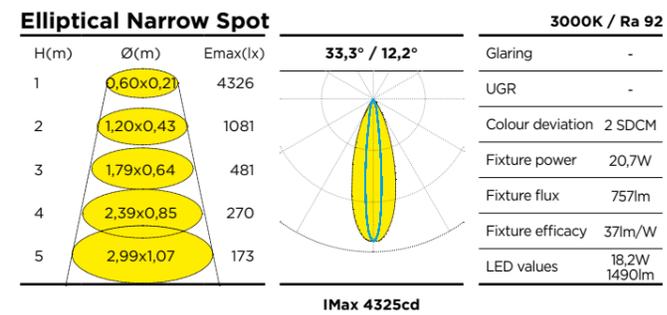

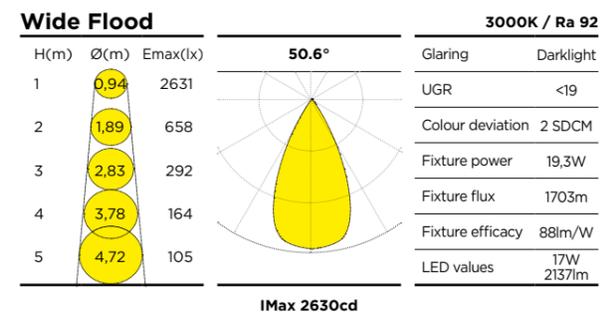

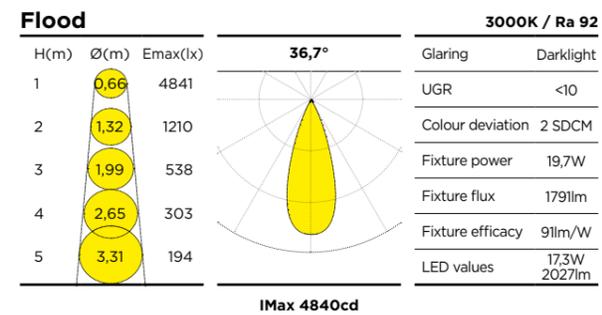

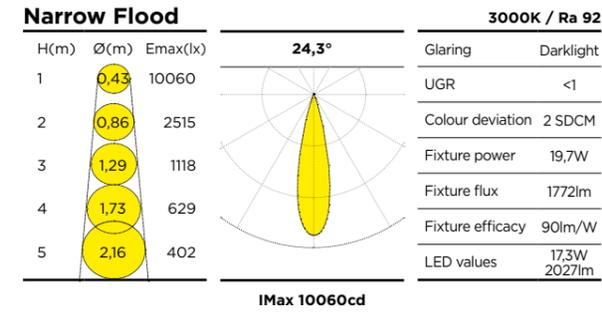

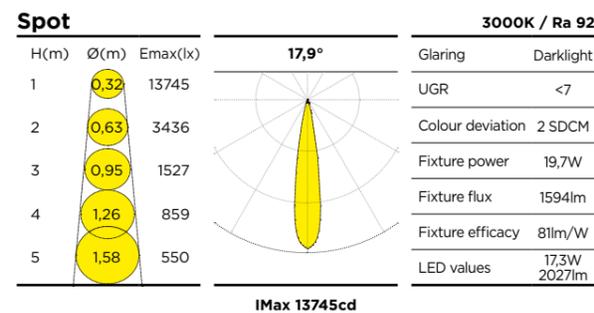

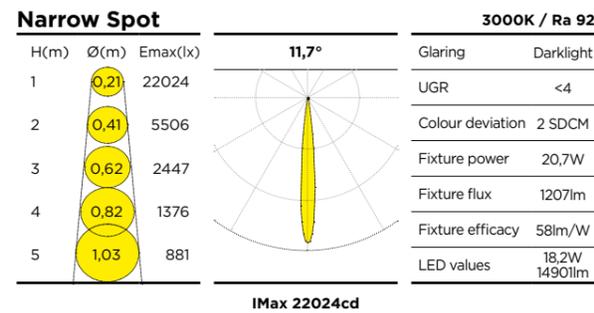

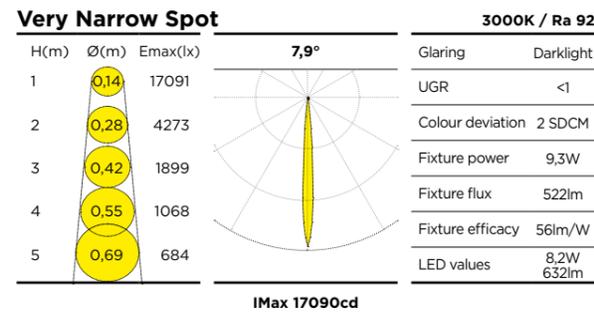

The Medium version offers 6 symmetrical beam options from 8° to 51°, three asymmetrical wall-washer: Grazing, Area, Deep, two elliptical versions EN and EW and a shaper.

The numerous accessories in the range are designed with a fastening system with overlapping elements allowing a differentiated and specific optical configuration.

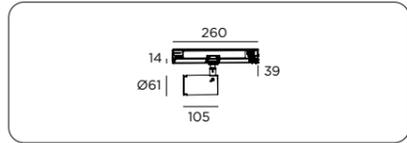

High color rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

Full compatibility with the most common control systems make Spot Revo Medium the perfect tool in contexts where the value of the source is determined by a very high performance quality and by minimal physical and visual intrusiveness.

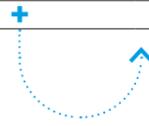

This model is also configurable in the shaper version with movable lenses, to obtain focused quadrangular projections with a light and small-sized instrument.

Each accessory or accessory group requires only one primary ferrule for installation on the optical compartment. Always necessary for mounting one or more accessories on top of each othe.

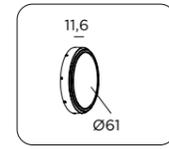

SPOT REVO MEDIUM 230V accessories

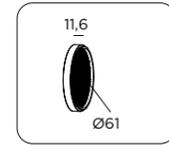

Partial rotatable glare control, necessary to shield any directional glare. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

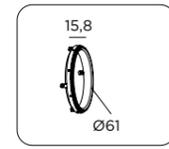

Omnidirectional glare reducer, to assist in shielding any radial glare disturbances. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

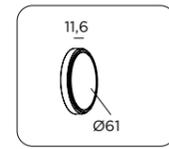

Rotatable lens to obtain the elliptical deformation of the beam, amplitude and variable characteristics depending on the chosen optical combination. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

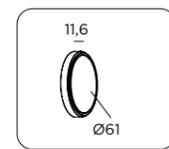

Honeycomb glare lens gives further protection from radial glare disturbances. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Primary ring that allows the housing of any accessory, to be fixed on the front of the standard ring. A primary ring is always necessary for fixing one or more overlapping accessories.

Specific lens to obtain a more diffused projection. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Additional shielding useful to prevent the accumulation of dust and residues in the optical compartment when the luminaire is used for indirect applications.

Each accessory or accessory group requires only one primary ferrule for installation on the optical compartment. Always necessary for mounting one or more accessories on top of each othe.

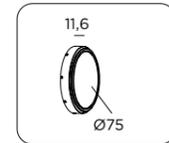

SPOT REVO COMPACT 230V accessories

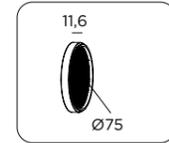

Partial rotatable glare control, necessary to shield any directional glare. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

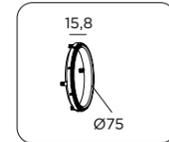

Omnidirectional glare reducer, to assist in shielding any radial glare disturbances. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

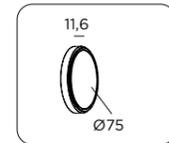

Rotatable lens to obtain the elliptical deformation of the beam, amplitude and variable characteristics depending on the chosen optical combination. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

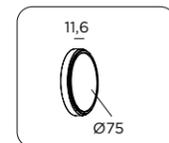

Honeycomb glare lens gives further protection from radial glare disturbances. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Primary ring that allows the housing of any accessory, to be fixed on the front of the standard ring. A primary ring is always necessary for fixing one or more overlapping accessories.

Specific lens to obtain a more diffused projection. Each accessory or group of accessories requires only one primary ring nut for installation on the optical compartment.

Additional shielding useful to prevent the accumulation of dust and residues in the optical compartment when the luminaire is used for indirect applications.

The Max version offers six symmetrical beam options from 7° to 52°, three asymmetrical wall-washer: Grazing, Area, Deep, two elliptical versions EN and EW.

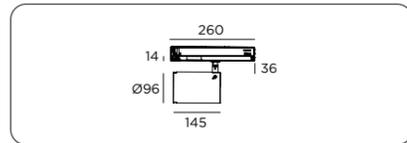

The numerous accessories in the range are designed with a fastening system with overlapping elements allowing a differentiated and specific optical configuration.

High colour rendering, medium UGR coefficient <10 and compliance with the DARK lighting parameters, are completed by the quality of the 2 SDCM light source and by the particular cleanliness of the beam projection.

The full compatibility with the most common control systems make Museo Revo Max the perfect tool in contexts where the value of the source is determined by a very high performance quality and by the minimum physical and visual intrusiveness.

Quick-lock rotation block_
high efficiency COB LED source_

Linear LED Projector for Unitrack fitted with three-way track adapter and quicklock rotation block. Manufactured from extruded aluminium alloy 6060. 350° horizontal adjustment for the 14W version only.

Liquid painted finish options include matt white, matt black and anodised grey. Fitted with microscopic polycarbonate optics.

Also available in DALI and 1-10V dimming options. Ingress protection of IP40.

MUSEO RADIUS

MUSEO RADIUS

The art of accenting art is also the art of adaptability.

Museum and gallery shows change, sometimes multiple times a year.

A luminaire that can change its programming, positioning, and accessories is art's best friend.

Visor

Secondary Louvre tool. Partial shielding shape, with external rapid-click system.

Secondary Louvre - Small

Twist and lock module, internal positioning for incrementable anti-glare.

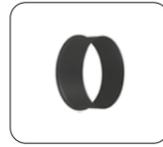

Snoot

Omnidirectional fractional collar, anti-glare system. External insertion with quick-click system.

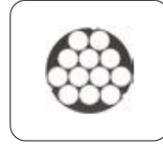

Linear spread lens Spot

Elliptical beam rotatable lens, with quick snap insertion.

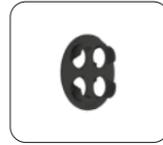

Snoot

Secondary Louvre tool. Circular shielding shape, with external rapid-click system.

Secondary Louvre - Medium

Twist and lock module, internal positioning for incrementable anti-glare.

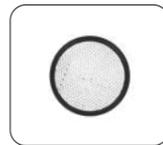

Multivisor

Directional fractional collar anti-glare system. External insertion with quick-click system.

Linear spread lens Flood

Elliptical beam rotatable lens, with quick snap insertion.

Honeycomb louvre

Honeycomb anti-glare module. Quick-snap external insertion.

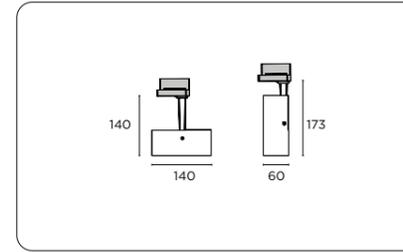

Jointed mobile head_
high efficiency COB LED source_

Compact LED Projector for Unitrack manufactured from die-cast aluminium and fitted with three-way track adapter. Finishes include matt white, matt black and concrete grey. 350° horizontal and 100° vertical adjustment. Maximum stability in pointing due to the perfect balance and the locking screw. Each fixture needs to be completed with a mirror-painted polycarbonate reflective optic including decorative ring. Accessories include a narrow optics attachment, honeycomb louvre, satin diffuser, ceiling adapter and recessed adapter. Ingress protection of IP20.

high efficiency COB LED source_

LED Projector for Unitrack manufactured from die-cast aluminium and fitted with three-way track adapter. Finishes include matt white, matt black and concrete grey. 350° horizontal and 100° vertical adjustment. Maximum stability in pointing due to the perfect balance and the locking screw. Each fixture needs to be completed with a mirror-painted polycarbonate reflective optic including decorative ring. Available beam angles include Spot, Medium, and Wide. The decorative ring is available in seven finish options. Accessories include a narrow optics attachment, honeycomb louvre, satin diffuser, ceiling adapter and recessed adapter.

M3 accessories

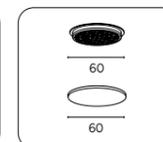

The optical zoom is an accessory with which you can continuously adjust the beam from 9° to 26°. **Optic assembly and its coloured ring should not be ordered with this accessory.**

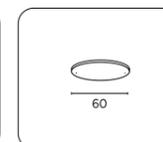

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a greater contrast between the illuminated and non illuminated area.

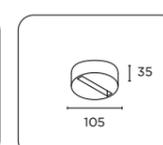

Thanks to this accessory it is possible to obtain an asymmetrically narrower and sharper beam with a greater contrast between the illuminated and non-illuminated area.

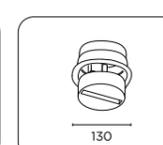

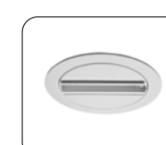

The honeycomb grid is an accessory used for the secondary louvre effect. It reduces the luminous flux by 20%.

The satin diffuser increases the diffusion of the luminous flux by widening and softening the beam of light.

Polycarbonate adapter for surfacemounted installations, ON-OFF and dimmable DALI.

Polycarbonate adapter for recessed installation, ON-OFF and dimmable DALI.

Unique 3-piece die-cast construction, design including a passing ventilation chamber,

Innovative LED spotlight design including a passive ventilation chamber that allows for a substantial reduction in operating temperature and therefore a reduction in luminaire size, with a lumen output of up to 4200lm (nom.).

Unique 3-piece die-cast construction and driver as part of the track adapter make this a truly discreet approach to track lighting.

Available in nominal 12W (1735lm), 18W (2340lm), 25W (3565lm) and 31W (4200lm) in 2700K, 3000K and 4000K in CRI95 and 3000K in CRI85. Lumen maintenance of 100000 hrs at L80B10. The optical assembly for the 12W and 18W version includes a PMMA lens, available in three beam angles: Spot, Medium and Wide. The 25W and 31W version are fitted with a highly efficient aluminium reflector and holder made from ULTEM, a specific plastic material that can withstand high temperatures. Reflector beam angles include Spot, Medium and Wide. An optional coloured ring made from translucent PMMA can be added to the optics assembly. This ring can be fitted in two positions: Completely inside the projector body or half-way outside of the body, so the light catches the translucent coloured ring. Ingress protection of IP20.

Class 1 luminaire fitted with ON-OFF or DALI track adapter available in black and white. This projector offers a unique freedom of combining colours by choosing finish options for the luminaire body, ventilation chamber and arm, track adaptor and coloured ring.

Housing finishes include matt white textured, matt black textured and concrete grey while ventilation chamber and arm finishes include an additional ocean blue, matt orange and matt green (powder coated).

Coloured rings made from PMMA are available in translucent orange, ocean blue, green or antiglare matt black. Other accessories include a honeycomb louvre, satin diffuser and new ZOOM optical accessory, for beam adjustment between 9° and 26°.

| 5) Electrical connector between upper and lower channels + end plug | 10) Spot 48 REVO Mini 1X | 15) "L" connector horizontal |

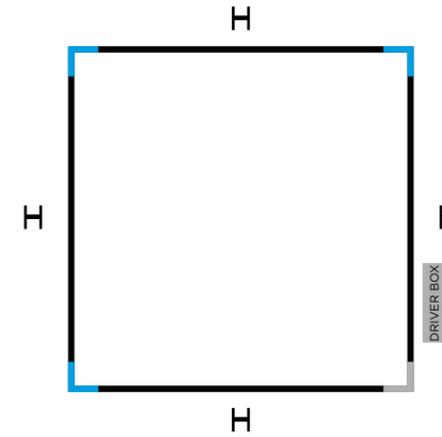

COMPOSITIONAL SUGGESTIONS

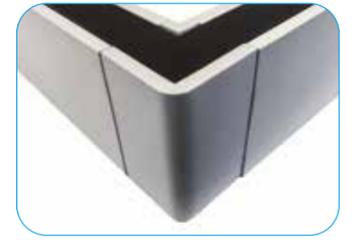

In open compositions of overlapping track 48, it is sufficient to use the simple electrical / mechanical connections.

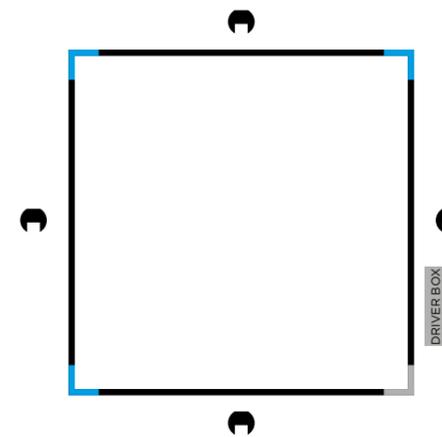

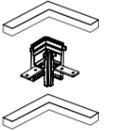

In "closed" compositions it is always recommended to use at least one mechanical connection only in order to avoid any polarity inversions.

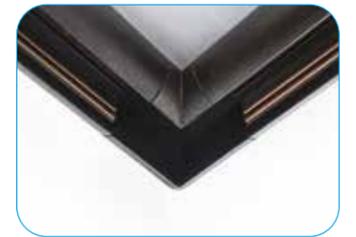

Example of closed configuration with nonoverlapping elements with TWIN track.

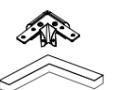

Detail of the 90° corner joint for TWIN track.

Example of closed configuration with nonoverlapping elements with TUBE track.

SUMMARY OF TRACK MODELS TRACK 48

TRACK 48 TRIMLESS

TRACK 48

TRACK 48-EVO

TRACK 48 TUBE

TRACK 48 TWIN

Three models for **ceiling installation**:

- 4 conductors - trimless recessed version (a)
- 2 conductors - square section EVO (b)
- 4 conductors - square section (c)

Four models for **suspended installation**:

- 4+4 conductors - double emission 'H' section TWIN (d)
- 2 conductors - square section EVO (e)
- 4 conductors - square section (f)
- 4 conductors - round section TUBE (g)

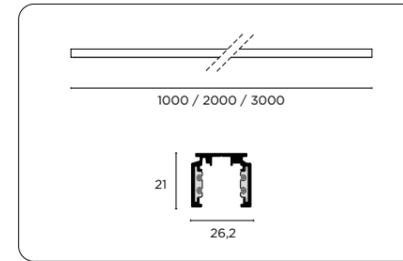

The Track is fitted with four isolated conductors_ suspended, ceiling or wall mounted application_

Suspended, ceiling or wall mounted 48V DC low voltage Track made from extruded aluminium.

Available in 1000mm, 2000mm and 3000mm length. Powder coated finishes include black and white. The ON / OFF, PUSH and DALI functions are always guaranteed only by a pair of conductors, thanks to the conveyed wave technology. The other pair of conductors can be used to obtain a possible second lighting (special codes and an additional driver are required).

Remote 48V DC power supply for ON/OFF, DALI or PUSH dimming to be ordered separately. A range of connectors, mounting systems and accessories complete this versatile 48V DC system that supports all the fittings of the Track 48 range.

TRACK 48 TRIMLESS

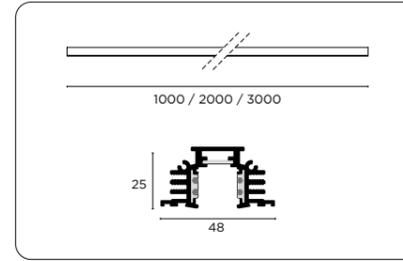

TRACK 48 Trimless is a miniature, low voltage track for trimless installations.

Manufactured from extruded aluminium, finishes include black powder coating.

The track is fitted with four isolated conductors for the power supply and two isolated conductors for dimming.

TRACK 48 Trimless

TRACK 48-EVO

TRACK 48-EVO

The Track is fitted with two isolated conductors_

Suspended, ceiling or wall mounted 48VDC low voltage Track made from extruded aluminium.

Track adaptors click in via a mechanical mechanism and can be removed from the Track by the mechanical grip, using the screw. Available in 1000mm, 2000mm and 3000mm length.

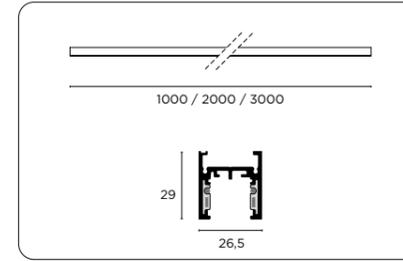

Powder coated finishes include black and white.

The Track is fitted with two isolated conductors for both power supply and dimming.

Remote 48VDC power supply for ON/OFF or DALI/PUSH dimming to be ordered separately.

This profile is suitable for the use with Track 48 luminaries.

TRACK 48-RT

The Track is fitted with four isolated conductors_ suspended, ceiling or wall mounted application _

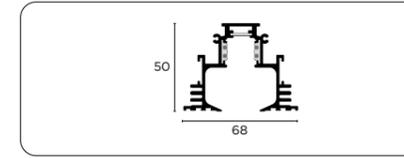

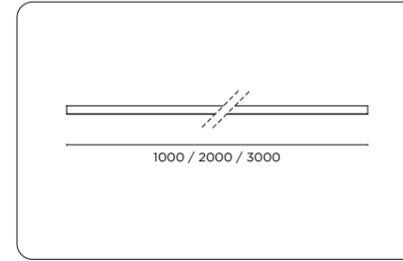

Suspended, ceiling or wall mounted 48V DC low voltage Track made from extruded aluminium.

Available in 1000mm, 2000mm and 3000mm length. Powder coated finishes include black and white.

The ON / OFF, PUSH and DALI functions are always guaranteed only by a pair of conductors, thanks to the conveyed wave technology. The other pair of conductors can be used to obtain a possible second lighting (special codes and an additional driver are required). Remote 48V DC power supply for ON/OFF, DALI or PUSH dimming to be ordered separately.

A range of connectors, mounting systems and accessories complete this versatile 48V DC system that supports all the fittings of the Track 48 range.

TRACK 48 TWIN

TRACK 48 TWIN

Low voltage 48V DC track system with "H" shaped section and double electrified channel to permit the use of light sources for indirect as well as direct lighting.

For suspended installations. Made from extruded aluminum profiles, powder painted in black and white colors. Available in 1000 mm, 2000 mm and 3000 mm lengths.

It has four insulated conductors per each channel.

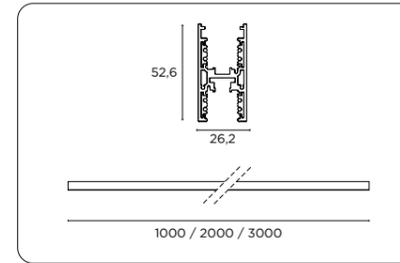

The ON/OFF, PUSH and DALI functions are always guaranteed by only two of them on each channel, by means of the conveyed waves technology.

The other pair of conductors can be used to obtain a second possible lighting circuit (special codes and an additional driver are required).

The 48V DC electronic drivers can be remotely installed, by independent box drivers or integrated into the track. Different versions are available for ON/OFF, DALI or PUSH dimming.

A whole range of connectors, mounting systems and accessories completes this versatile 48V DC system that accepts all the luminaries of the Track 48 range.

TRACK 48 TWIN

Remote driver 48V.
Maximum length from power supply to the last lighting fixture L = 30m.

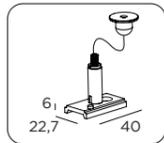

Component for the primary electrical connection (e.g. of the track with the driver). Includes an end plug.

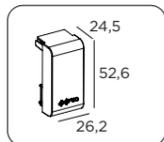

Electrical connection between the upper and the lower channel of the "H" shaped track. It is equipped with an end plug and a cabling.

TRACK 48 TWIN mounting systems

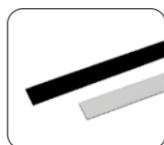

Kit composed of a 2 meter long hanger, a "griplock" and a spring for a fast suspended installation of the "H" track. No tools are required.

TRACK 48 TWIN accessories

End termination plug. It is provided with a hollow for the cables passage from a channel to the other. Plastic made, snap-on mounting.

Bottom cover. Length 1m.

TRACK 48 TWIN connectors

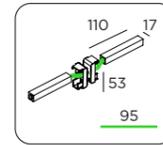

Concealed connector without feeder.

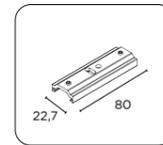

Mechanical straight angle junction, with fixing grub screws.

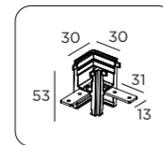

Electrical connection between "H" shaped tracks, supplied with double plug and cabling. It connects only two lines of contiguous tracks by free wiring.

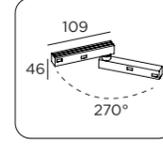

Electrical connection between "H" shaped tracks, supplied with double plug and cabling. It connects only two lines of contiguous tracks by free wiring.

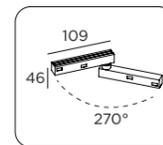

Mechanical coupler.

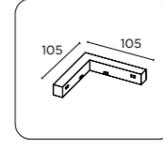

Stiff mechanical joint for 90° couplings of "H" shaped track. Complete with internal metal bracket.

Mechanical and electrical connection. Only to overlap a TWIN track. It can slide along the channels and permits to change the angle between the joint tracks up to 270°.

Mechanical connection. Only to overlap a TWIN track. It can slide along the channels and permits to change the angle between the joint tracks up to 270°.

Component for electrically connect tracks on 90° angles. To be combined with the mechanical 90° joint.

TRACK 48 TUBE connectors

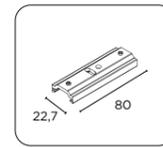

Concealed connector without feeder.

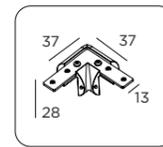

Mechanical straight angle junction, with fixing grub screws.

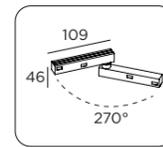

Electrical connection between "TUBE" shaped tracks, supplied with double plug and cabling. It connects only two lines of contiguous tracks by free wiring.

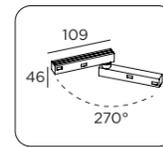

Mechanical coupler.

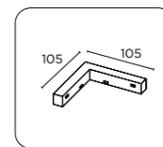

Stiff mechanical joint for 90° couplings of TUBE shaped track. Complete with internal metal bracket.

Mechanical and electrical connection. Only to overlap a TWIN track. It can slide along the channels and permits to change the angle between the joint tracks up to 270°.

Mechanical connection. Only to overlap a TWIN track. It can slide along the channels and permits to change the angle between the joint tracks up to 270°.

Component for electrically connect tracks on 90° angles. To be combined with the mechanical 90° joint.

SPOT 48 REVO

SPOT 48 REVO

LED Projectors for Track 48, Track 48 evo, Track 48 tube, Track 48 twin.

Equipped with COB high density LED sources with high color rendering and with brand-new PMMA Cross-Dark optical units for the highest visual comfort and beam uniformity.

Spot 48 Revo is available in two diameters and in two powers and it guarantees beam homogeneity and beam definition at a museum quality level.

Characterized by UGR factors always below 10, Spot 48 Revo, by means of its several accessories, becomes totally invisible and perfect where the light quality and its total control influence the project good outcome.

Completely manufactured in Italy, by numerical control machining, it has a full aluminum made body, powder painted with scratch resistant coatings.

Its body is able to provide a perfect heat dissipation as to conform to the L80B10 at 100.000 hours curve, the Mini version, and to the curve at 80.000 hours the Small version.

SPOT 48 REVO MINI accessories

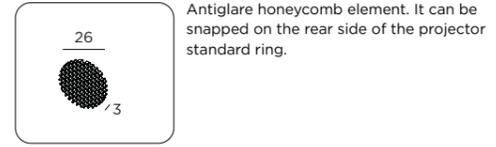

Snap-on accessory for the partial and directional reduction of the eventual glare. Can rotate of 360°. Replaces the ring supplied as standard.

Elliptical secondary lens. This holographic film must be put onto the primary optic to transform the beam in a elliptical beam. Various ellipses can be obtained depending on the chosen combinations. The lens can be rotated. Replaces the ring supplied as standard.

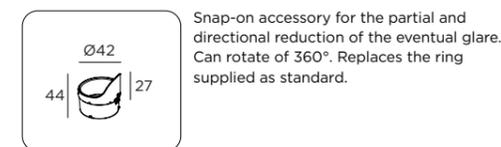

Cylindrical accessory for the omnidirectional reduction of the eventual glare. Snap-on mounting. Replaces the ring supplied as standard.

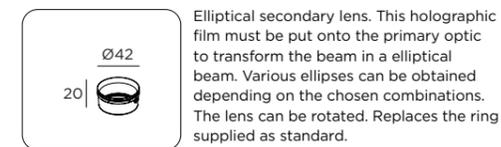

Antiglare honeycomb element. It can be snapped on the rear side of the projector standard ring.

SPEEDY

Linear LED lighting unit for the Track 48 system. To be flush installed into the track for indirect or direct lighting, it provides a soft light diffusion with a cross beam of about 120°.

The connection terminal is on one end, the other end is free and emitting light. It is available in a range of different powers and lengths, dimmable or on-off versions.

Its typical uniform and continuous emission can be refined by an additive opaline screen, in order to maximize the diffusion, or by a microprismatic screen to control the luminance when in direct lighting.

R2 48 REWALL

R2 48 REWALL

LED projector with asymmetrical wall-washer optic. With diameter 84 mm and manufactured from die-cast aluminum, it is equipped with antiluminance louver designed not to interfere in any way on the light beam and it is shaped to provide optimal performances.

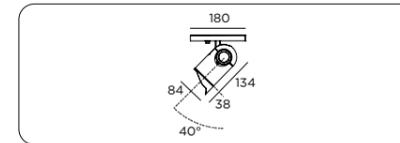

Available in two powers 13 W and 26 W, it is always dimmable by the on-board potentiometer or by DALI and Casambi protocols.

To be installed with an inclination of 40 ° on the vertical as indicated on the graduated rotor and with interdistances determined by the dimensional relationships of the environment.

Its effective and innovative polycarbonate lens guarantees a 70% lighting homogeneity, with efficiency higher than 85 lm/W and a performance maintenance longer than 100.000 hours, according to the curve L80B10.

R2 REwall, thanks to its flexibility and to its power can light walls up to 6 meters of height, with a soft and well distributed light. It can also be used for indirect lighting as a ceiling washer, because of the possibility to rotate the lens.

Unique 3-piece die-cast construction_ design including a passing ventilation chamber_

Innovative 48V LED spotlight design including a passing ventilation chamber that allows for a substantial reduction in operating temperature and therefore a reduction in luminaire size with a lumen output of up to 3565lm (nom.).

Unique 3-piece die-cast construction and 48V Track adapter make this a truly discreet approach to Track lighting. For use with Track 48 and Track 48 EVO (surface, suspended and trimless).

Available in nominal 12W (1735lm), 18W (2340lm) and 25W (3565lm) in 2700K, 3000K and 4000K in CRI95 and 3000K in CRI85. Lumen maintenance of 100,000 hrs at L80 B10. The optical assembly for the 12W and 18W version includes a PMMA lens, available in three beam angles: Spot 12°, Medium 35° and Wide 55°. The 25W version is fitted with a highly efficient aluminium reflector and holder made from ULTEM, a specific plastic material that can withstand high temperatures. Reflector beam angles include Spot 21°, Medium 36° and Wide 56°. An optional coloured ring made from translucent PMMA can be added to the optics assembly. This ring can be fitted in two positions: Completely inside the projector body or half-way outside of the body, so the light catches the translucent coloured ring. Ingress protection of IP20. Class III luminaire fitted with ON/ OFF or DALI/PUSH Track adapter available in black and white.

This projector offers a unique freedom of combining colours by choosing finish options for the luminaire body, ventilation chamber

and arm, Track adaptor and coloured ring. Housing finishes include matt white textured, matt black textured and concrete grey white ventilation chamber and arm finishes include an additional ocean blue, matt orange and matt green (powder coated). Coloured rings made from PMMA are available in translucent orange, ocean blue, green or ant glare matt black. Other accessories include a honeycomb louvre, satin diffuser and new ZOOM optical accessory, for beam adjustment between 9° and 26°.

SPOT 48 accessories

With the Narrow optic it is possible to obtain a 10° narrow beam. **Optic assembly and its coloured ring should not be ordered with this accessory.**

Optic Narrow

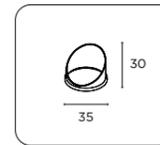

9G 317 52

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a greater contrast between the illuminated and non illuminated area.

Cut-Off

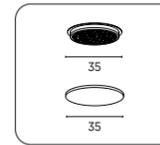

9G 049

Thanks to this accessory it is possible to obtain an asymmetrically narrower and sharper beam with a greater contrast between the illuminated and non-illuminated area.

Visor

9G 048

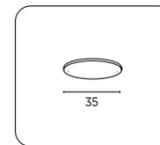

The honeycomb louvre is an accessory used for the Secondary Louvre effect. It reduces the luminous flux by 20%.

Honeycomb louvre

9G 023

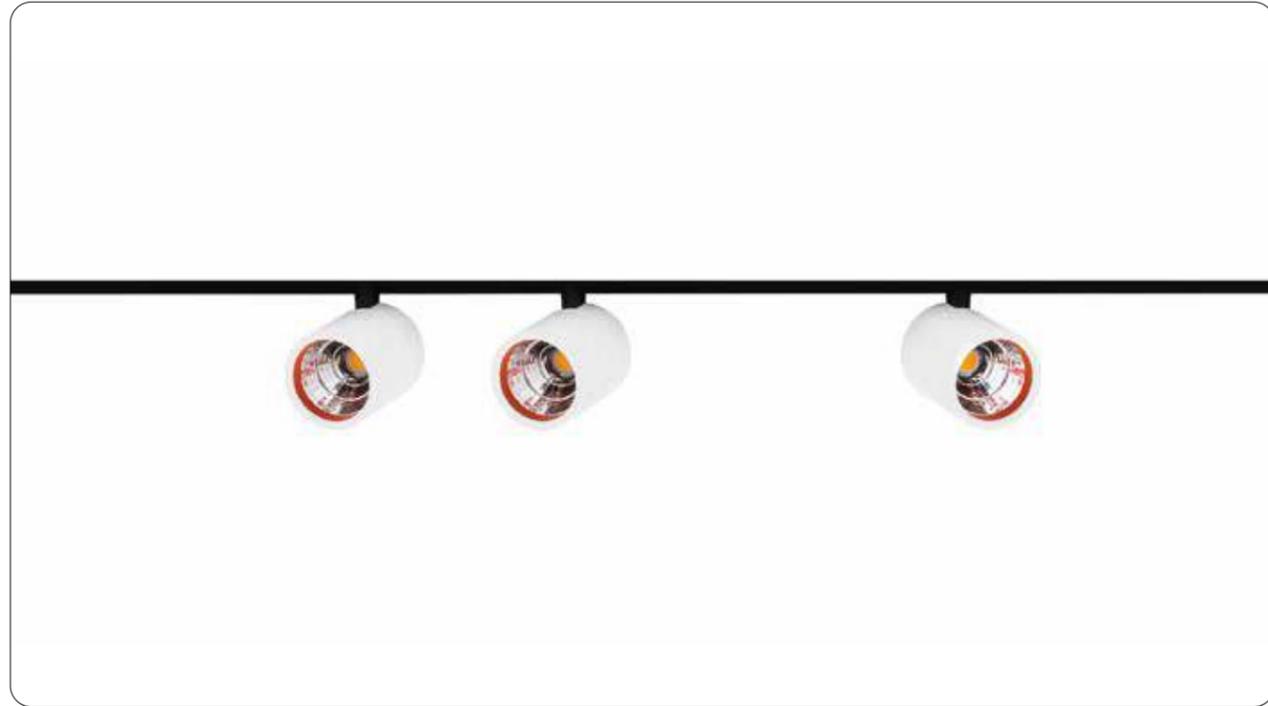

The satin diffuser increases the diffusion of the luminous flux by widening and softening the beam of light.

Satin diffuser

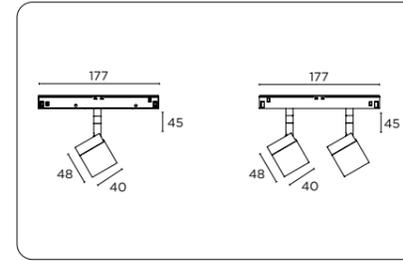

9G 024

SPOT 48-RT

Features one or two adjustable LED spots for the use on rear recessed Track 48-RT system. LED spots can be adjusted 350° horizontally and +/-90° vertically. Finishes include matte white, matte black and concrete grey. Each spot needs to be completed with the desired optics assembly including clouded ring (to be ordered separately). ON-OFF or DALI/PUSH dimming versions available. Lumen maintenance of 100.000 hrs at L80B10.

SPOT PLUS 48 accessories

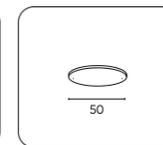

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a greater contrast between the illuminated and non illuminated area.

Thanks to this accessory it is possible to obtain an asymmetrically narrower and sharper beam with a greater contrast between the illuminated and non-illuminated area.

The honeycomb grid is an accessory used for the Secondary Louvre effect. It reduces the luminous flux by 20%.

The satin diffuser increases the diffusion of the luminous flux by widening and softening the beam of light.

SPOT PLUS 48-RT

Features one or two adjustable LED spots for the use on rear recessed Track 48-RT system.

LED spots can be adjusted 350° horizontally and +/-90° vertically. Finishes include matte white, matte black and concrete grey. Each spot needs to be completed with the desired optics assembly including cloured ring (to be ordered separately).

ON-OFF or DALI/PUSH dimming versions available.

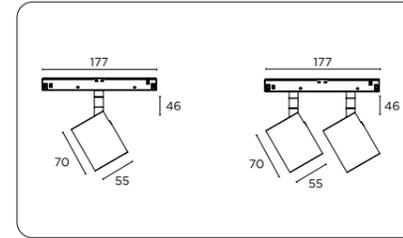

Lumen maintenance of 100.000 hrs at L80B10.

DRIVER BOX

Power supply kits with dedicated boxes in various powers and types of use, for 48V track.
 Available in versions on-off or DALI or with wireless control also under Casambi protocol.
 With their three different dimensions and four offered wattages and their configurations settable to suit different needs, these supply kits are indispensable elements to complete the installation and to achieve its maximum simplification.
 The models for integrated mounting into the track permit installations with completely hidden cablings.

LED RUNNER

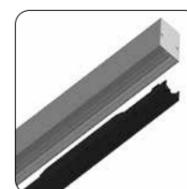

Mechanic Joint

The basic segment of the LED Runner system can be mechanically joined together by a galvanized iron plate to be ordered as an accessory

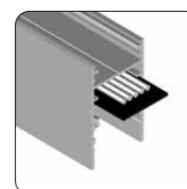

Bottom Cover

The basic segment of the LED Runner system can be closed in the lower part through an aluminum cover or opal/microprismatic diffusers to be ordered separately.

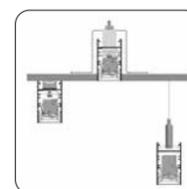

Installation Led Lighting Units

The LED lighting segments can be installed anywhere on the aluminum profile, far from one another, or in a continuous line.

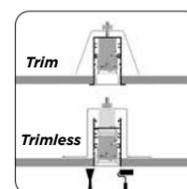

Electrical Cables Supports

The basic segments of the LED Runner system have some springs, that help to support the electrical cables inside the profile base. These supports help assemble the various light units upon installation.

Applications

The LED Runner system can be installed as Ceiling, Suspension and Recessed through the accessory brackets. The LED Runner system (Trimless version) can be installed as suspension through the appropriate steel cables provided as accessory. The units of the LED Runner system and the "L" connector (Trimless version) can be installed directly to the ceiling by a bracket to be ordered as an accessory.

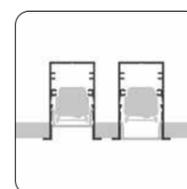

Recessed Installation

The false ceiling must be cut at the measure indicated on the assembling instructions, inserting the accessory brackets for the installation of the aluminum profile. For the Trimless version the false ceiling must be flattened later on for a perfect installation.

Wall To Wall Installation

The LED Runner system (Trimless version) can be installed Wall to Wall through the appropriate "L" brackets provide as accessory, they permit to support the profile without any suspension cables. This application permits to install profile with length up to 6m (White or Black) and up to 4,50m (Grey). The LED Runner system (Trimless version) can be installed Wall to Ceiling through the appropriate "L" brackets provide as accessory and suspension cables.

Diffusers

In the Trim version of the LED Runner system, the opal/microprismatic diffusers can be also installed 1 cm inward.

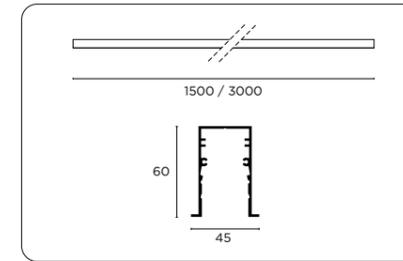

LED RUNNER TRIM

Available in Trim and Trimless versions_ system as ceiling, suspension or recessed_

The LED Runner system is made in extruded aluminum and available in Trim and Trimless versions, both profiles are in anodized grey or in matt white or matt black varnish. They are available in two different lengths and they can be easily joined by the specific brackets to create any form of system as ceiling, suspension or recessed application. In the Runner it is possible to install a wide range of LED products. The basic segments of LED RUNNER system can be cut at the desired length directly in our factory.

LED RUNNER SPOT accessories

With the Narrow optic it is possible to obtain a 10° narrow beam.
Optic assembly and its coloured ring should not be ordered with this accessory.

Optic Narrow

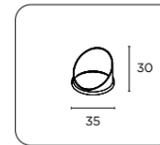

9Q 317 52

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a greater contrast between the illuminated and non illuminated area.

Cut-Off

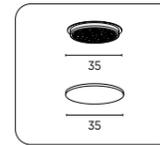

9G 049

Thanks to this accessory it is possible to obtain an asymmetrically narrower and sharper beam with a greater contrast between the illuminated and non-illuminated area.

Visor

9G 048

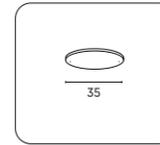

The honeycomb grid is an accessory used for the anti-glare effect. It reduces the luminous flux by 20%.

Honeycomb louvre

9G 023

The satin diffuser increases the diffusion of the luminous flux by widening and softening the beam of light.

Satin diffuser

ACCADEMIA accessories

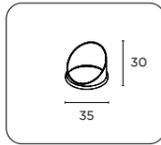

With the Narrow optic it is possible to obtain a 10° narrow beam. **Optic assembly and its coloured ring should not be ordered with this accessory.**

Optic Narrow
9Q 317 52

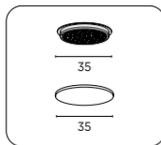

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a greater contrast between the illuminated and non illuminated area.

Cut-Off
9G 049

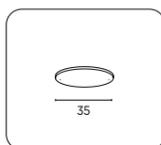

Thanks to this accessory it is possible to obtain an asymmetrically narrower and sharper beam with a greater contrast between the illuminated and non-illuminated area.

Visor
9G 048

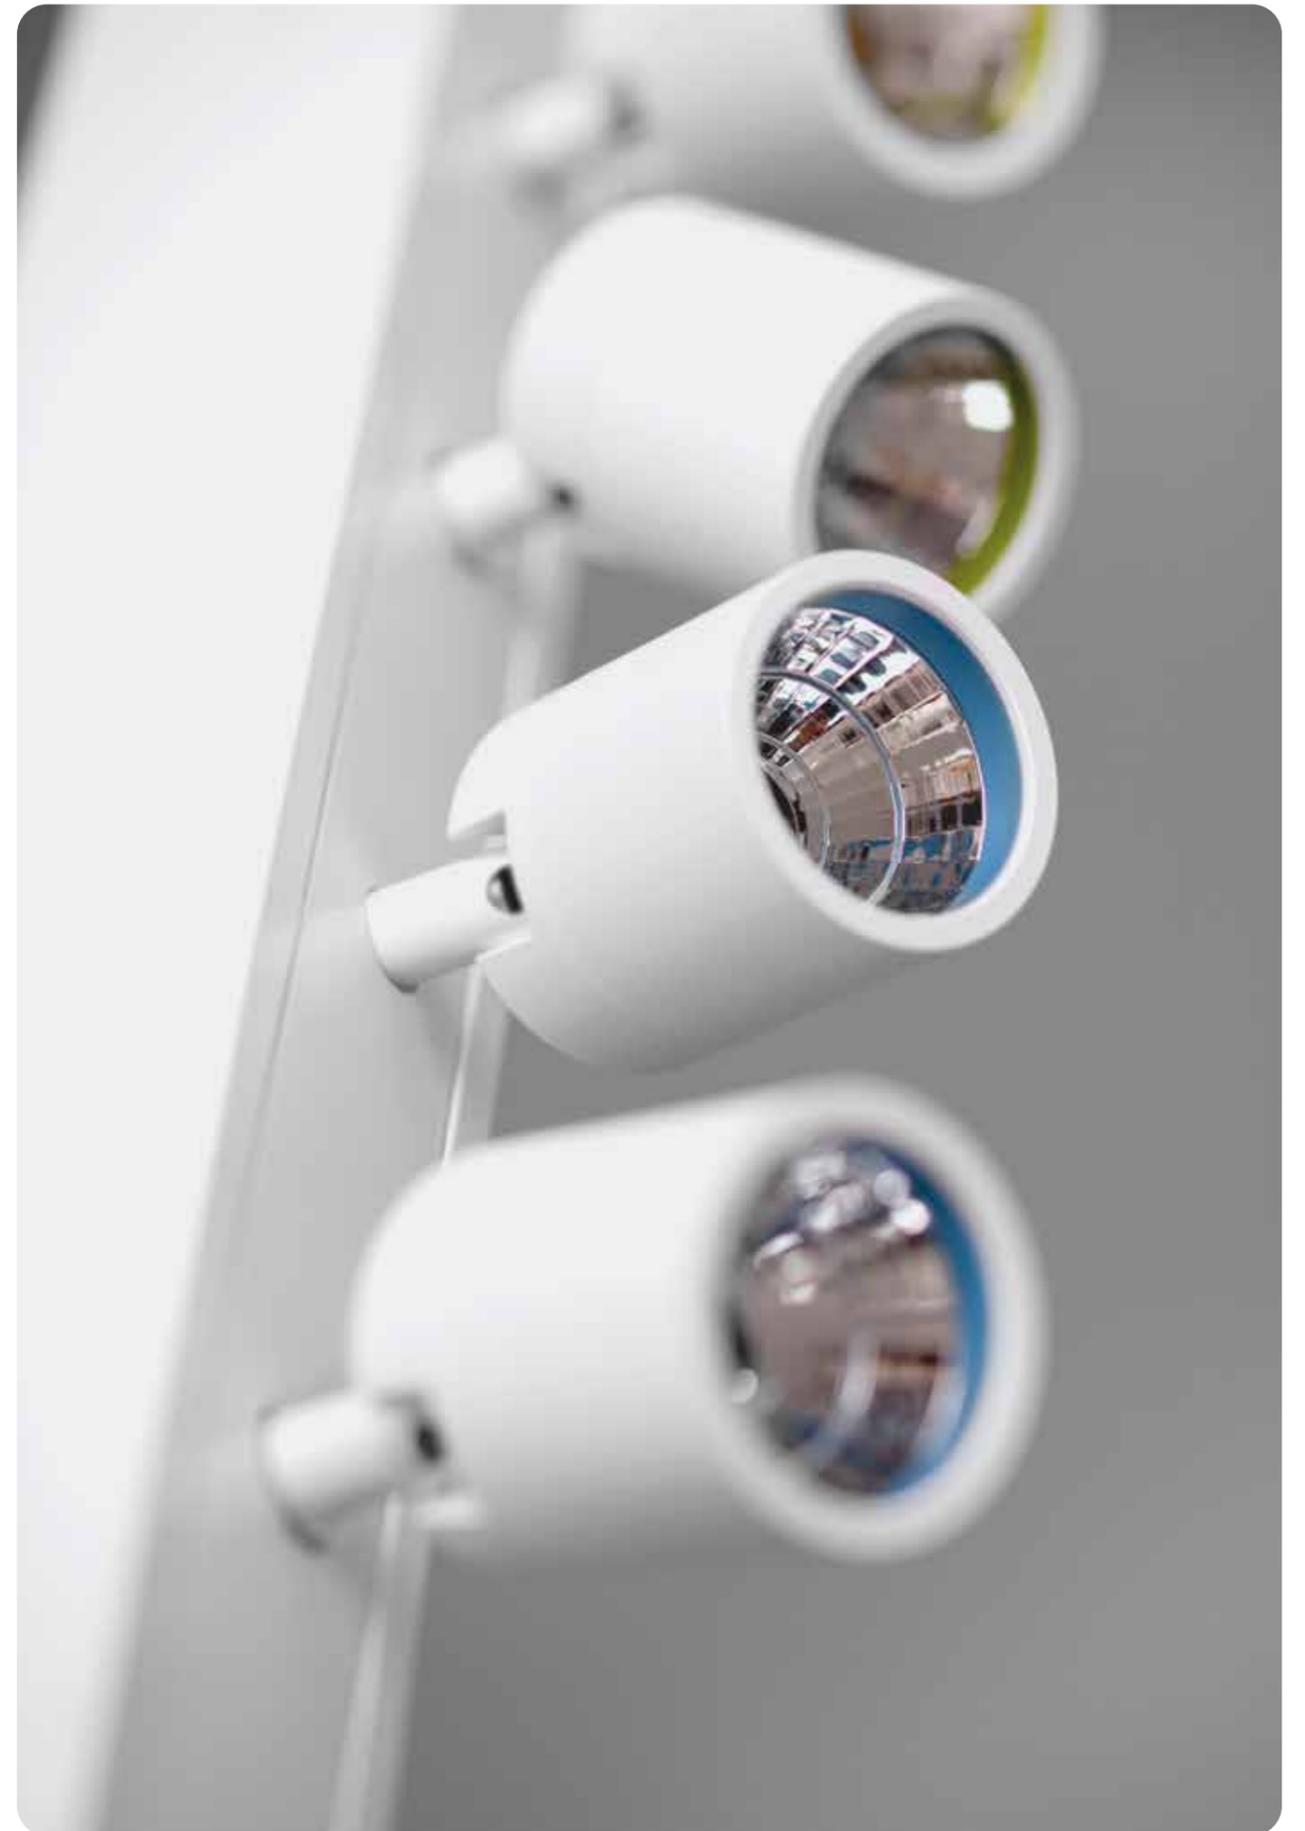

The honeycomb grid is an accessory used for the anti-glare effect. It reduces the luminous flux by 20%.

Honeycomb louvre
9G 023

The satin diffuser increases the diffusion of the luminous flux by widening and softening the beam of light.

WOLF BASE

WOLF BASE

A+ $\frac{1}{2}$ IP₆₆ IK₀₈ $\frac{1}{2}$ 0.60 0.3m

LED base projector with integral power supply_

LED base projector with body in die-cast aluminium and glass sealed optical chamber.

Luminaire head allows for 305° rotation and 135° tilt. Available with nominal 7W and 13W in 2700K, 3000K or 4000K in CRI95 or 3000K in CRI85. Lumen maintenance of 115,000 hrs at L80 B10.

Natural powder coat finish options include carbon grey, mud brown, matt sand, matt white textured and rust effect.

Optics choices include Spot, Flood, Medium and Wide. WOLF is available with a range of optical accessories including honeycomb louvre (factory fitted) as well as coloured ring, snoot, visor and adjustable elliptical lens accessory 14°x60° (field changeable and to be ordered separately).

Coloured rings are made from UV resistant PMMA and are available in translucent orange, translucent blue, translucent green and neutral. Ingress protection of IP66. Class I luminaire including ON/OFF power supply fitted in the base.

WOLF BASE accessories

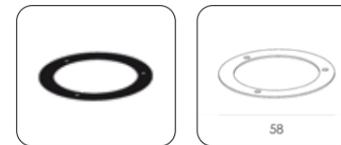

Colored polycarbonate decorative ring in paste, translucent appearance.

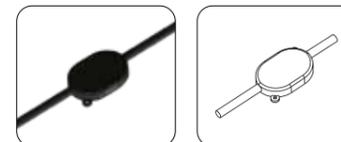

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a strong contrast between the illuminated and unlit area.

Thanks to this accessory it is possible to obtain an asymmetrically narrower and sharper beam with a greater contrast between the illuminated and non-illuminated area.

With this accessory you can obtain a narrow beam with an elliptical 18°x40° shape.

With this accessory, you can create connections while ensuring IP68 grade protection.

LED projector with remote power supply_

LED projector with body in die-cast aluminium and glass sealed optical chamber. To be specified with remote power supply and a choice of wall mount, tree mount or stake mount options.

The luminaire head allows for 305° rotation and 135° tilt. Available with nominal 7W (840lm) or 13W(1690m) in 2700K, 3000K or 4000K in CRI95 or 3000K in CRI85. Lumen maintenance of 115,000 hrs at L80 B10.

Natural powder coat finish options include carbon grey, mud brown, matt sand, matt white textured and rust effect.

Optics choices include Spot (15° for 7W and 19° for 13W), Flood (21° for 7W and 25° for 13W), Medium (32° for 7W and 37° for 13W) and Wide (38° for 7W and 54° for 13W). WOLF is available with a range of optical accessories including honeycomb louvre (factory fitted) as well as coloured ring, snoot, visor (field changeable and to be ordered separately).

Coloured rings are made from UV resistant PMMA and are available in translucent orange, translucent blue, translucent green and neutral. Ingress protection of IP66. Class III luminaire for use with remote ON/OFF or DALI power supply.

WOLF accessories

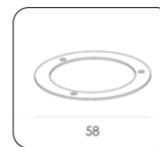

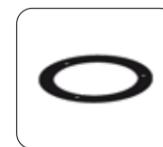

Colored polycarbonate decorative ring in paste, translucent appearance.

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a strong contrast between the illuminated and unlit area.

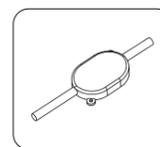

Thanks to this accessory it is possible to obtain an asymmetrically narrower and sharper beam with a greater contrast between the illuminated and non-illuminated area.

With this accessory you can obtain a narrow beam with an elliptical 18°x40° shape.

IP₆₈

With this accessory, you can create connections while ensuring IP68 grade protection.

CACTUS

Pole mount system to use with WOLF LED projector_

Pole mount system to use with WOLF LED projector for surface and wall mount installations.

The CACTUS pole is available in three standard lengths of 600mm, 1000mm and 2000mm. Up to three WOLF LED projectors can be fitted on the CACTUS pole for 1000mm and 2000mm.

Up to two LED projectors can be fitted on the 600mm CACTUS.

Natural powder coat finish options include carbon grey, mud brown, matt sand, matt white textured and rust effect.

A range of external drivers and accessories is available for this range to enable ON/OFF and DALI dimming.

The DC-CC (constant current) product version is suggest:

- when is not possible use electrical cable more than 1,5mm² and only the fixture's wire can be used.
- when with a single power supply have to manage up to 3 fixtures.
- for the distance power supply- product up to 15 meters.

TRIPO WALL

TRIPO WALL

IP₆₅ $\frac{1}{2}$ IK₀₈ $\frac{1}{2}$ 0.3m

Discrete luminaire with 120° or 360° beam distribution_

Triangular shaped wall luminaire fitted with a LED board for a wide 120° beam distribution. Also available with PMMA sphere for omnidirectional light distribution.

Sturdy construction in aluminum and steel, with high adhesion powder coating. The structure is designed to be robust and lightweight, easily reconcilable into the surrounding environment.

The accessory sphere, installed at the factory, gives the fixture night-time visibility, transforming it from a mimetic light source into a signal and a presence.

Available in powers from 6W (550lm) or 9W (1020lm) in 2700K, 3000K or 4000K in CRI95. Lifetime of 45,000 hours at L80 B10.

The powder-coated finish options include natural and textured colors such as charcoal gray, mud brown, matt sand, warm white and rust effect. Protection grade IP65.

As an alternative to the diffusing sphere, a shielding accessory is available to transform the emission by partializing it and the aesthetics of the product, giving it a strongly decorative and atmospheric appearance.

Up to three covers can be used per appliance. CRC supplementary treatment, suggested in environments subject to extreme conditions, is available upon request.

TRIPO SMALL 300 / MEDIUM 600 / LARGE 800

Discrete luminaire with 120° or 360° beam distribution_

Bollard with triangular structure, 800, 600, 300 mm high for ground and wall mounting, equipped with LED board and watertight diffuser, with 120 ° emission beam.

Also available with PMMA sphere for omnidirectional light distribution. Sturdy construction in aluminum and steel, with high adhesion powder coating. The structure is designed to be robust and lightweight, easily reconcilable into the surrounding environment.

The accessory sphere, installed at the factory, gives the fixture night-time visibility, transforming it from a mimetic light source into a signal and a presence. Available in powers 6W (550lm) or 9W (1020lm) for AC version, and 4.5W (450lm) or 8W (750lm) in 2700K, 3000K or 4000K in CRI85 for CV version. Lifetime of 45,000 hours at L80 B10.

The powdercoated finish options include natural and textured colors such as charcoal gray, mud brown, matt sand, warm white and rust effect.

Protection grade IP65. As an alternative to the diffusing sphere, a shielding accessory is available to transform the emission by partializing it and the aesthetics of the product, giving it a strongly decorative and atmospheric appearance.

Up to three covers can be used per appliance.

CRC supplementary treatment, suggested in environments subject to extreme conditions, is available upon request.

Configurable system with flexible FLEUR_

Versatile lighting system for diffused and accent lighting needs, completely mimetic.

FLEUR is constituted by flexible stems with reinforced terminals in powder-painted brass and steel.

The LED lighting elements can be configured as a projector, available in Spot 14 °, Medium 25 ° or Wide 40 °, or with a spherical or conical diffuser for omnidirectional lighting.

Each stem hosts a nominal Led 1.2W (120lm) in 2700K, 3000K or 4000K in CRI85, with a lifetime of 100,000 hours at L80 B10. Mounting options for FLEUR include picket, tree, recessed and surface installation.

FLEUR recessed and surface versions are available with two or three individually configurable stems, while the picket and tree versions are configured with a single stem.

The brass and steel mounting base and the optical assemblies are available in a selection of powder paint finishes including charcoal gray, mud brown, sand and corten.

The FLEUR stems are coated with a high-strength hazelnut textile sheath.

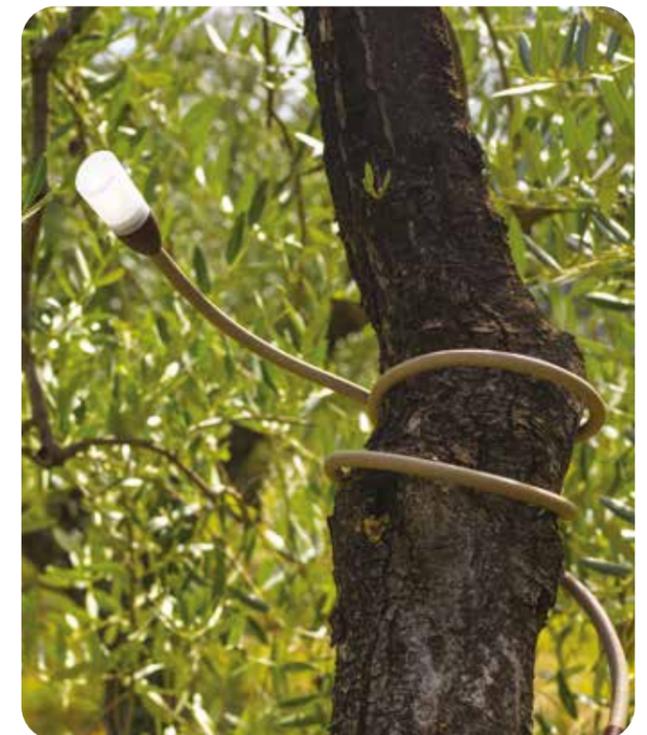

Degree of protection IP65. Class III device with a selection of remote drivers.

BRICK SMALL

Opal polycarbonate diffuser_
high efficacy LED light source_

LED wall-mounted luminaire with an opal polycarbonate diffuser. Interchangeable optical accessories are available to create a Spot (16°), Medium (31°) and Wide (58°) beam.

An adjustable ceiling-mounting bracket for 90° horizontal or vertical adjustment is also available, as well as a surface-mount box for concrete or brick mounting.

Available as standard in 3000K, CRI85. CRI95, 2700K and 4000K are available upon request. Ingress protection of IP55.

Miniature form factor_
High efficacy LED light source_

Compact round LED wall marker luminaire with a diameter of only 40mm. Aluminium housing with powder coat finish in carbon grey, matt white textured or rust effect.

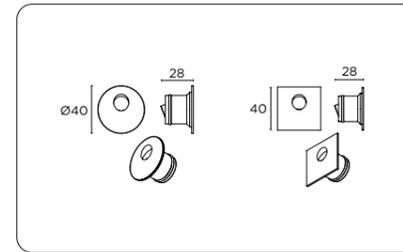

Available in 2700K, 3000K and 4000K in CRI85. Nominal power consumption of 1.2W (120lm).

Lumen maintenance of 100,000 hrs at L80 B10. Fitted with LED light source and frosted lens for an even light distribution. Luminaire to be installed with a blackout accessory (to be ordered separately). Ingress protection of IP67.

Class III luminaire to be used with remote On/Off power supply.

Aluminum and tempered glass_
high efficiency SMD LED source_

Ceiling or wall mounted SMD luminaire with omni-directional, diffused light distribution and a diameter of 130mm. The luminaire consists of a die-cast base, combined with tempered glass.

Available with nominal 6W (550lm) or 9W (1020lm) light source in 2700K, 3000K or 4000K in CRI95. Lumen maintenance of 50,000 hrs at L80 B10.

Mix and match finishes for the base and the coloured ring accessory, choosing from five colour choices: carbon grey, mud brown, matt sand, matt white textured and rust effect.

A corrosion resistant coating (CRC) is available on request. Ingress protection of IP66.

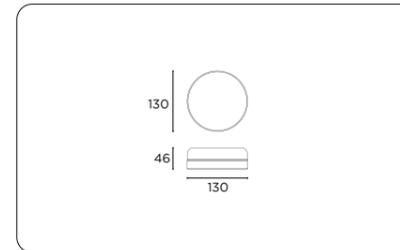

Class I luminaire with integral ON/OFF power supply, dimmable via PHASE CUT dimmer.

Diffused 120° light distribution_ dimmable via PHASE CUT_ high efficiency LED source_

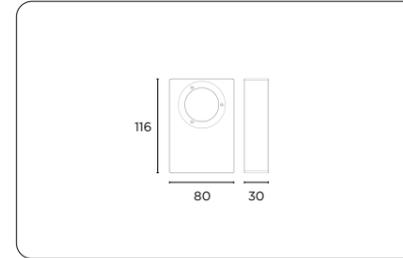

Wall mounted LED luminaire with diffused 120° light distribution manufactured from die-cast aluminium. Available with nominal 4,5W (450lm) light source in 2700K, 3000K or 4000K in CRI95.

Lumen maintenance of 50.000 hrs at L80 B10.

Ingress protection of IP65. Class I luminaire with integral ON/OFF power supply, dimmable via PHASE CUT dimmer.

Body finishes include carbon grey, mud brown, matt sand, matt white textured and rust effect. A corrosion resistant coating (CRC) is available on request.

PLAY SQUARE UP OR DOWN

Sealed optical chamber and high efficient LED light source_

Square LED wall luminaire with single LED light source for either up or down light distribution. Die-cast aluminium body and glass sealed optical chamber. Available with nominal 5W (635lm) in 2700K, 3000K or 4000K in CRI95 or 3000K in CRI85. Lumen maintenance of 115,000 hrs at L80 B10.

Natural powder coat finish options include carbon grey, mud brown, matt sand, matt white textured and rust effect. Optics choices include Spot, Flood, Medium and Wide.

PLAY is available with a range of optical accessories including honeycomb louvre (factory fitted) as well as coloured ring, snoot, visor and adjustable elliptical lens accessory 18°x40° (field changeable and to be ordered separately).

Coloured rings are made from UV resistant PMMA and are available in translucent orange, translucent blue, translucent green and neutral. An external cover accessory is also available to order separately. This accessory covers the luminaire entirely so that the LED light source is deep recessed behind the cover. This creates a sharp beam cut off and a more decorative look of the luminaire. Additional finish options include copper textured, gold textured and dark bronze. Ingress protection of IP67. Class I luminaire including ON/OFF power supply.

Thanks to this accessory it is possible to obtain a narrow and sharp beam, with a greater contrast between the illuminated and non illuminated area.

Cut-Off	
9G 050	

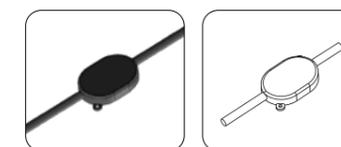

Thanks to this accessory it is possible to obtain an asymmetrically narrower and sharper beam with a greater contrast between the illuminated and non-illuminated area.

Visor	
9G 051	

With this accessory you can obtain a narrow beam with an elliptical 18°x40° shape.

Elliptical lens	
9G 052	

only for Spot optics

With this accessory, you can create connections while ensuring IP68 grade protection.

Connector	
9G 065	3x1 mmq - 2 outputs

TRIM CC

Compact form factor_
Choice of four beam angles_

Compact round LED inground luminaire with a diameter of 65mm and a recessed depth of 60mm. Stainless steel housing.

Available in 2700K, 3000K and 4000K in CRI85. Nominal power consumption of 4W (410lm). Lumen maintenance of 50,000 hrs at L80 B10.

Available with four optics choices: Narrow flood, Medium, Wide and Ellipse. Luminaire to be installed with a blackout accessory (to be ordered separately). Suitable for walk over installations with a max. weight of 1000kg. Ingress protection of IP67.

Class III luminaire to be used with remote On/Off power supply (constant current max 350mA).

PROTECTION LEVEL

The **IP** (International Protection - IEC standard 60529) standard establishes the resistance of a product against the intrusion of solid particles (such as parts of the body and dust) as well as liquids.

The **IP** - - code is followed by two digits according to the table, the first refers to the intrusion of solid bodies, the second to the degree of protection against liquid penetration.

 FIRST digit SOLID OBJECTS value 0 - 6	 SECOND digit LIQUID OBJECTS value 0 - 8
IP 0- No protection against contact and ingress of objects	IP - 0 No protection against contact and ingress of liquid
IP 1 - Any large surface of the body, such as the back of a hand, but no protection against deliberate contact with a body part >50 mm	IP - 1 Vertically dripping water shall have no harmful effect when the enclosure is tilted at an angle of 15° from its normal position. A total of four positions are tested within two axes. Dripping water.
IP 2 - Fingers or similar objects >12.5 mm	IP - 2 Vertically dripping water shall have no harmful effect when the enclosure is tilted at an angle of 15° from its normal position. A total of four positions are tested within two axes. Dripping water when tilted at 15°.
IP 3 - Tools, thick wires, etc >2.5 mm	IP - 3 Water falling as a spray at any angle up to 60° from the vertical shall have no harmful effect, utilizing either: a) an oscillating fixture, or b) A spray nozzle with a counterbalanced shield. Spraying water.
IP 4 - Most wires, slender screws, large ant etc. >1 mm	IP - 3 Water falling as a spray at any angle up to 60° from the vertical shall have no harmful effect, utilizing either: a) an oscillating fixture, or b) A spray nozzle with a counterbalanced shield. Spraying water.
IP 5 - Ingress of dust is not entirely prevented, but it must not enter in sufficient quantity to interfere with the satisfactory operation of the equipment.	IP - 4 Water splashing against the enclosure from any direction shall have no harmful effect, utilizing either: a) an oscillating fixture, or b) A spray nozzle with no shield. Splashing of water.
IP 6 - No ingress of dust; complete protection against contact (dust tight). A vacuum must be applied. Test duration of up to 8 hours based on air flow.	IP - 5 Water projected by a nozzle (6.3 mm) against enclosure from any direction shall have no harmful effects. Water jets.
	IP - 6 Water projected in powerful jets (12.5 mm nozzle) against the enclosure from any direction shall have no harmful effects. Powerful water jets.
	IP - 7 Ingress of water in harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time (up to 1 m of submersion). Immersion, up to 1 m depth.
	IP - 8 The equipment is suitable for continuous immersion in water under conditions which shall be specified by the manufacturer. However, with certain types of equipment, it can mean that water can enter but only in such a manner that it produces no harmful effects. Immersion, 1 m or more depth.

PROTECTION CLASS

The electrical insulation classes are the homogeneous grouping defined by the IEC (International Electrotechnical Commission) which refers to the tech-

nical specifications that are applicable to an electric device to limit the risk of electrocution resulting from a failure of the system.

CLASS	DESCRIPTION
0	These appliances have no protective-earth connection and feature only a single level of insulation between live parts and exposed metal-work. If permitted at all, Class 0 items are intended for use in dry areas only. A single fault could cause an electric shock or other dangerous occurrence, without triggering the automatic operation of any fuse or circuit breaker. Sales of such items have been prohibited in much of the world for safety reasons, for example in the UK by Section 8 of The Low Voltage Electrical Equipment (Safety) Regulations 1989 and New Zealand by the Electricity Act. However, equipment of this class is common in 110V countries, and in much of the 220V developing world, whether permitted officially or not. These appliances must have their chassis connected to electrical earth.
I 	These appliances must have their chassis connected to electrical earth (US: ground) by a separate earth conductor (coloured green/yellow in most countries, green in the US, Canada and Japan). The earth connection is achieved with a 3-conductor mains cable, typically ending with 3-prong AC connector which plugs into a corresponding AC outlet. The basic requirement is that no single failure can result in dangerous voltage becoming exposed so that it might cause an electric shock and that if a fault occurs the supply will be removed automatically (this is sometimes referred to as ADS = Automatic Disconnection of Supply). A fault in the appliance which causes a live conductor to contact the casing will cause a current to flow in the earth conductor. If large enough, this current will trip an over-current device (fuse or circuit breaker (CB)) and disconnect the supply. The disconnection time has to be fast enough not to allow fibrillation to start if a person is in contact with the casing at the time. This time and the current rating in turn sets a maximum earth resistance permissible. To provide supplementary protection against high-impedance faults it is common to recommend a residual-current device (RCD) also known as a residual current circuit breaker (RCCB), ground fault circuit interrupter (GFCI), or residual current operated circuit-breaker with integral over-current protection (RCBO), which will cut off the supply of electricity to the appliance if the currents in the two poles of the supply are not equal and opposite.
II 	A Class II or double insulated electrical appliance is one which has been designed in such a way that it does not require a safety connection to electrical earth (ground). The basic requirement is that no single failure can result in dangerous voltage becoming exposed so that it might cause an electric shock and that this is achieved without relying on an earthed metal casing. This is usually achieved at least in part by having at least two layers of insulating material between live parts and the user, or by using reinforced insulation. In Europe, a double insulated appliance must be labelled Class II or double insulated or bear the double insulation symbol (a square inside another square). Insulated AC/DC power supplies (such as cell-phone chargers) are typically designated as Class II, meaning that the DC output wires are isolated from the AC input. The designation "Class II" should not be confused with the designation "Class 2", as the latter is unrelated to insulation (it originates from standard UL 1310, setting limits on maximum output voltage/current/power).
III 	A Class III appliance is designed to be supplied from a separated/safety extra-low voltage (SELV) power source. The voltage from a SELV supply is low enough that under normal conditions a person can safely come into contact with it without risk of electrical shock. The extra safety features built into Class I and Class II appliances are therefore not required. For medical devices, compliance with Class III is not considered sufficient protection, and further more-stringent regulations apply to such equipment.

UGR IN EXENIA PRODUCTS

The UGR index - Unified Glare Rating - defines the level of irritating glare, produced by the light illuminating a room. The index is defined by many

factors which depend on the kind of the fixtures (the emitting surface of the device in relation to the flux play an important role) and the installation

environment since the finishes of the walls, the floor, the location of the furnishings, the presence of windows play a role as well.

The value is the result of the following equation:

$$UGR = 8 \log_{10} \left(\frac{0,25}{L_b} \sum_{N_a} \frac{L^2 \omega}{\rho^2} \right)$$

"Lb" and "L2" are respectively the luminance of the background and the luminance of the luminous parts of each fixture, "ω" is the solid angle subtended by the same, "ρ" is the Guth position index (function of the longitudinal distance between the human eye, the transverse plane of the source and the transverse distance between the eye and the longitudinal plane of the source).

Although today the assessment of the irritating glare level can be processed by means of a lighting design software, the above-mentioned equation can immediately point out that when defining the UGR parameter, we can consider the background luminance, the overall luminance of the installed fixtures that are in the same field of view by taking into account the solid angle of view of the observer and the position of the devices in relation to the observer.

Making it easier, the luminance is a ratio that considers the light reaching our eyes by reflection from an illuminated surface and the light that comes from an emitting surface. The luminance depends on the intensity of the source and from the apparent area of the surface directed to the observer. It is clear that the luminance value always depends on the observer position with respect to the lighting source.

The regulations which define the UGR value are in the indoor lighting UNI EN 12464-1 2011, CIE publication 117 standards.

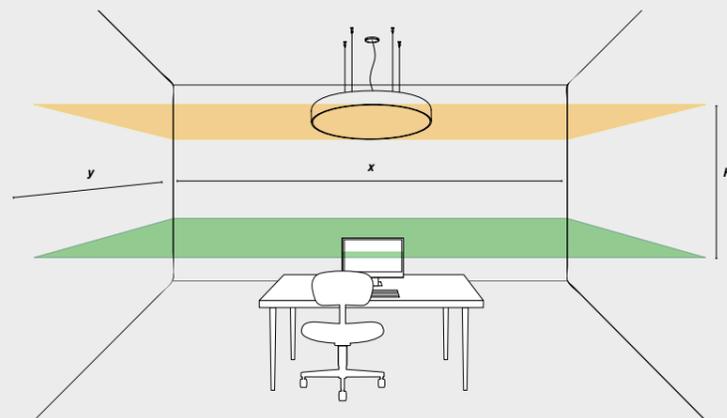

The UGR scale can be considered for minimum values that start at 10 (no glare), up to 30 (high glare). The UGR limits are given every three units (10, 13, 16, 19, 22 etc.) since every three units there is a change to a different class in

accordance with the standard, Some fixtures of our range of products have reference values of the indexes according to the UGR tabular method for reflection coefficients 752 (0.7 ceiling, 0.5 walls, 0.2 floor) which consider X = 4H, Y = 2H as room dimensions (H is the height difference between the eye and the light sources).

We would like to remind that these values are samples and valid only in case of use of fixtures which are:

- installed in rectangular rooms;
- installed together with other fixtures of the same type and the same level;
- symmetrical and arranged in parallel to the wall.

For further information or evaluations, we recommend making a simulation by means of a lighting design software.

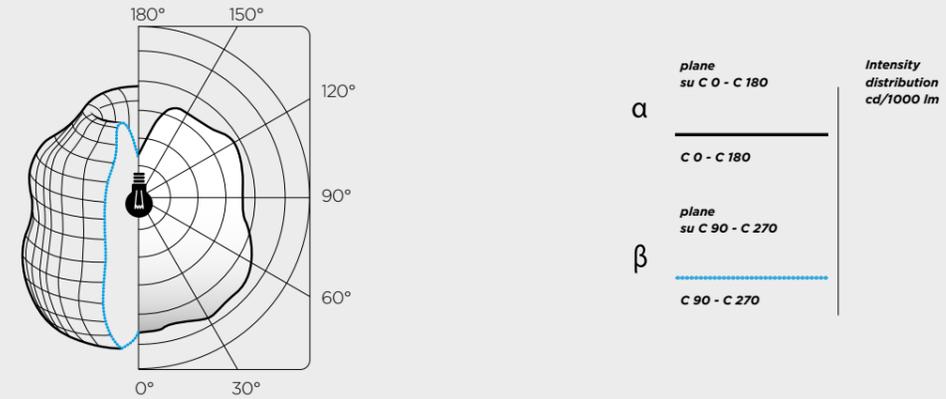

PHOTOMETRIC DATA

In this catalogue, each product has the polar diagrams reported for each power and beam combination. For ease of reference, the representations of the distributions

on international reference levels (CO-C180 and C90-C270) have been summarized for different fixtures with the same distribution of light intensities. For symmetri-

cal and rotosymmetrical fixtures only one curve is represented. For multiple optics products, the photometry should be repeated for the number of units.

The luminous intensities shown in the diagrams are the relative intensities, therefore, to be multiplied by the flux value of the fixture expressed in klm.

Polar curves are only the initial tool to identify the behaviour and the lighting performance in the preliminary stages of each project. After that, the elum-

dat file should be thoroughly analysed. The elumdat file can be downloaded for each fixture code at our website www.exenia.eu.

INFO

LED LIFE

Each of our products is studied and tested in peyorative conditions in order to obtain an optimal ratio between operating temperatures and light emission of the diodes, it is understood that each power decrease will make possible the extension of the corresponding 'Lifetime'.

LED KEY FEATURES

The EXENIA products in the catalogue use LED lights of the leading brand in the industry, such as CITIZEN™, PANASONIC™, CREE™ and LUMILEDS™.

In addition, Exenia ensures that its LED COB are selected with SDCM features (standard deviation of colour matching) at most within the third step of the Mac Adam ellipse. However, compared to the plate data reported by manufacturers you should consider the tolerances that are due to LED manufacturing process. Such tolerances involve small differences between the various sources and manufactures.

DIMENSION

All dimensions are in mm, unless otherwise specified.

FINISHES COLOURS

The colours of the illustrated articles are simply indicative of the real nuance.

€€ Our products enforce the European Community Rules 73/23 CEE - 93/68 CEE - 89/336 CEE and the CE mark is printed on the packaging.

Reproduction of this catalogue or any part of it is prohibited. The products illustrated in this catalogue are covered by one or more Italian or international patents. The company will take legal action against any imitators.

CONSORZIO ECOLIGHT

EXENIA belongs to the Consorzio Ecolight established in 2004 to comply with the provisions of European Directive 2002/96/CE-RAEE converted by Italian law into Legislative Decree No.151 dated 25/07/2005 for the management, recovery and treatment of electrical and electronic devices at the end of their usable life, in respect of all the regulations in force on the subject of environmental safeguards.

PHOTOBIOLOGICAL RISK

Unless otherwise stated in the installation and operating instructions, all LEDs used by EXENIA S.r.l. can be considered as belonging to the "RG1" group (low risk), according to the photobiological risk classification of EN 62471:2008.

5 YEARS WARRANTY

Exenia warrants that its products are free from manufacturing and/or material defects, in case of use in conformity with the destination, for a period of five years from the date of the invoice as indicated in the general conditions of guarantee which can be consulted on website www.exenia.eu.

EXENIA srl reserves the right to change, at any time and without prior warning, the technical specification of any product shown in this catalogue.

GENERAL TERMS OF SALE

PRICE LIST VALIDITY

Prices are to be understood as excluding VAT. This price list replaces and cancels all previous editions. The validity of the list prices indicated is to be intended until further written communication.

Reproduction, even partial, of figures and descriptions contained in our paper and electronic commercial documentation is expressly prohibited. The Company reserves the right to make changes and/or updates relating to products or anything else indicated in the documentation itself at any time without notice and obligation to communicate, according to the manufacturing and improvement requirements of the devices.

TRANSPORT

Deliveries in free port for orders of higher net value of Euro 500.00.

Deliveries Ex Works for orders with a net value of less than Euro 500.00.

Ex Works deliveries for sales and/or shipments abroad.

EXENIA S.r.l. assumes no responsibility in relation to any losses and/or damage in the transport of the Products, except in the case in which the transport is carried out carriage paid.

The buyer undertakes to check the conditions of the Products at the time of delivery and report any complaints and/or actions directly to the carrier in cases of loss, theft, damage, loss, delays in the transport activity and/or in the delivery methods.

RETURNS

Returns of goods must always be authorized in writing by the company EXENIA S.r.l. and must reach our warehouse in Porto Franco; special items or items not included in the General Catalogue in force at the time of the return cannot be returned.

SAFETY STANDARDS

All the products of the EXENIA S.r.l. are compliant with the European Community Directives "CE".

WARRANTY

Exenia S.r.l. guarantees that its products are free from manufacturing and/or material defects, in case of proper use for the intended purpose, for a period of five years from the date of the invoice according to what is indicated in the general guarantee conditions which can be consulted on the website www.exenia.eu.

INFORMATION PURSUANT TO THE D.LGS. 196 OF 06/30/2003

Pursuant to Legislative Decree 196 of 30 June 2003, the processing of personal data provided will take place at the headquarters of the company EXENIA S.r.l. Data archiving will be carried out on paper and/or magnetic media in order to allow the company EXENIA S.r.l. to provide the performance of the obligations strictly related to the execution of the orders and the relative communications to the Banks which the Company usually uses..

ECO WEEE REGULATION

EXENIA srl is a member of the Ecolight Consortium
Via Gattamelata 34 - 20149 Milan Tel. +39 02 33600732

ECO WEEE

Eco environmental contribution.

The WEEE (Waste Electrical and Electronic Equipment) Eco Contribution, European Directive 2012/19/UE, is a method Decreed in Law No. 49 of 14 March 2014 and made available to manufacturers of electrical and electronic equipment to finance the recovery, treatment and disposal of waste deriving from such equipment (WEEE) and which the producers belonging to the ECOLIGHT Consortium have decided to use.

ROHS II AND ROHS III DIRECTIVES

Legislative Decree No. 27/2014 and the European Union Law No. 137/2015, implements respectively the European Directive 2012/65/UE and 2015/863/UE, RoHs II and RoHs III - Limits of use of certain dangerous substances - relating to the reduction of dangerous substances in electrical and electronic equipment. Starting from 22 July 2019 all new electrical and electronic equipment placed on the market must not contain or must contain to a limited extent substances such as:

- lead
- mercury
- cadmium
- hexavalent chromium
- polybrominated biphenyls (PBB)
- polybrominated defend ethers (PBDEs)
- Ftalato di bis(2-etilesile) (DEHP)
- Benzilbutilftalato (BBP)
- Dibutilftalato (DBP)
- Diisobutilftalato (DIBP)

The products listed in this price list already include this disposal fee.

REACH REGULATION

All the products of the EXENIA S.r.l. don't contain, or anyway comply with the maximum permitted limits, dangerous substances in the SVHC list, in compliance with European Regulation 1907/2006 and subsequent amendments.

Product can be installed on normally
flammable surfaces (90°C)

Over-paintable white plaster finish

Permanent emergency version

Power supply cable length

Independent power supply unit that
can be mounted separately outside the
luminaire without additional housing

Power supply unit equipped with thermal
protection. The dots in the triangle
replace the values (°C) of the maximum
rated enclosure temperature

Power supply unit suitable for installation
on flammable surfaces. The part of
the power supply in contact with the
flammable surface does not exceed 95°C
in normal operation, and 115°C in the
event of a failure of the power supply.
DIN VDE 0710-T14

Short-circuit proof safety power supply
unit (built-in protection)

Power supply with constant current
output

Constant voltage power supply unit

Safety extra-low voltage according to EN
61347-2-2

Power Factor Corrector: serves to stabilise
the lamp parameters (voltage and
current) with varying supply voltage

Component or luminaire suitable
for cascade connection

European Electrical Certification
Standards

All products are manufactured in
accordance with the following standards
and subsequent variants; in compliance
with European Standards (2004/108/EC -
2006/95/EC) for CE marking - 2000/55/
EC - 2008/35/EC

CRC_

The CRC treatment is an accessory galvanic
process that implements the resistance to
corrosive attacks in extreme environments.
It is recommended in the presence of direct
salt spray, chemical agents in solution or
sprinkling, aggressive vapours and in all
conditions of high wear and abrasion.
