

ideal lux.

Lolly

**Lolly** is a wall-mounted luminaire defined by a discreet yet refined presence, where the aesthetics of metal and glass converge in the compact geometry of two overlapping discs.

The diffusing bulb provides a soft,  
even light while occupying minimal space.

The **IP44 rating** ensures safe indoor use even in humid conditions, such as bathrooms and spaces connected to the outdoors.

It is ideal for entrances, hallways,  
living areas, and passageways—whether  
used as a single accent or repeated in a series  
to create a cohesive pattern of light points.
